

Loyola Marymount University

Women's Basketball Team Scouting Report

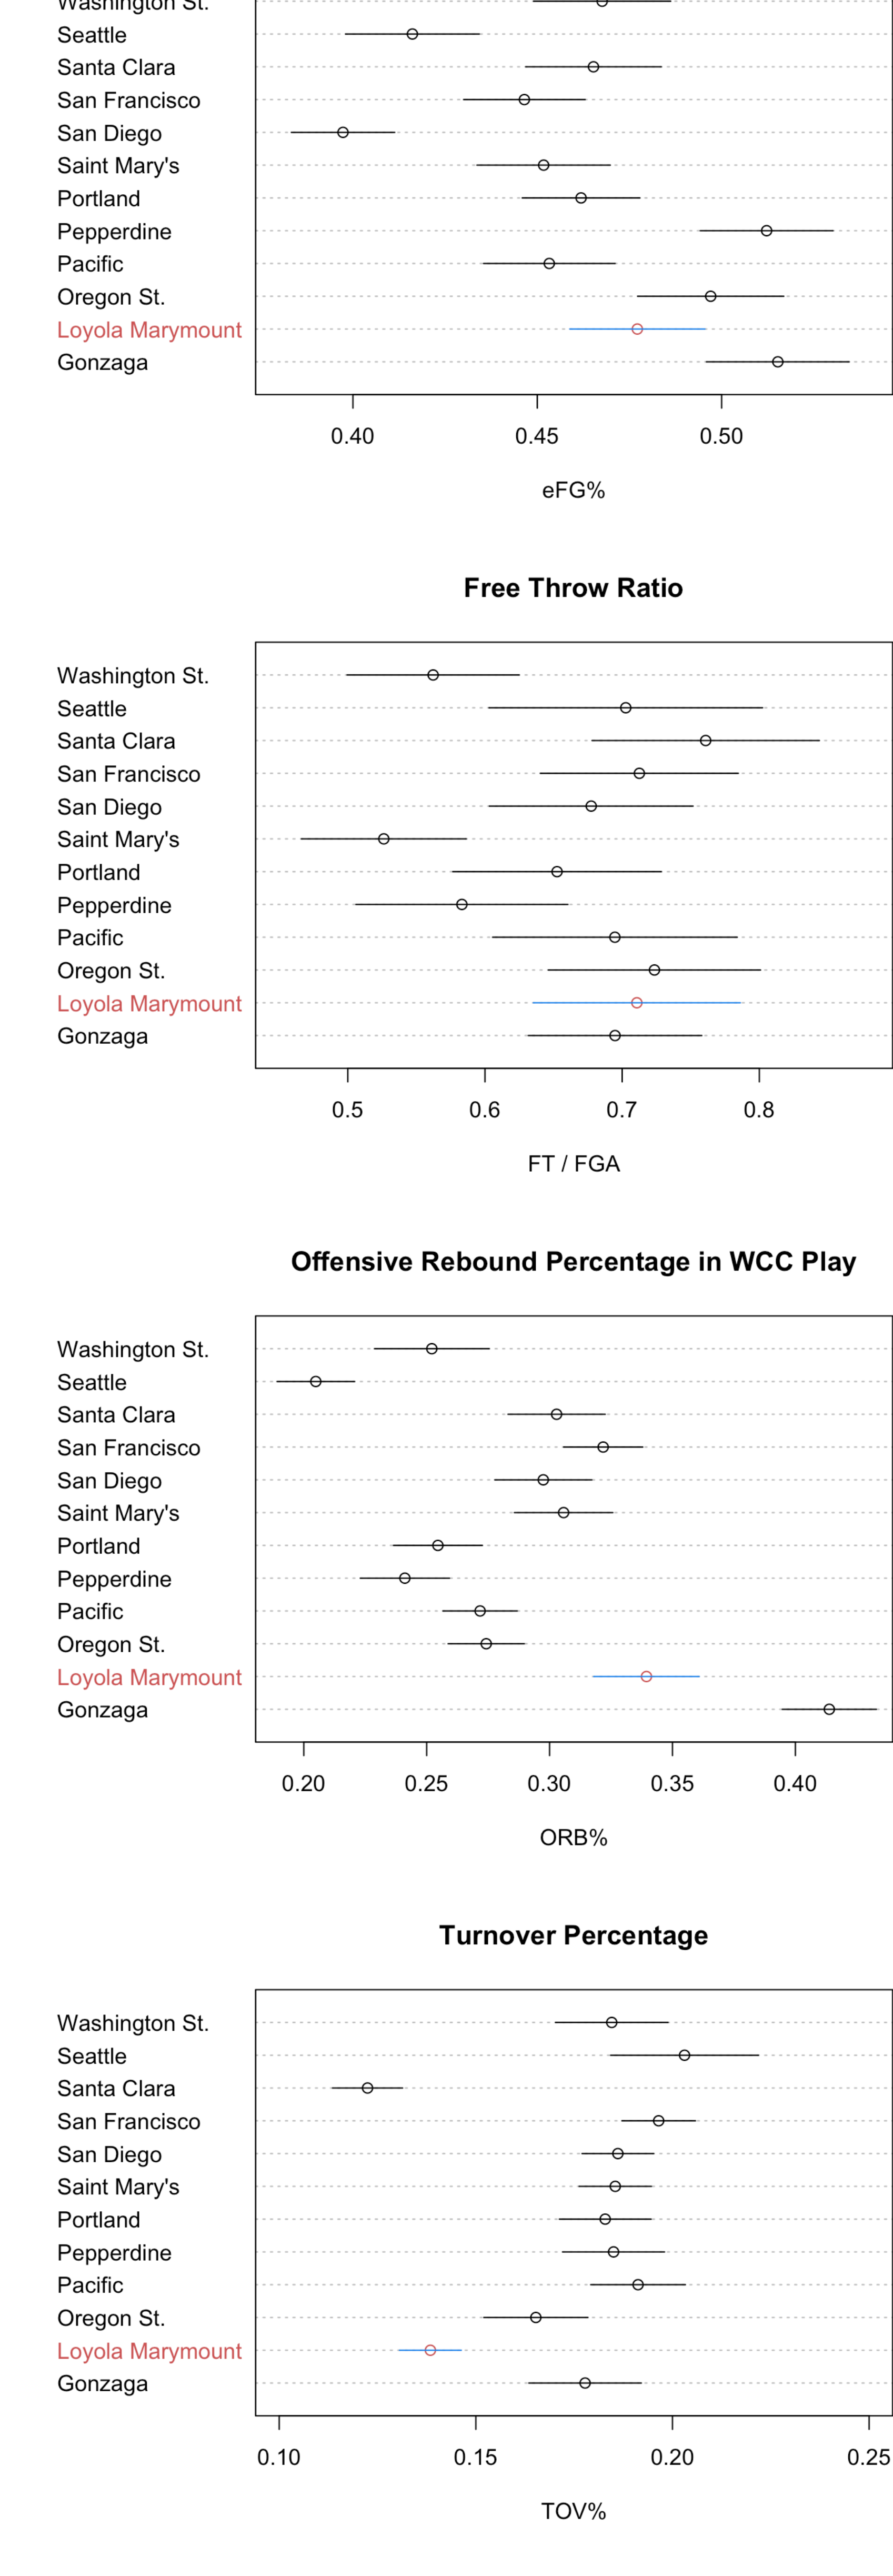

Overall Key Points

- Decently strong metrics across the board on offense
- Good at forcing turnovers, but also fairly easy to shoot against them and draw fouls
- Defensive rebounding vacuum:** departure of Jess Lawson, who grabbed over a quarter of team's defensive boards

Offense

Strengths: decently strong shooting, rebounding, and ball security

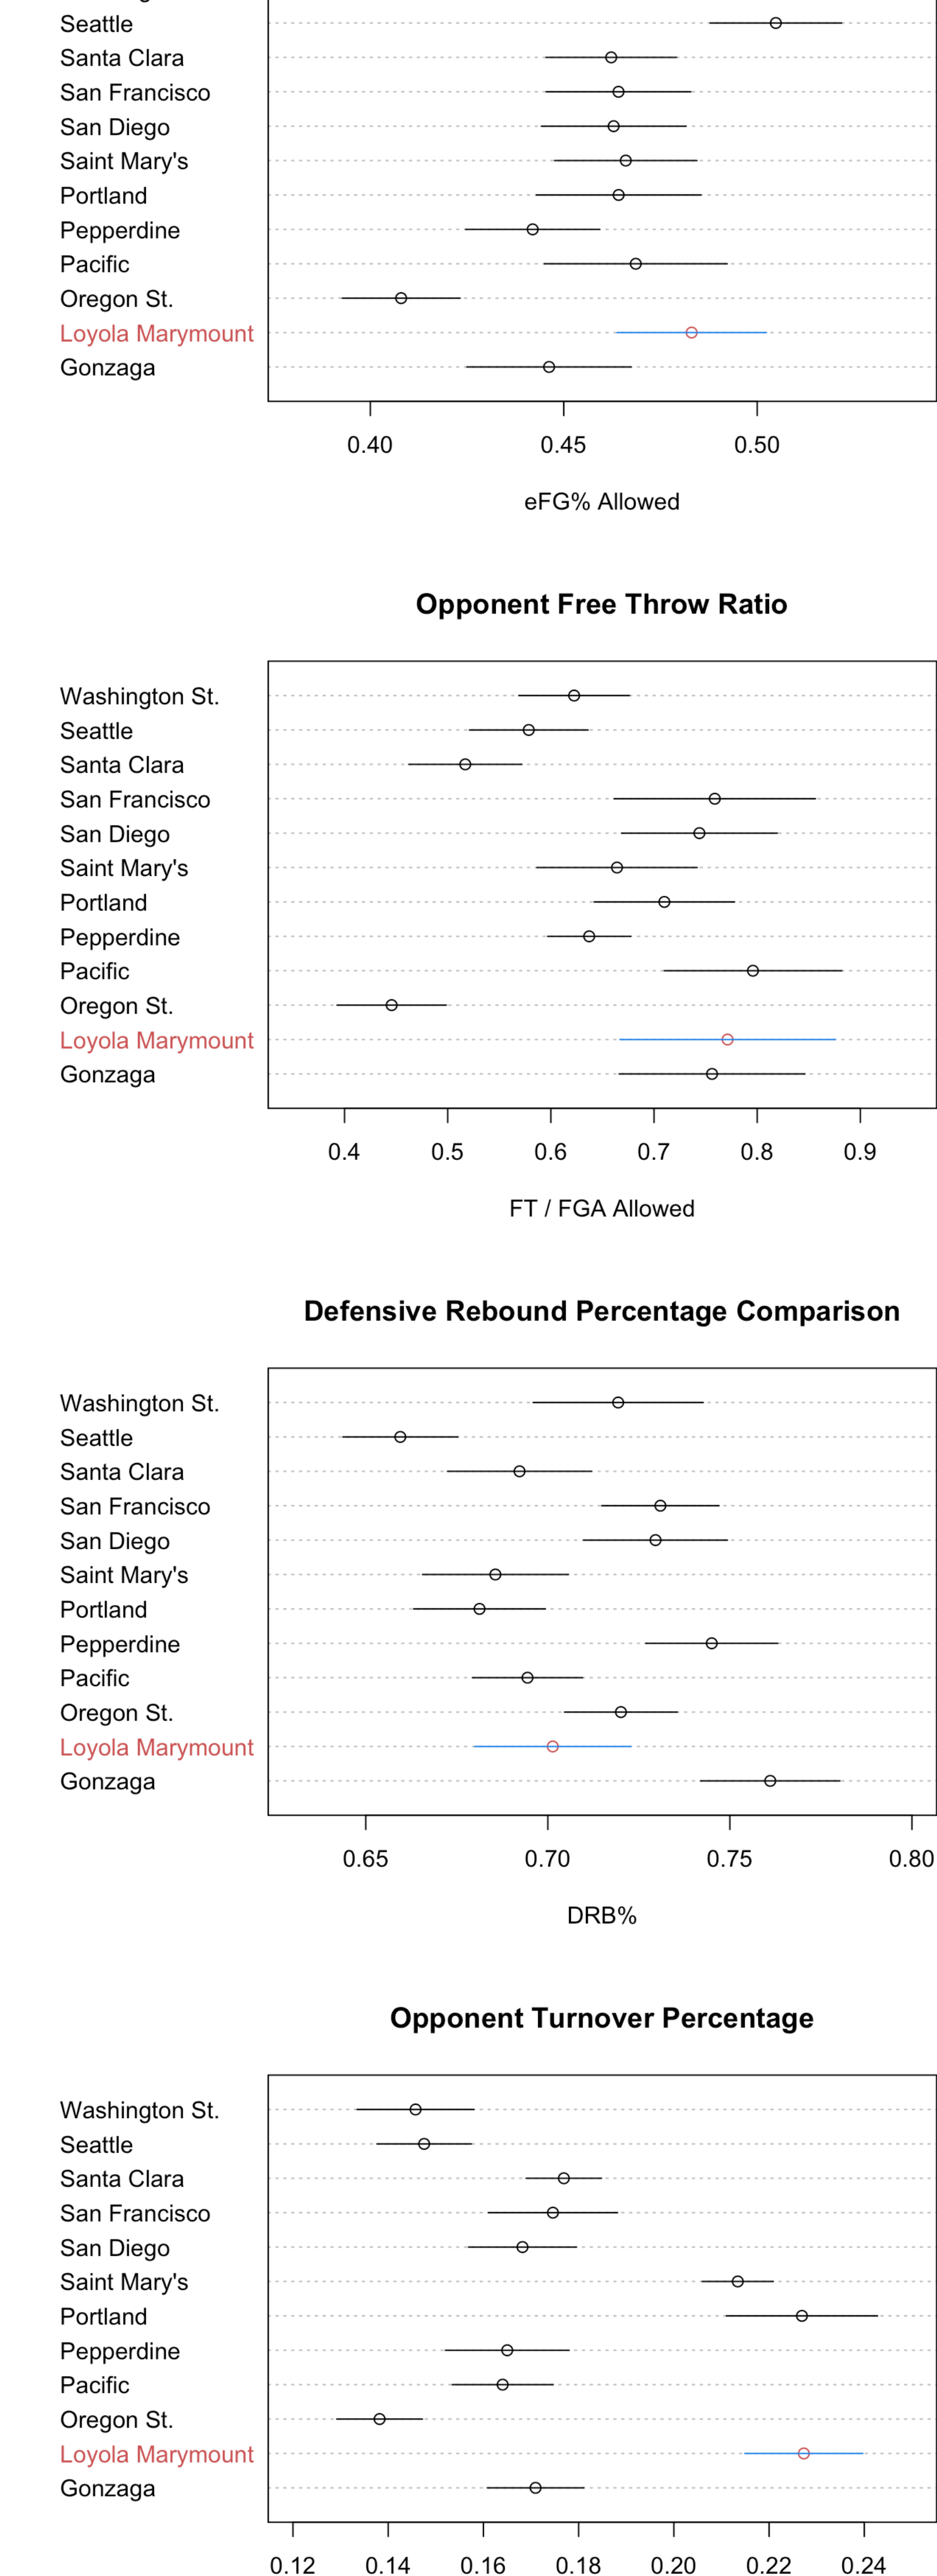

Weaknesses: unspectacular metrics for drawing fouls

Defense

Strengths: opponents shot well against them; too many fouls

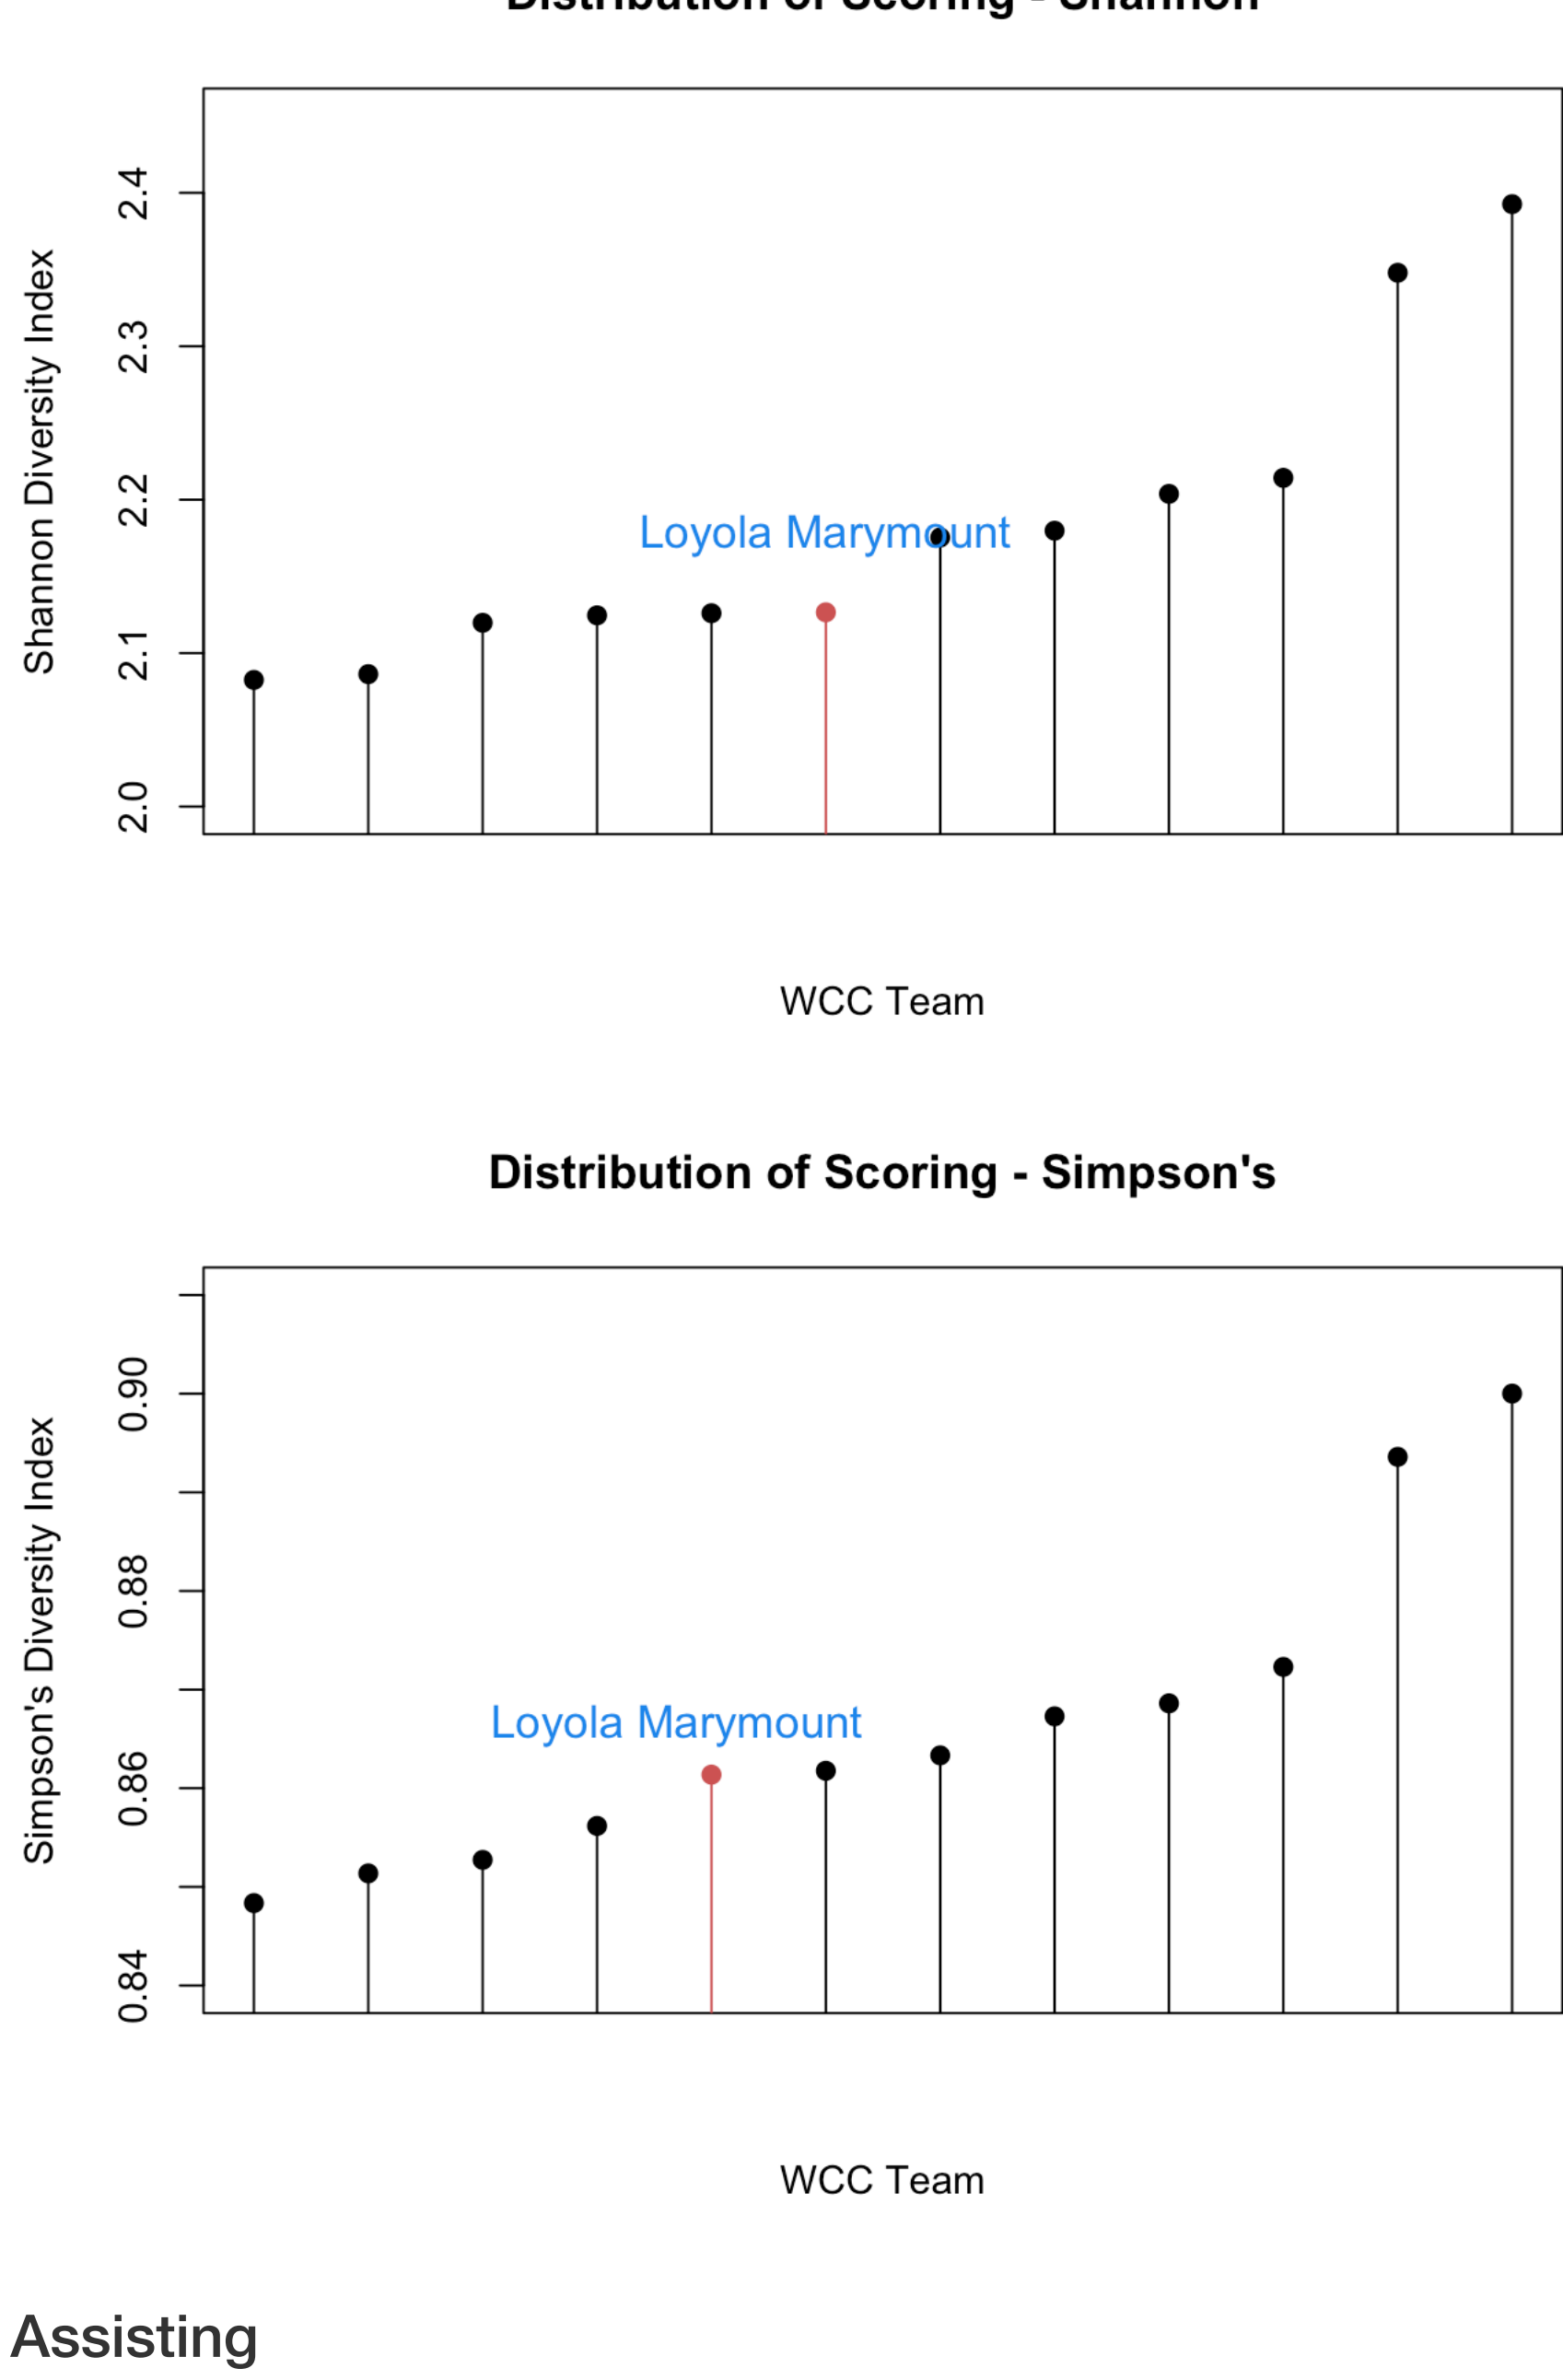

Weaknesses: strong ability to force turnovers

Workload Distribution

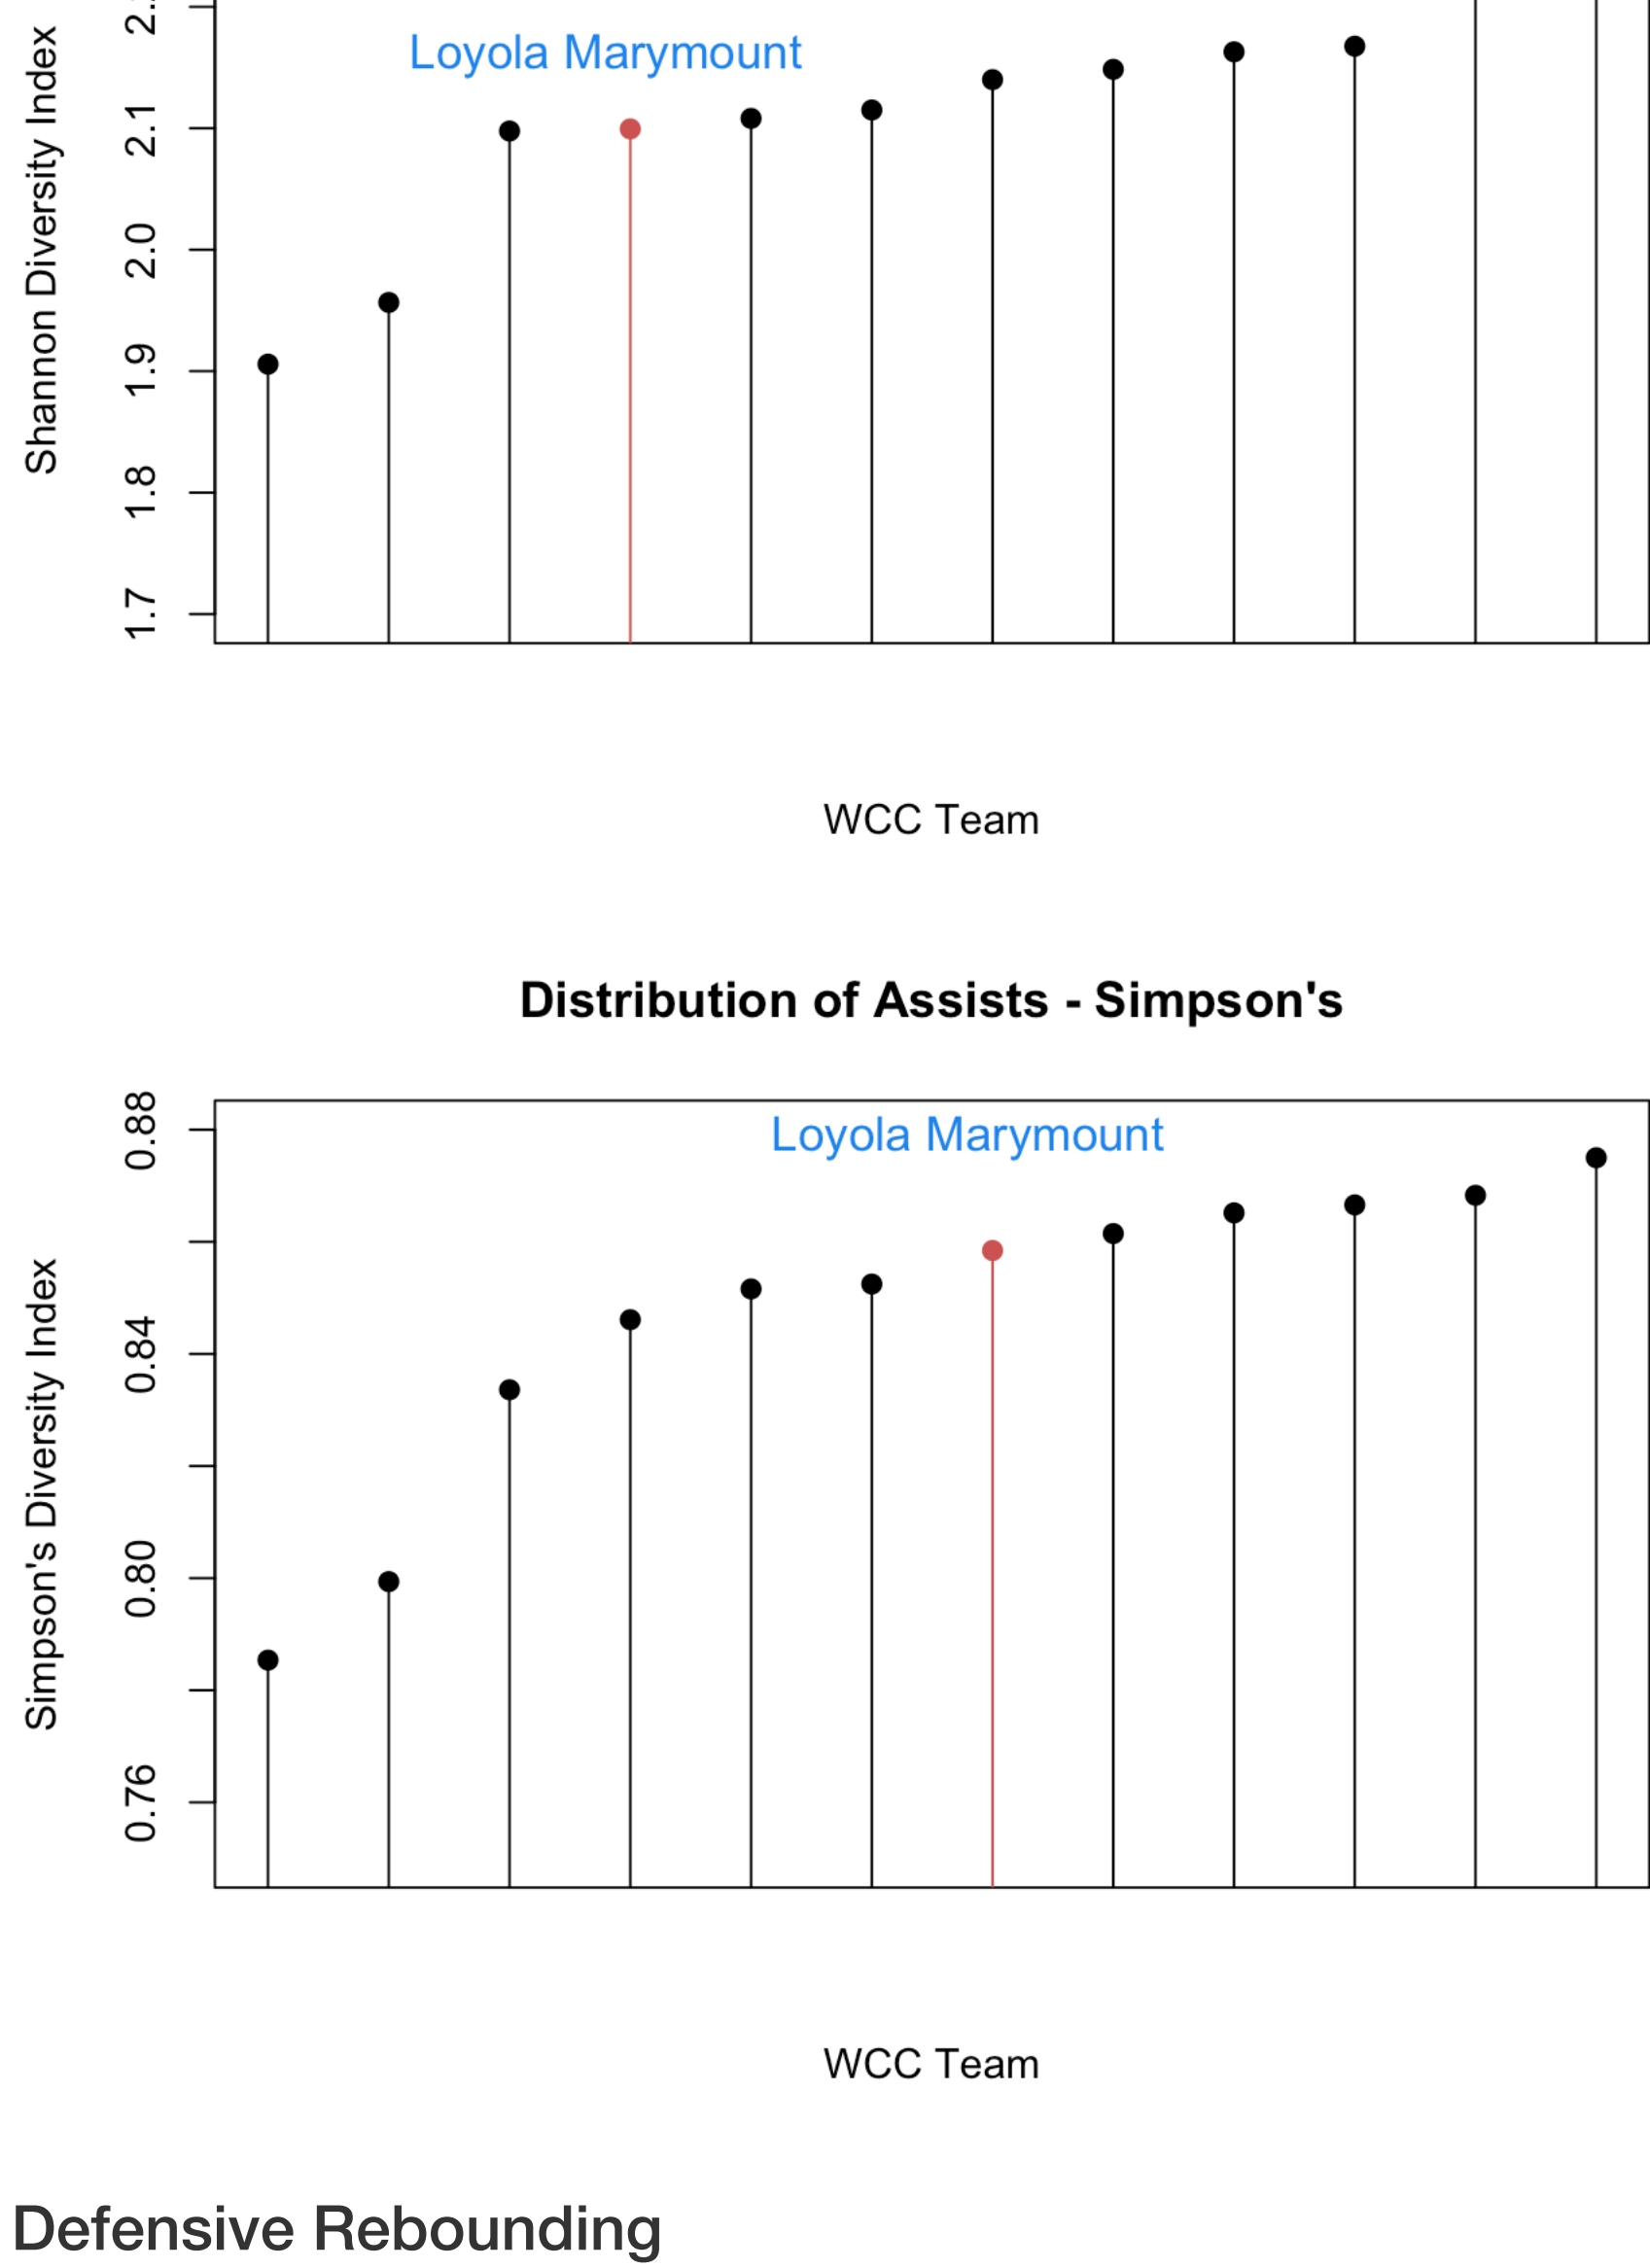

Scoring

Assessment: middle of the pack distribution for scoring

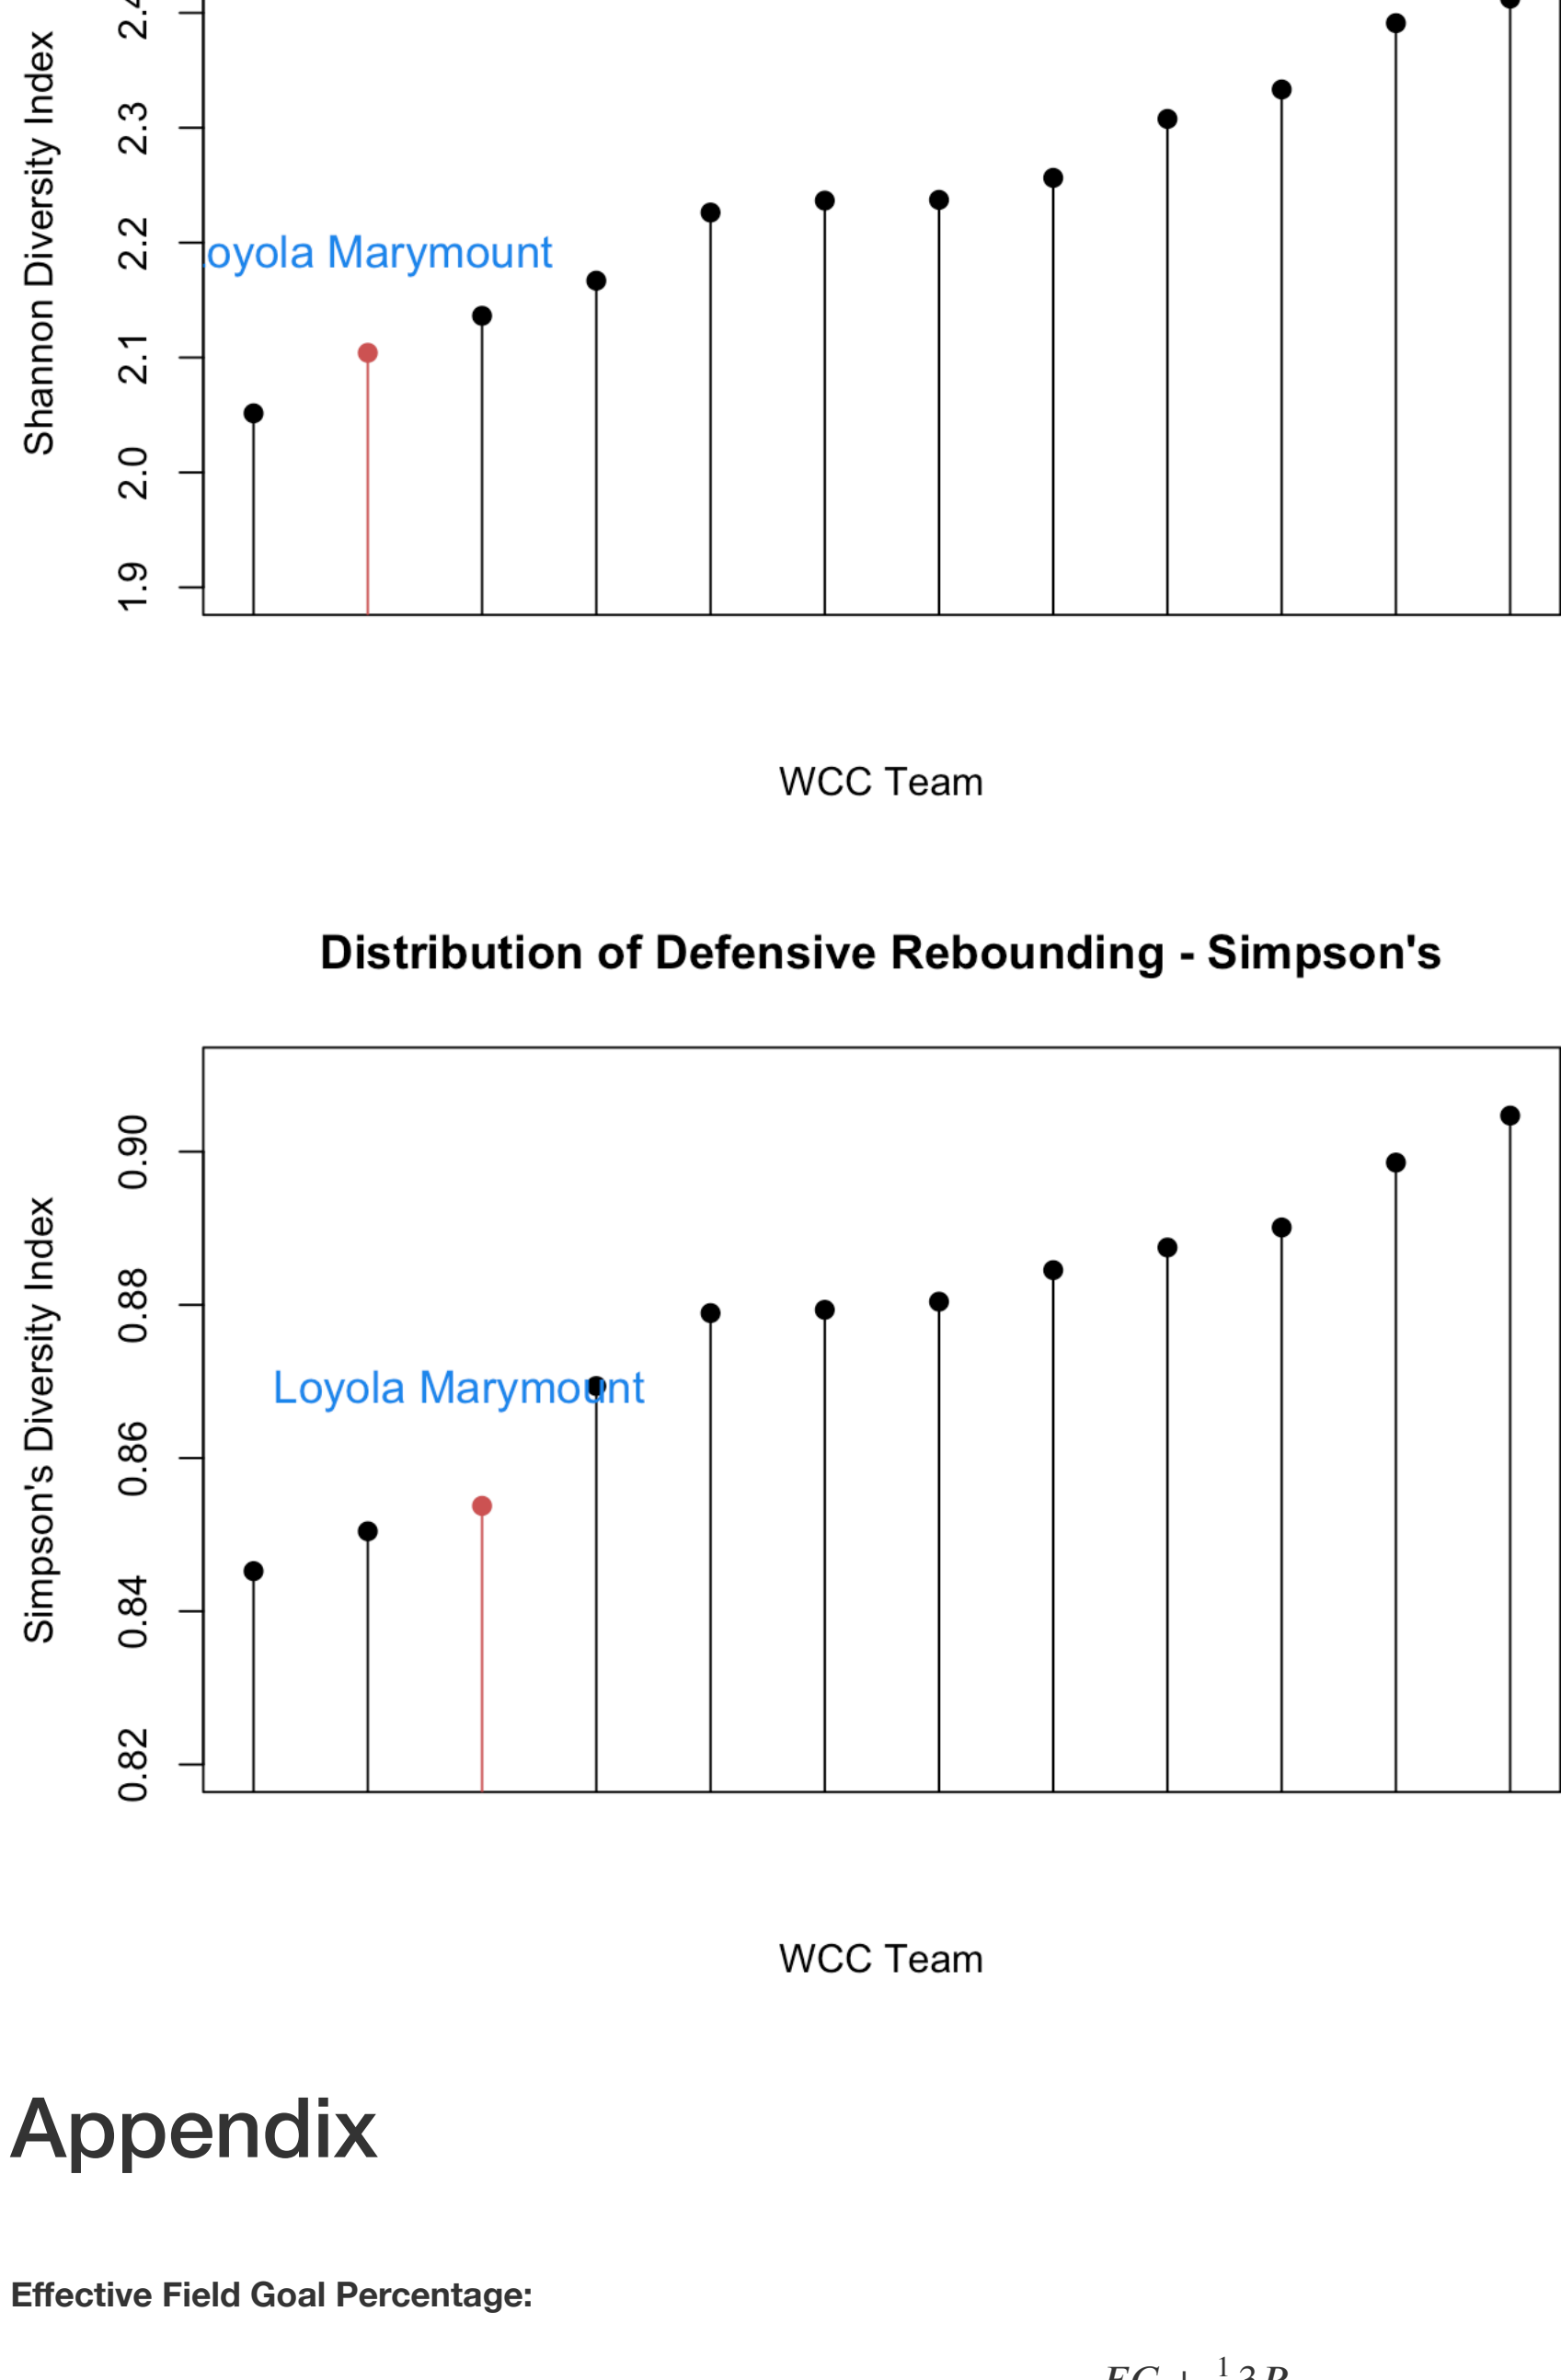

Assisting

Assessment: middle of the pack distribution for assisting

Defensive Rebounding

Assessment: quite concentrated; over 25% of DRB's by just one player, Jess Lawson (not there anymore)

Appendix

Effective Field Goal Percentage:

$$eFG = \frac{FG + \frac{1}{3}3P}{FGA}$$

3P: three point shots made

Free Throw Percentage:

$$FTR = \frac{FTA}{FGA}$$

Rebounding Percentage:

$$RB_{\text{net}} = \frac{ORB}{ORB + Opp\ DRB}$$

flip ORB, DRB for defensive rebounding metric

Turnover Percentage:

$$TOV_{\text{net}} = \frac{TOV}{FGA + TOV + \frac{11}{25}FTA}$$

Shannon's Diversity Index:

$$H = - \sum_{i \in C} (p_i \log(p_i)),$$

p_i is proportion of C that belongs to i

Simpson's Diversity Index:

$$D = 1 - \frac{\sum_{i \in C} N_i(N_i - 1)}{N(N - 1)},$$

N is the total number of elements in C , N_i is the number of elements in C that belong to group i
