

University of San Diego Women's Basketball Team Scouting Report

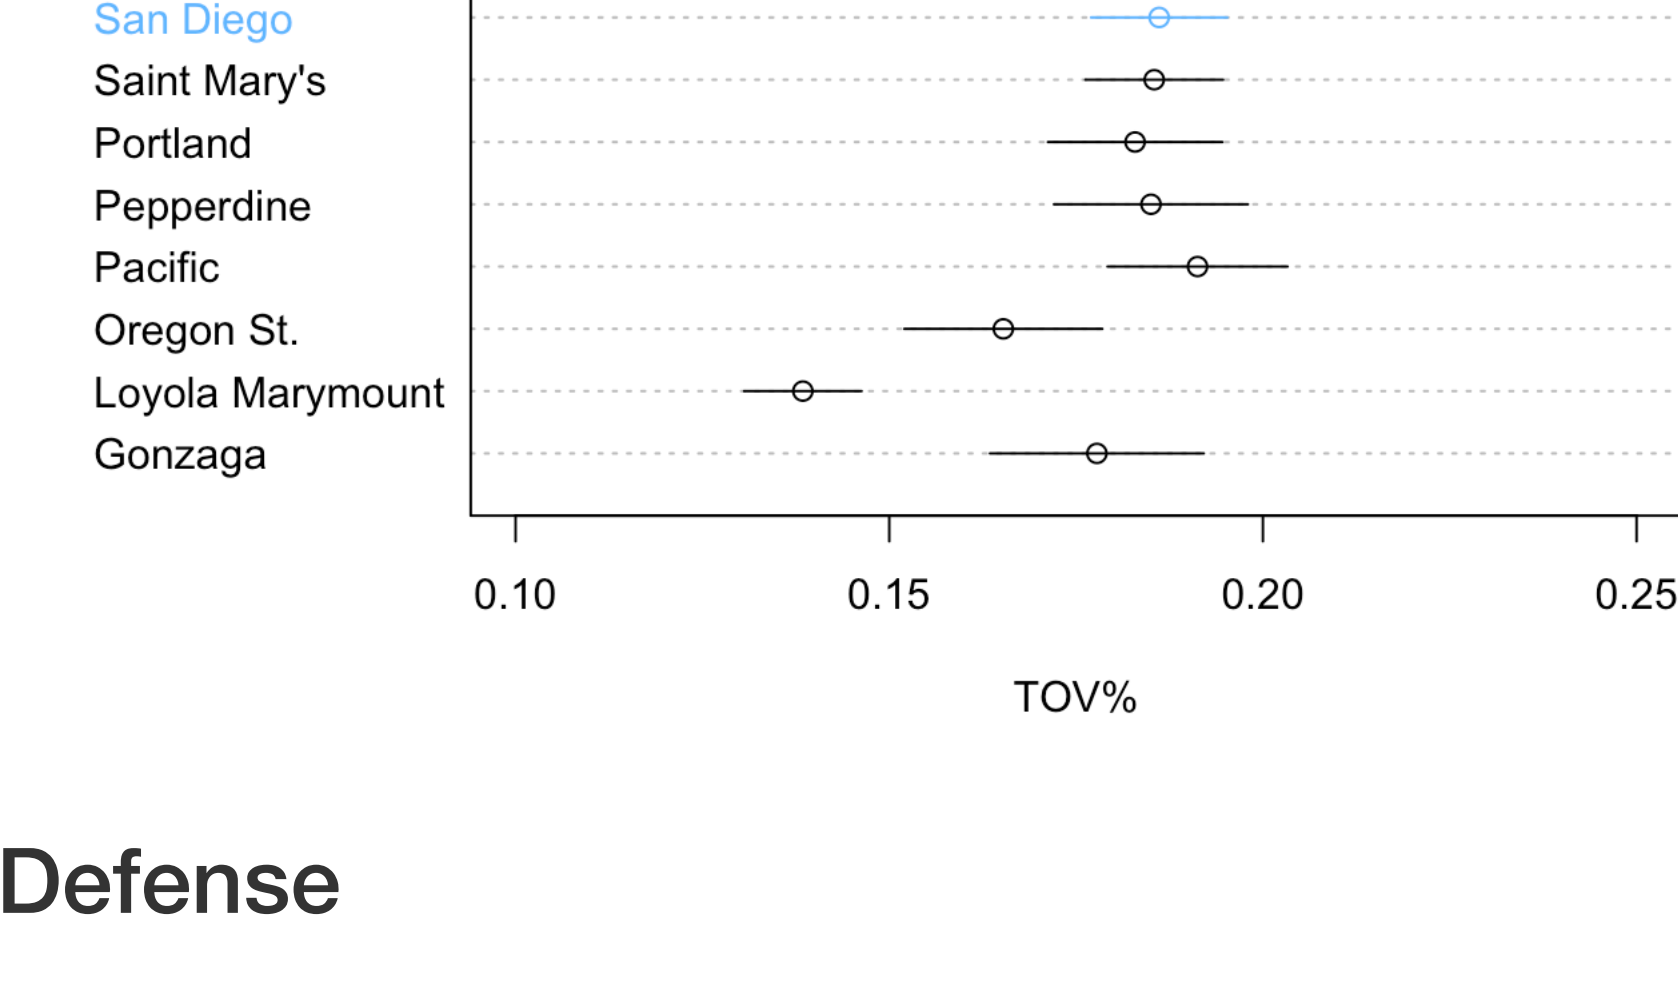

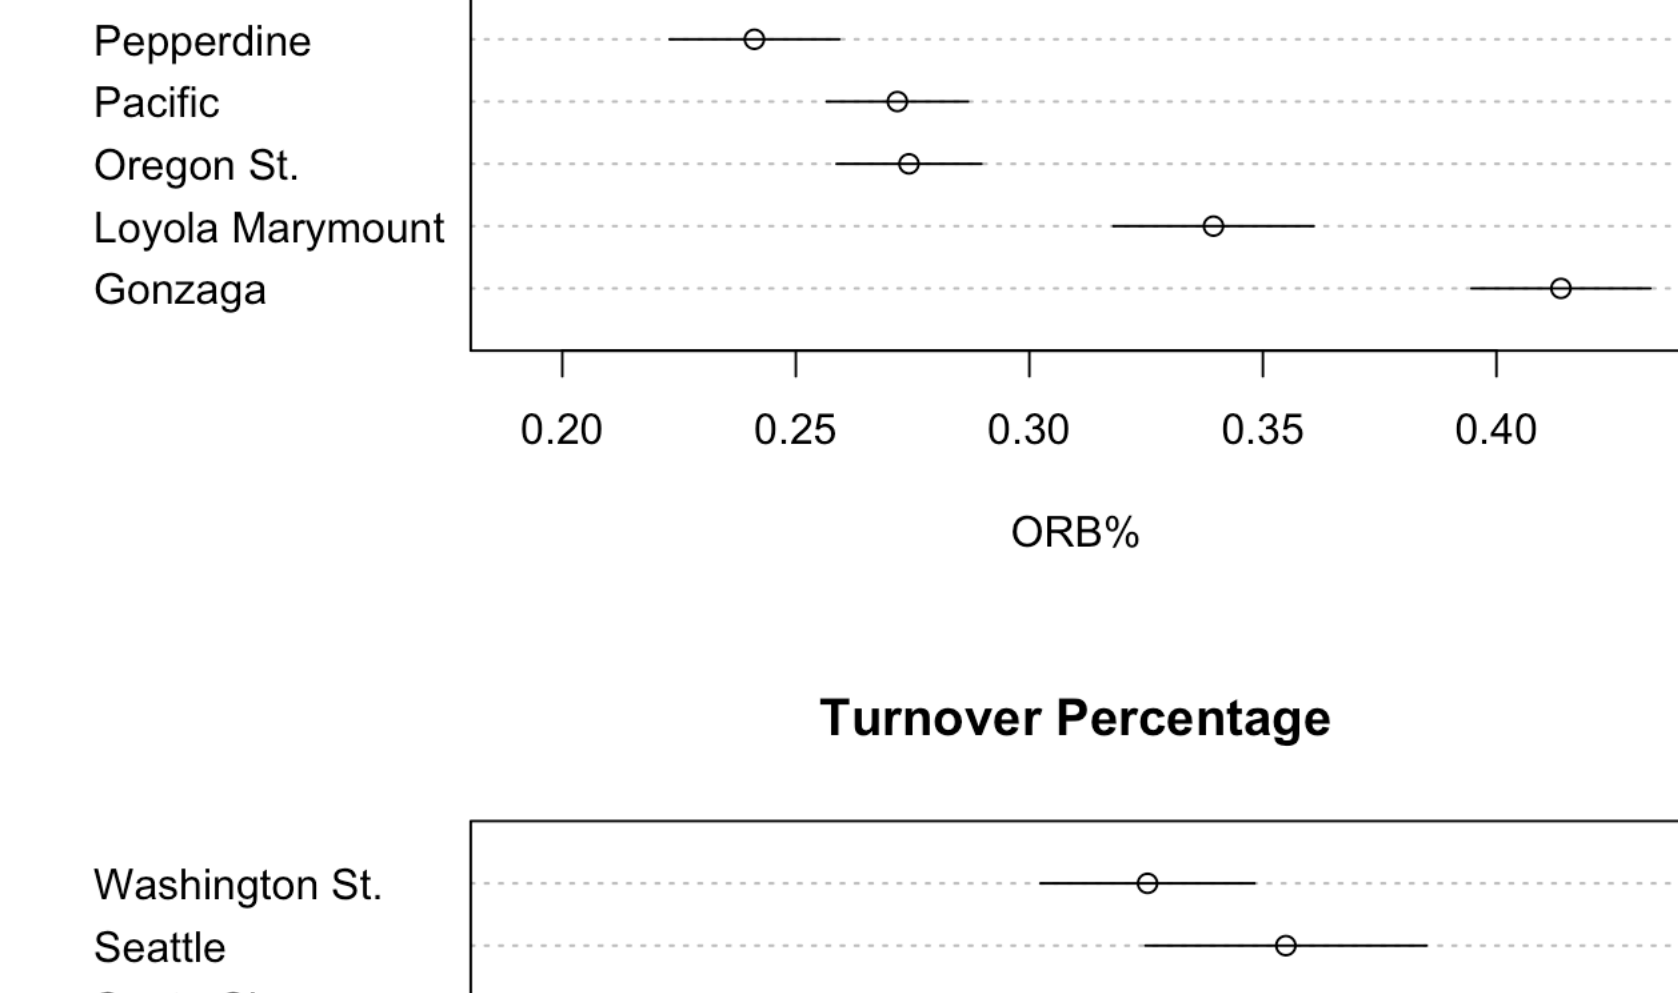

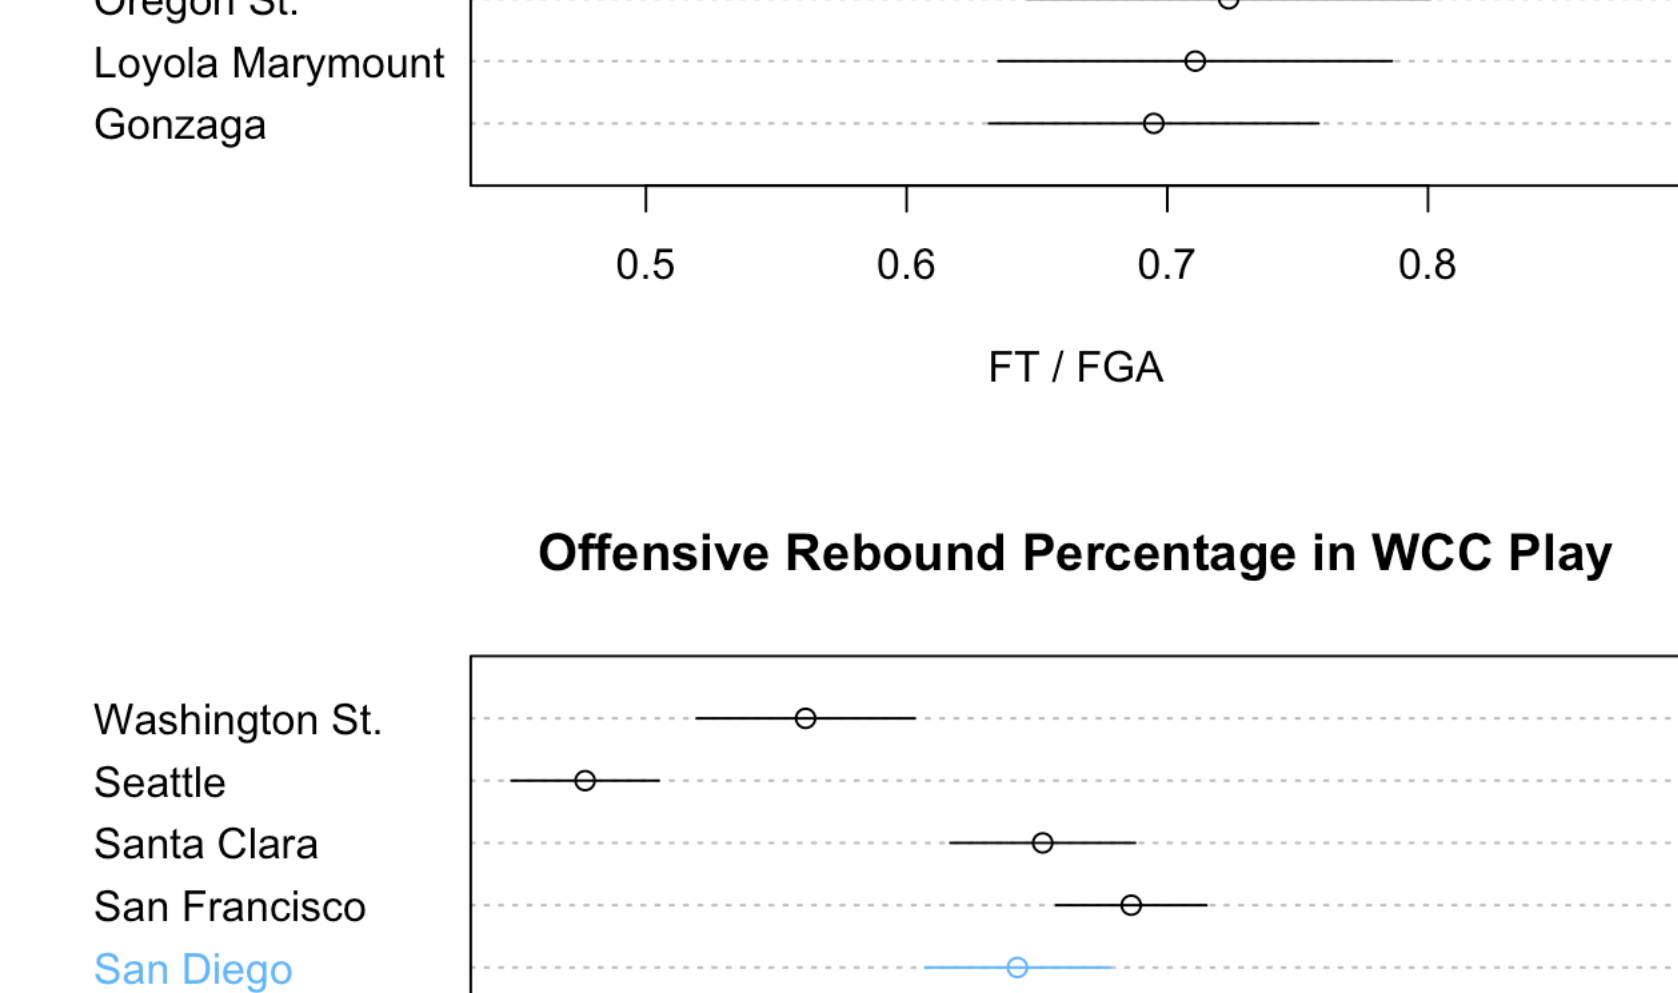

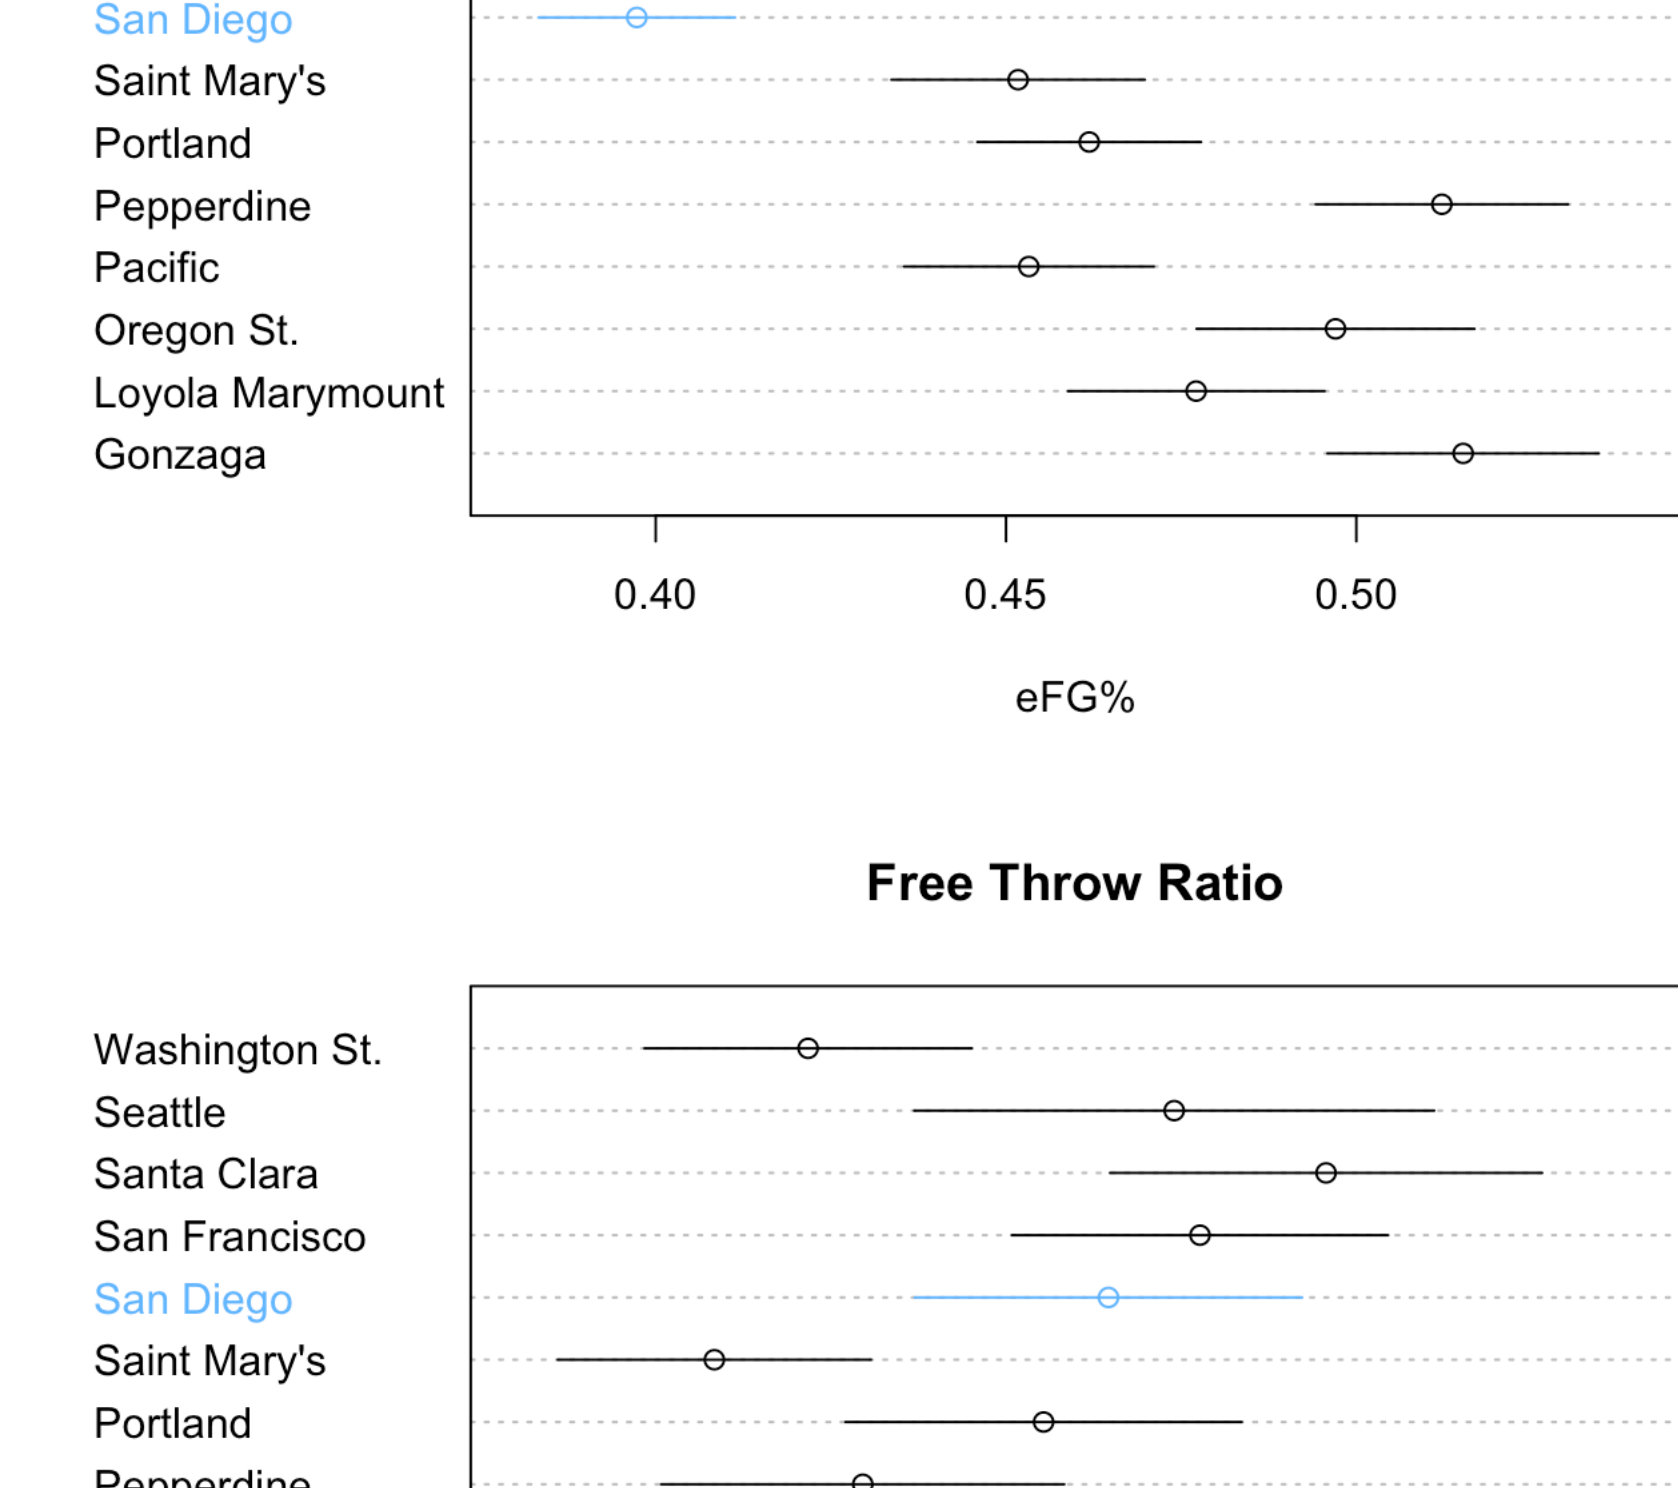

Overall Key Points

- Inability to shoot well
- Diverse array of defensive rebounding
- Otherwise, quite a midlevel team, statistically
- Very different team next year across all metrics

Offense

Strengths: none

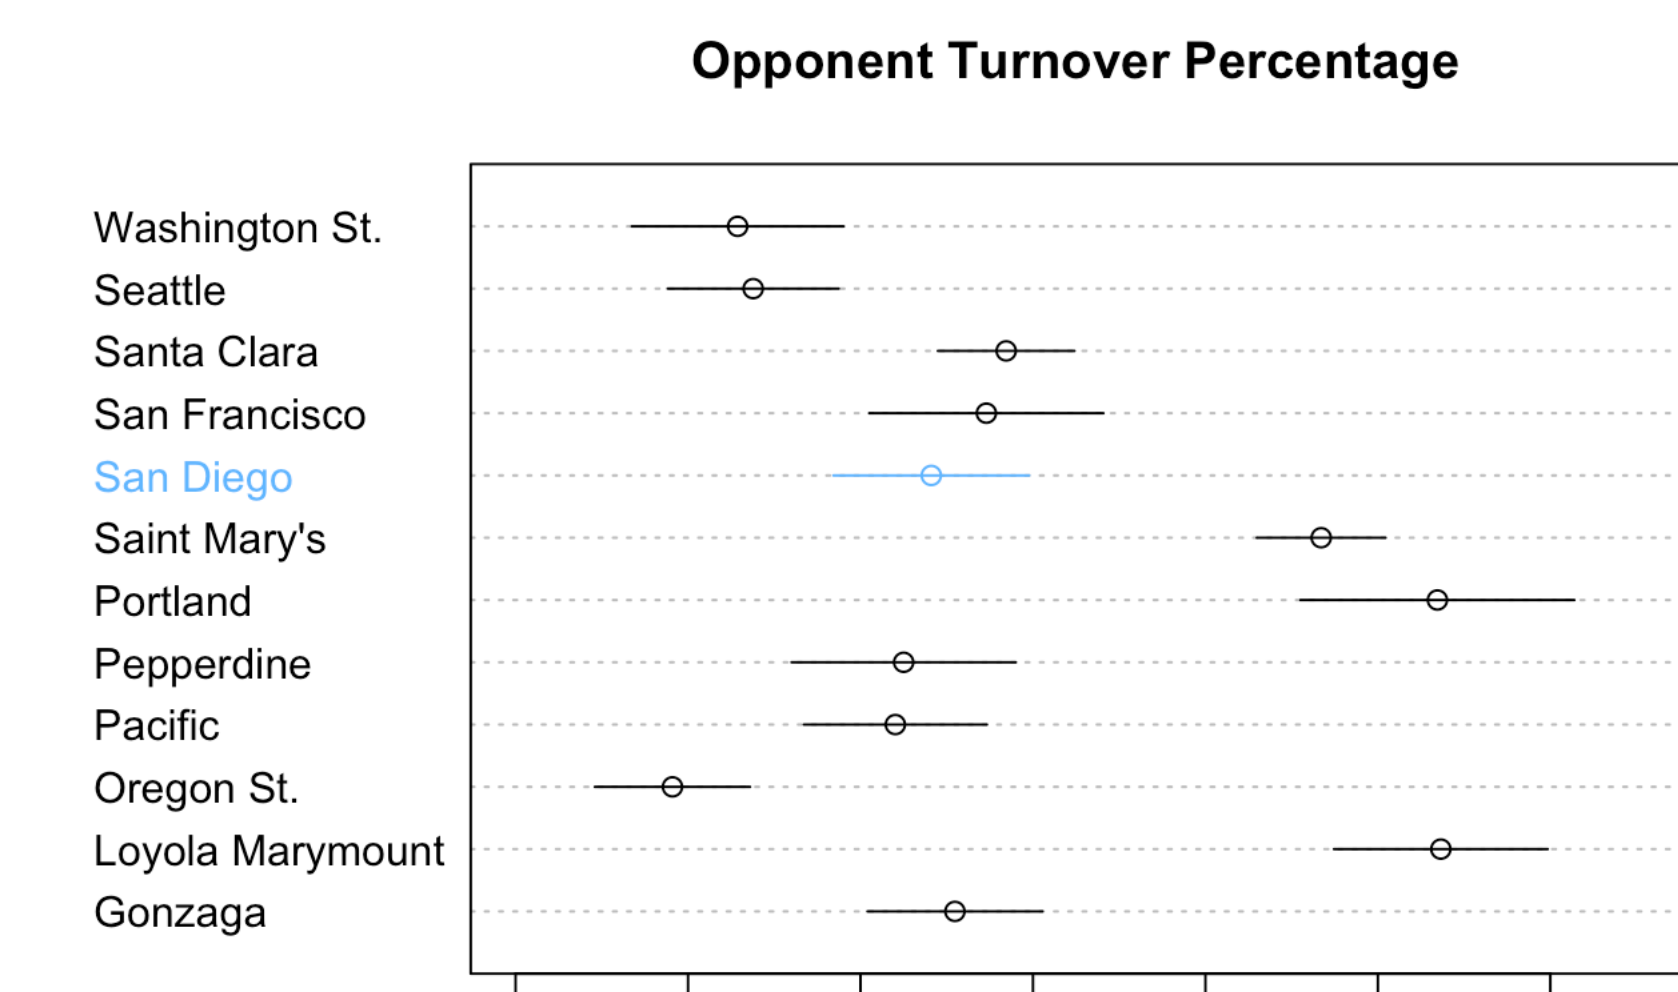

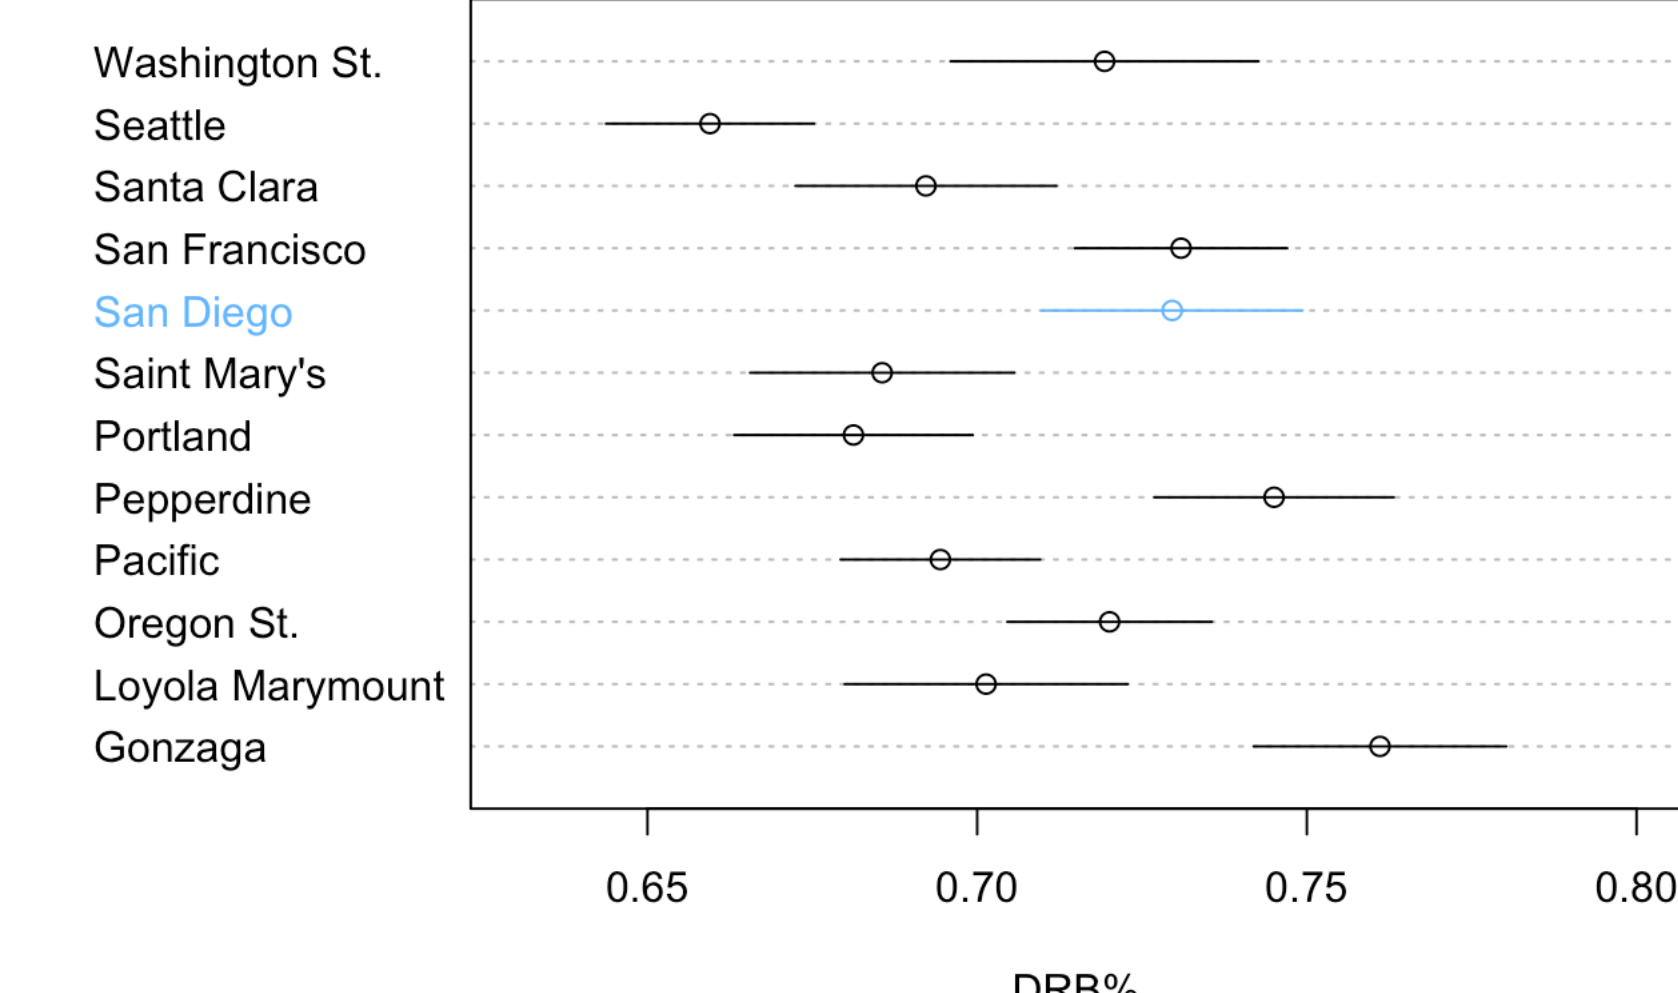

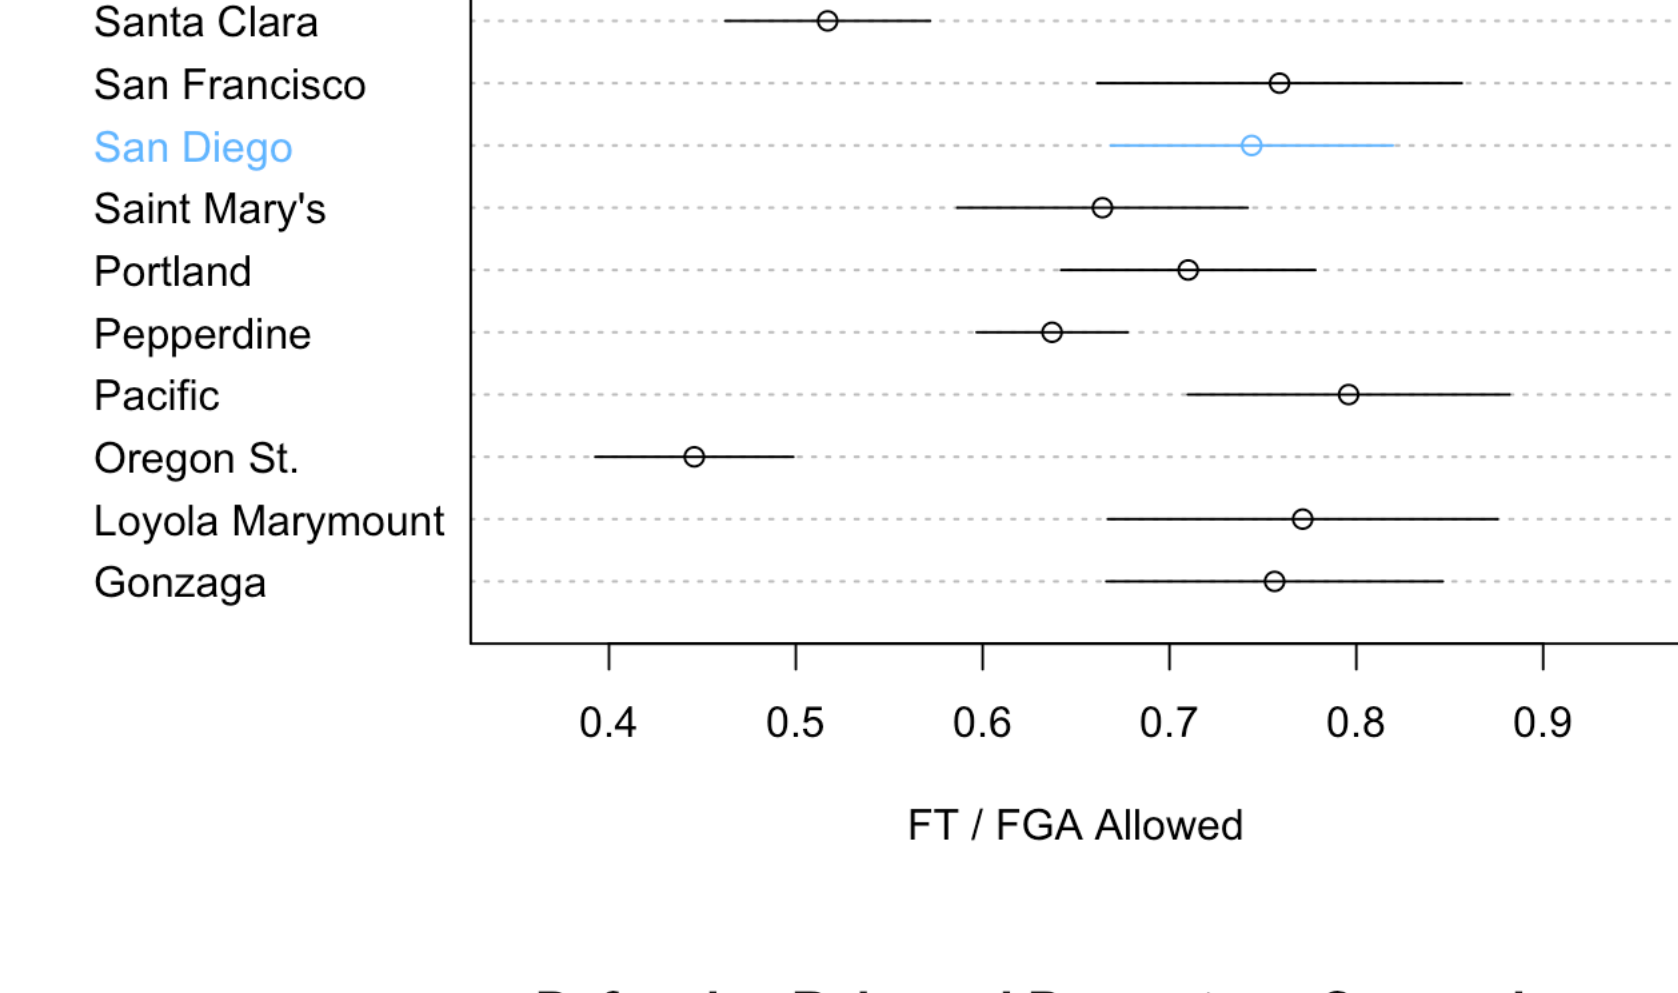

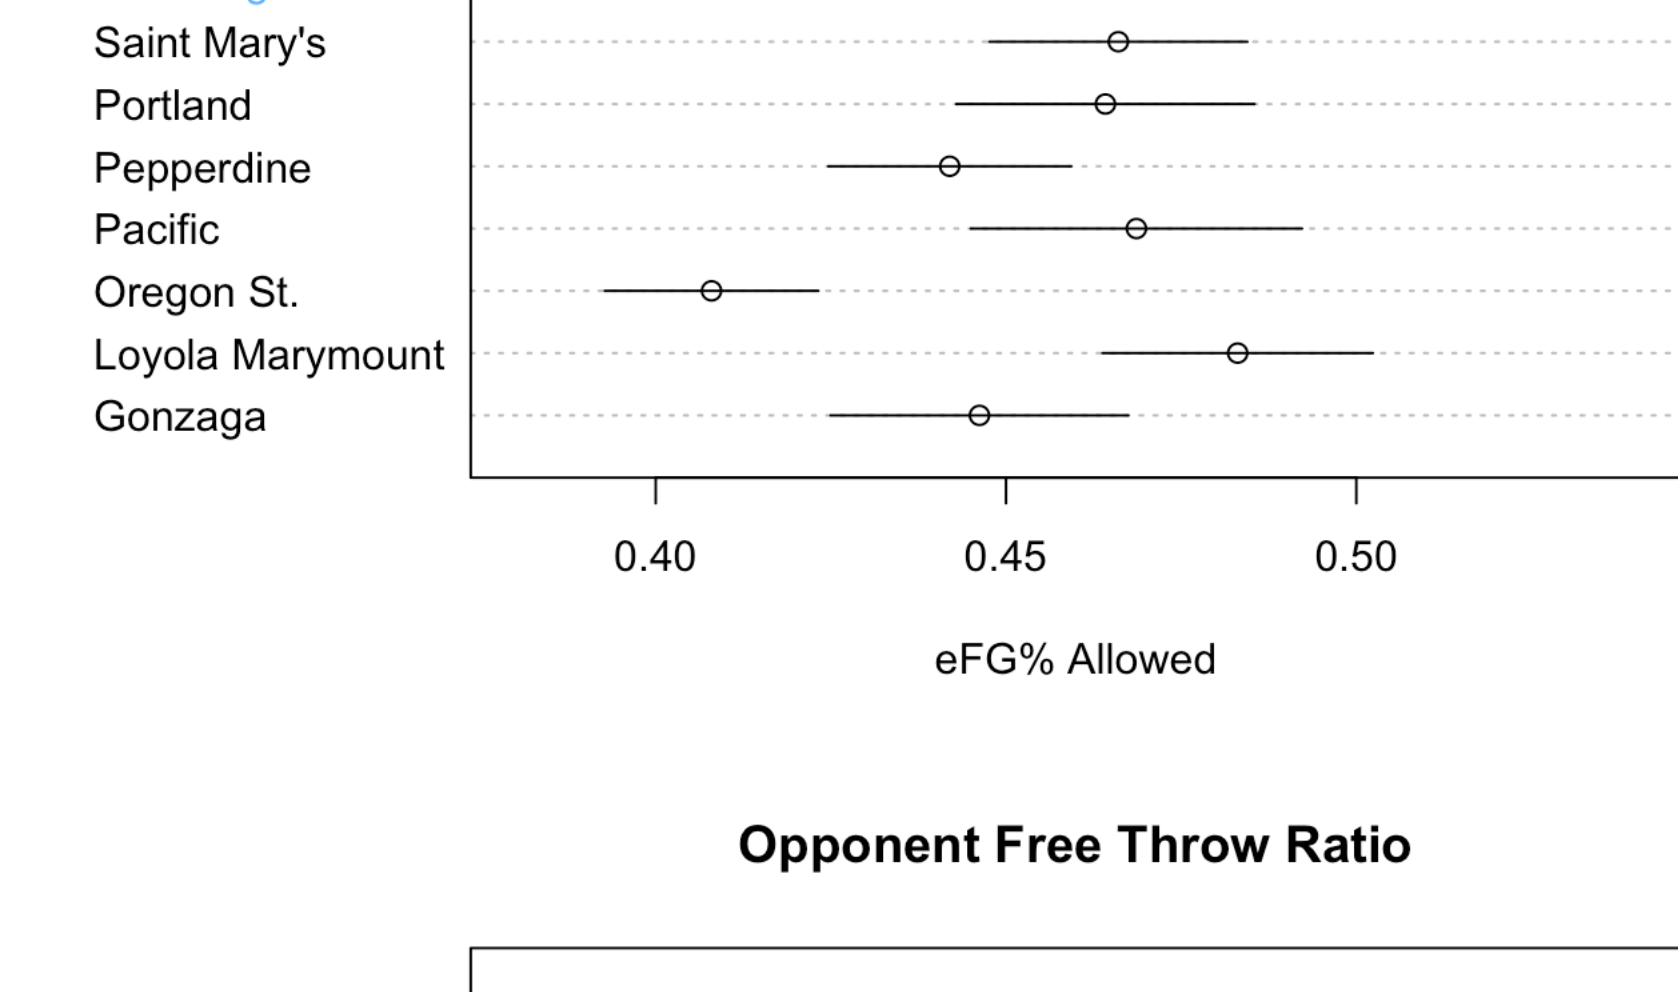

Weaknesses: poor shooting

Defense

Strengths: slightly above average at avoiding fouls, rebounding

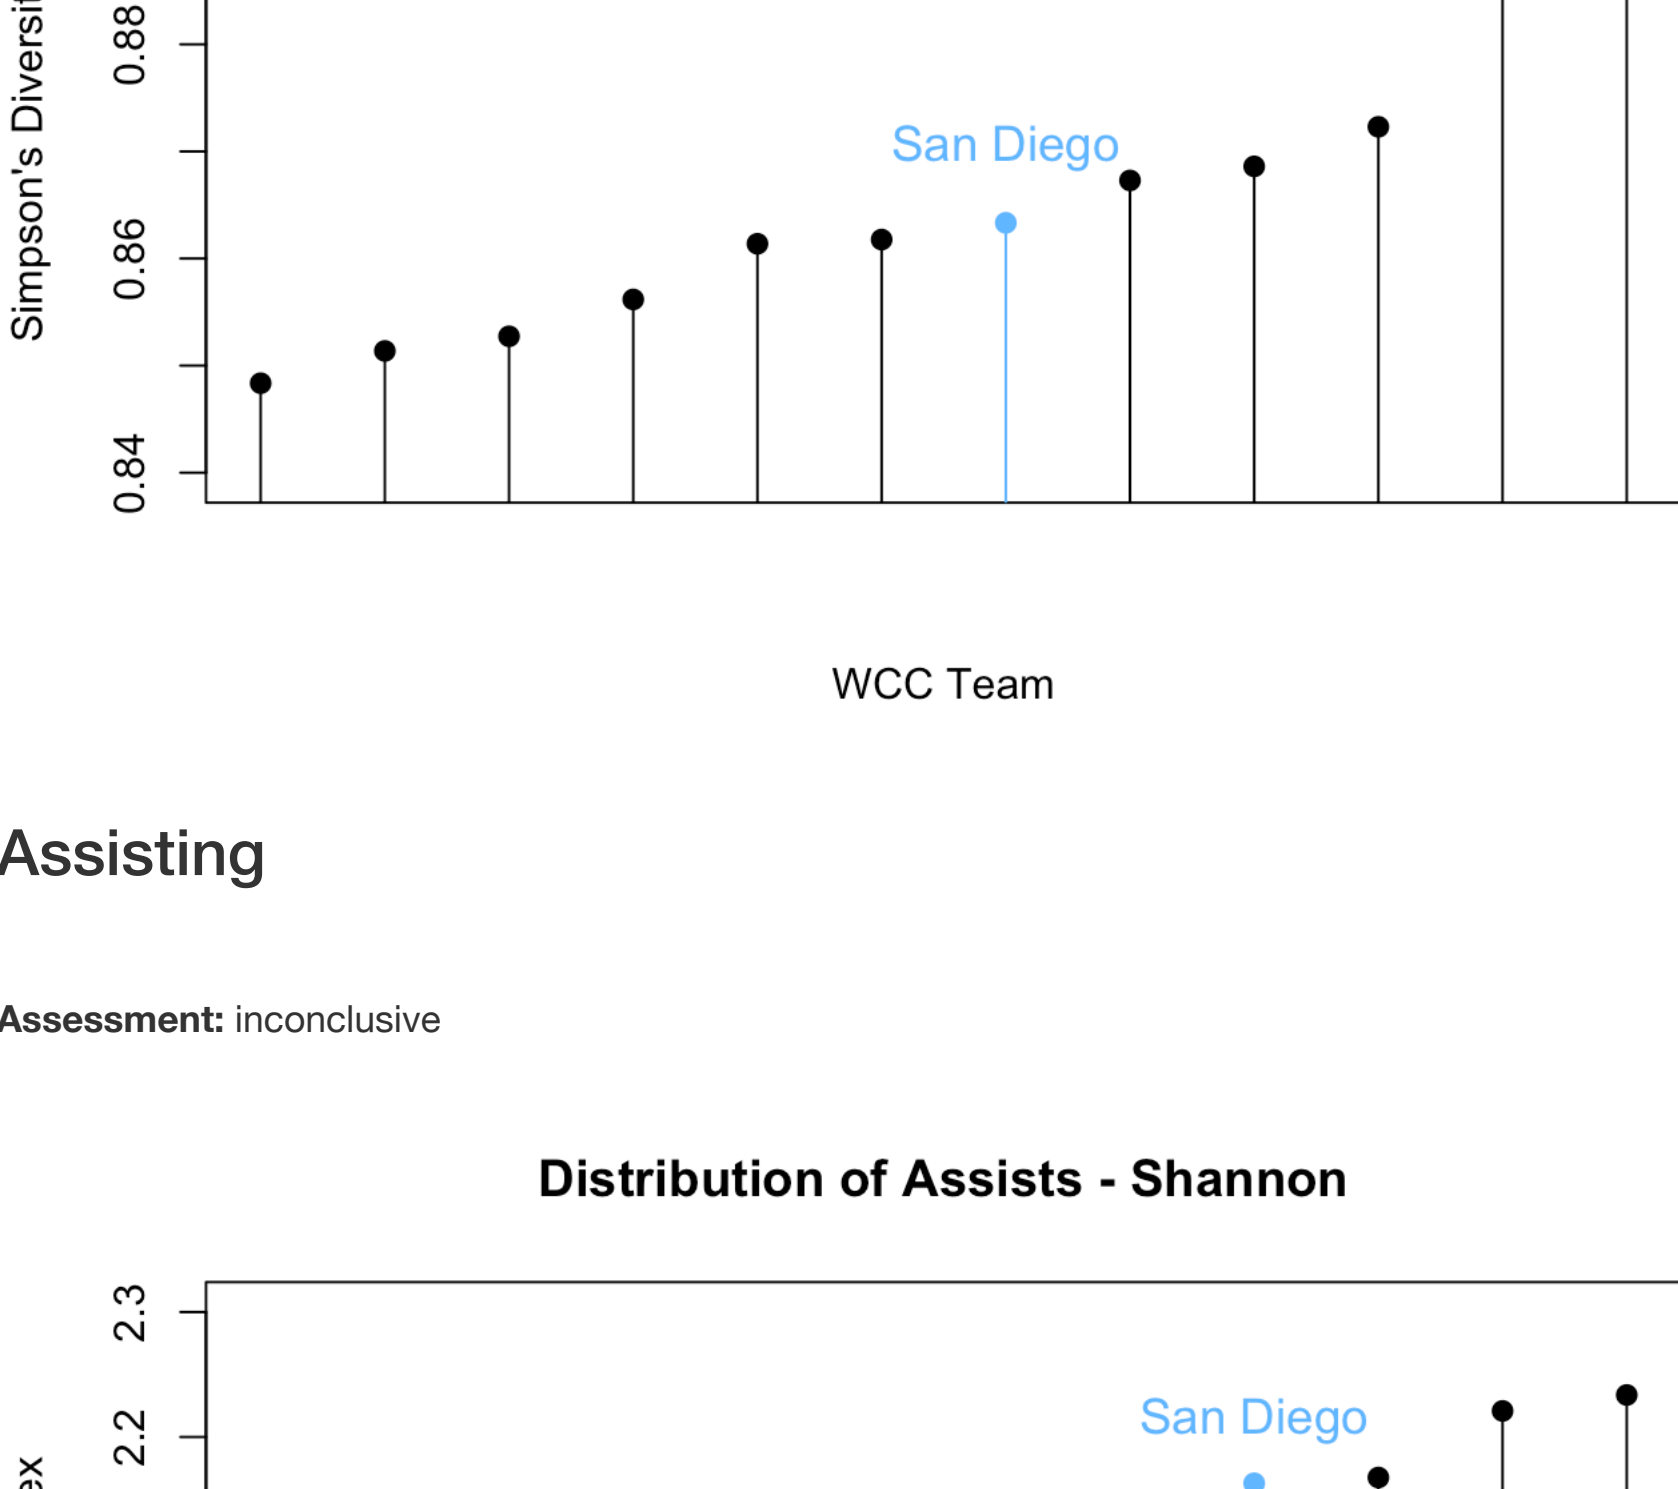

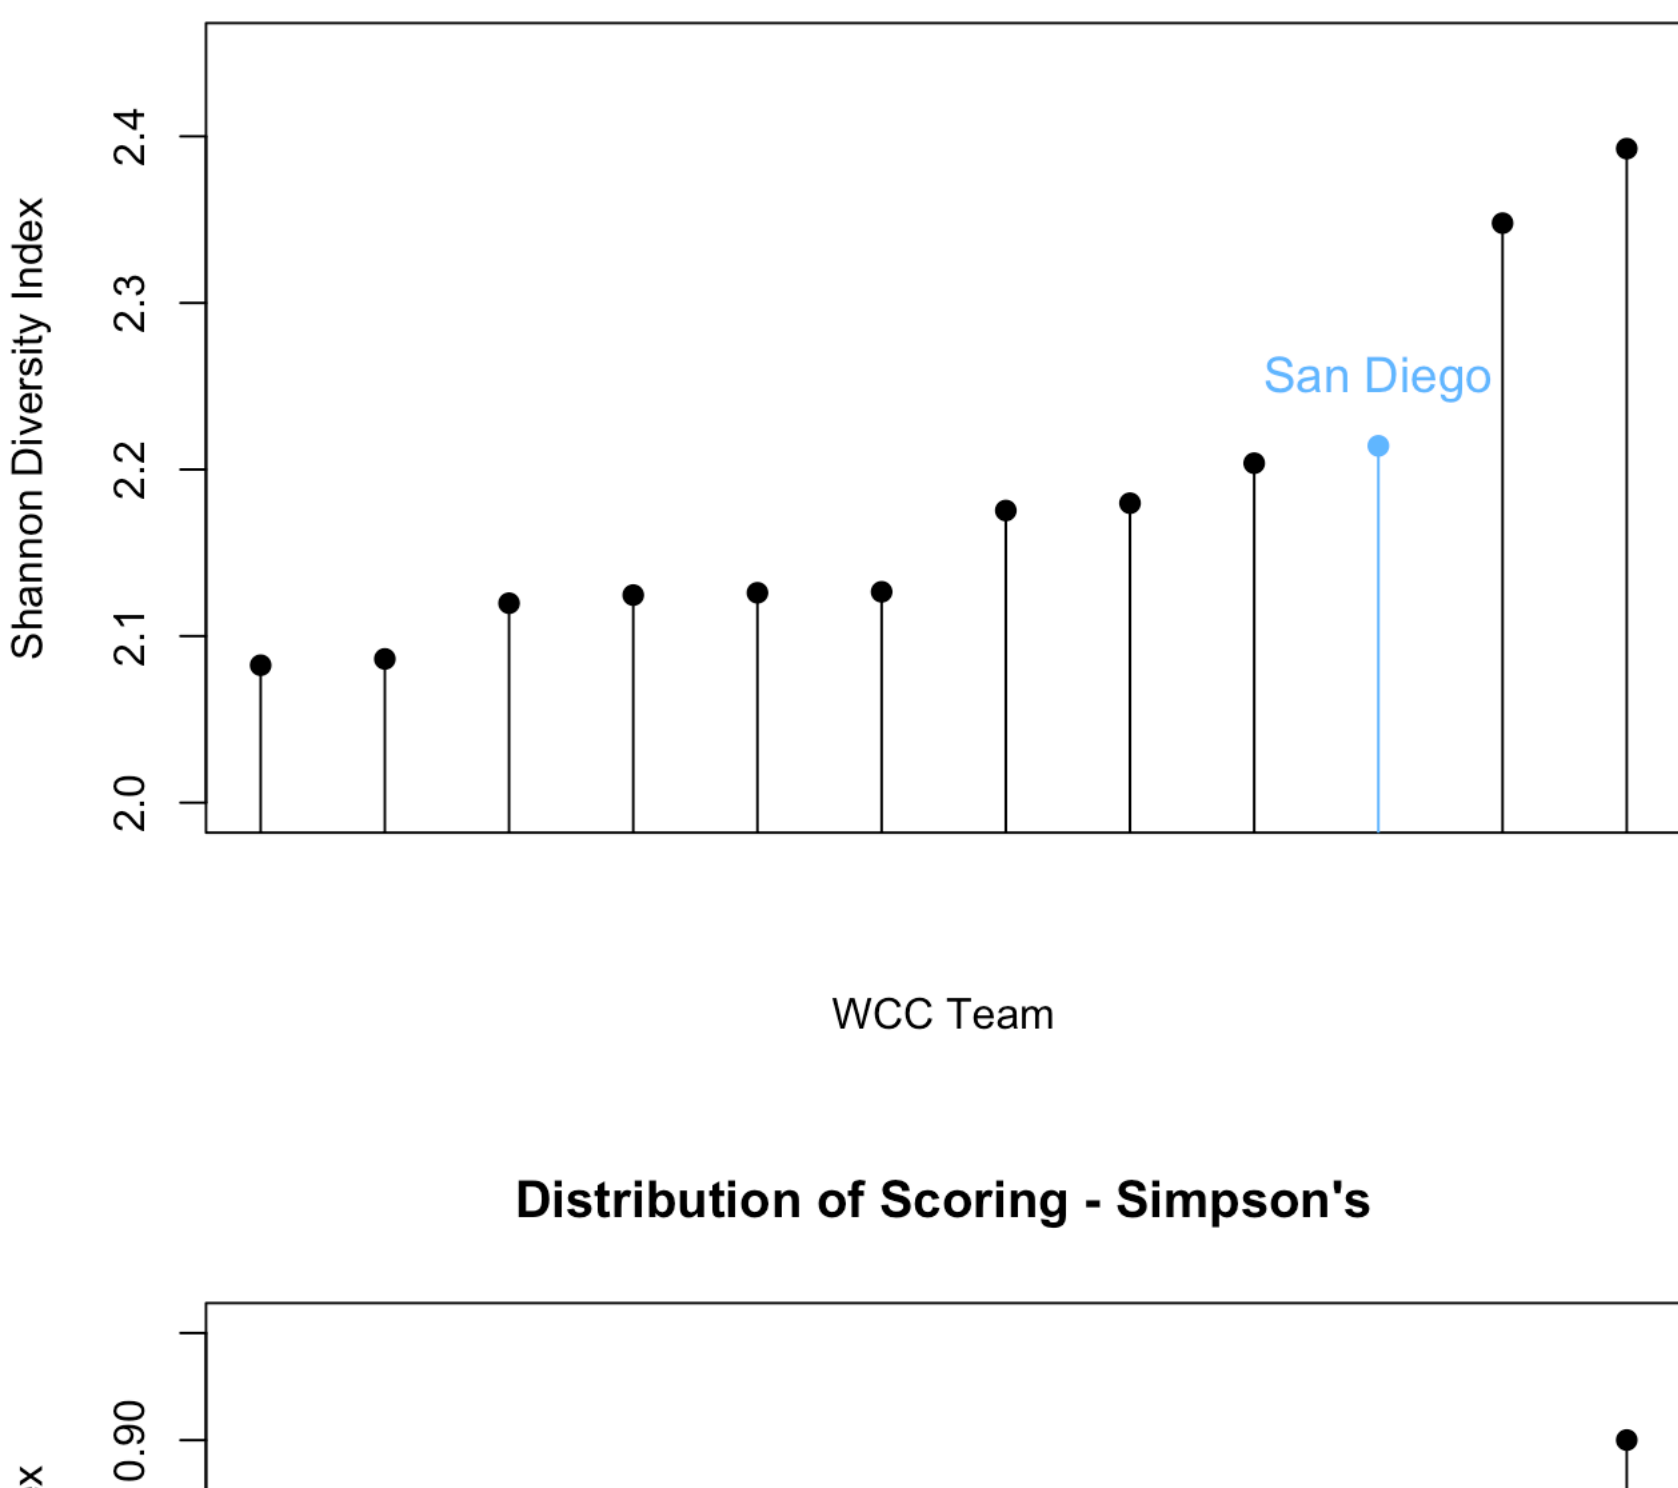

Weaknesses: unspectacular

Workload Distribution

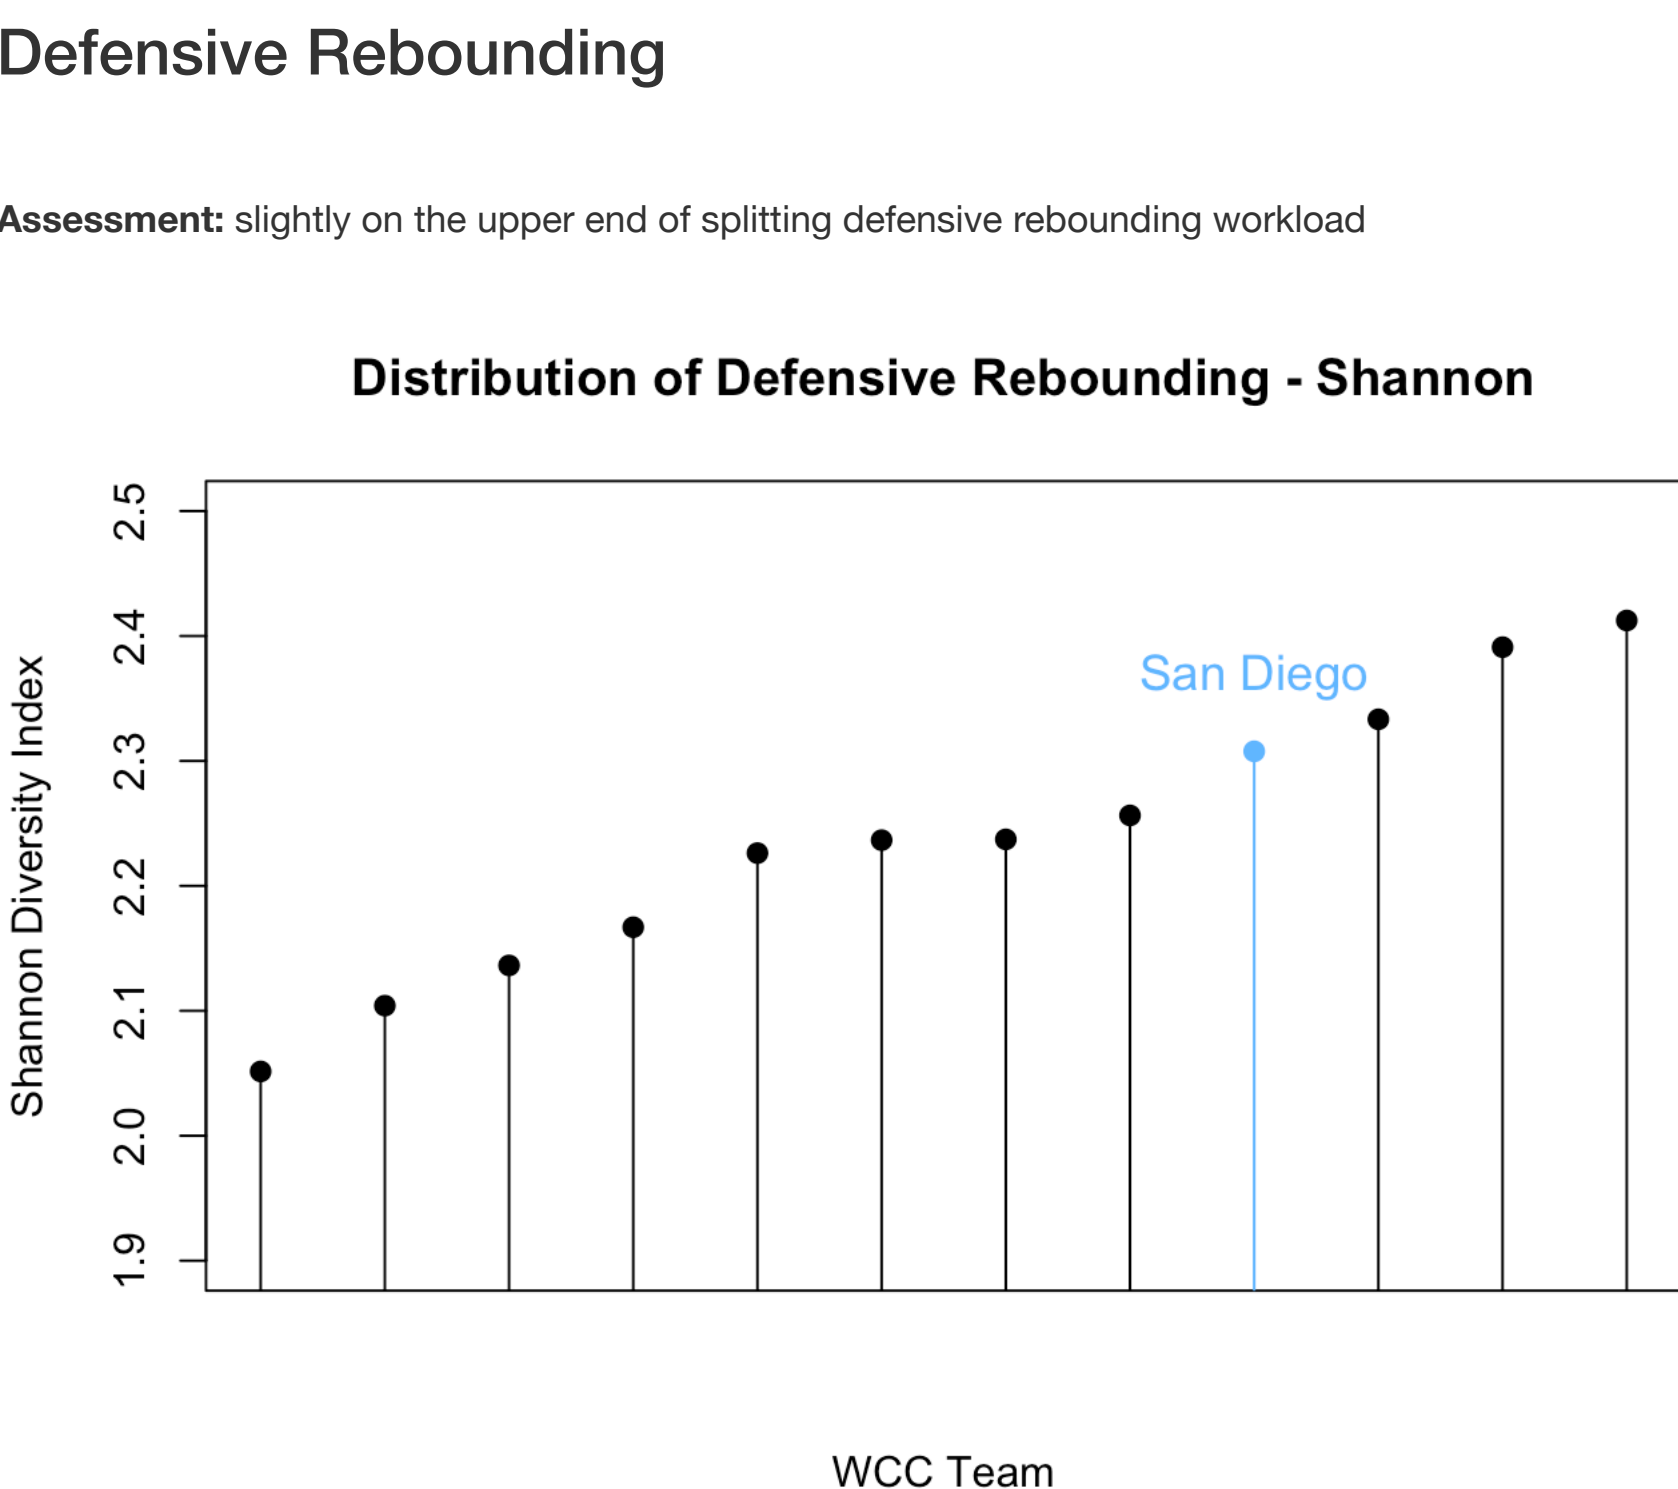

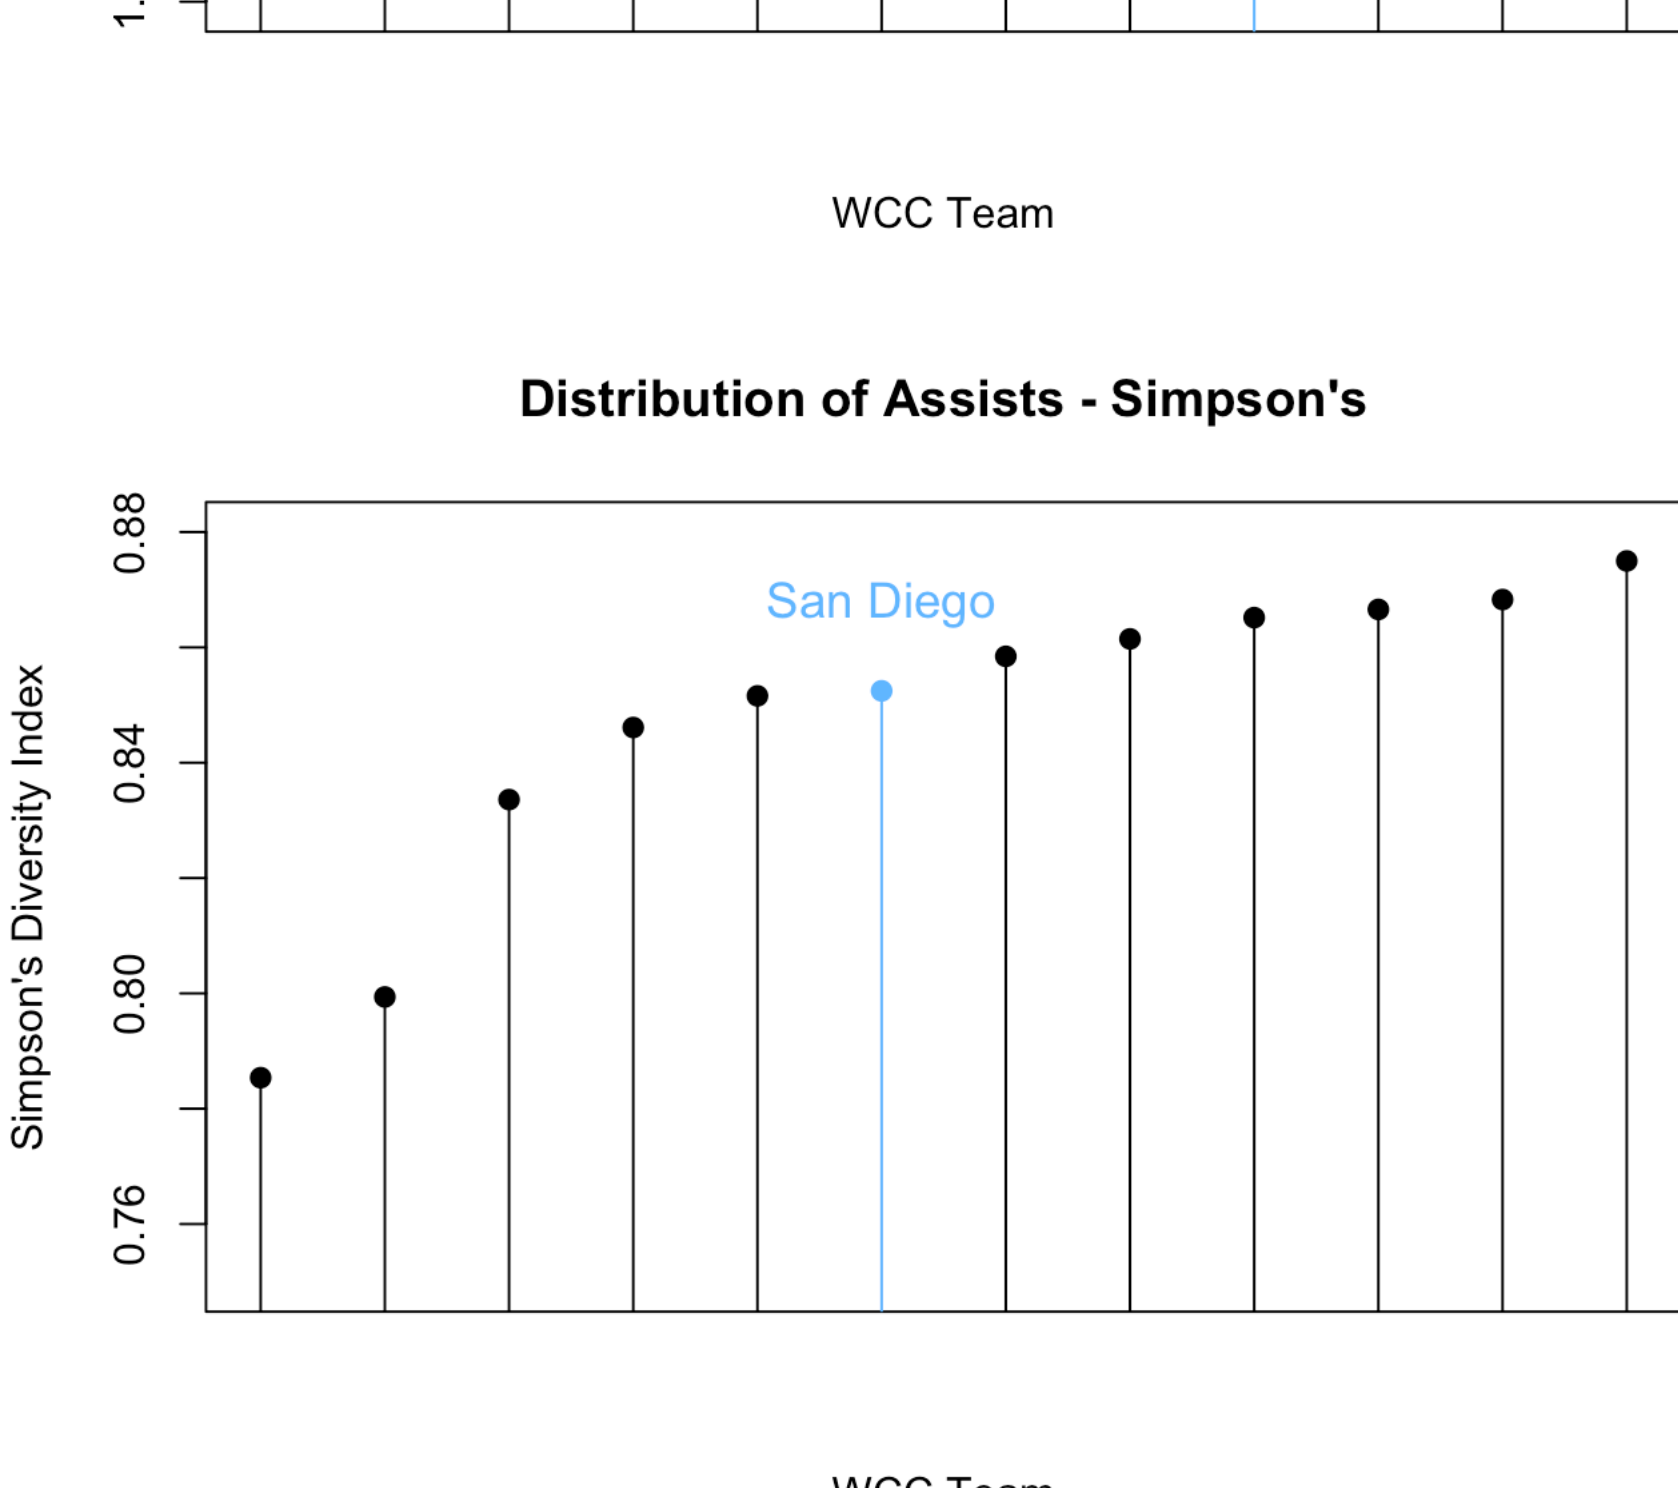

Scoring

Assessment: inconclusive

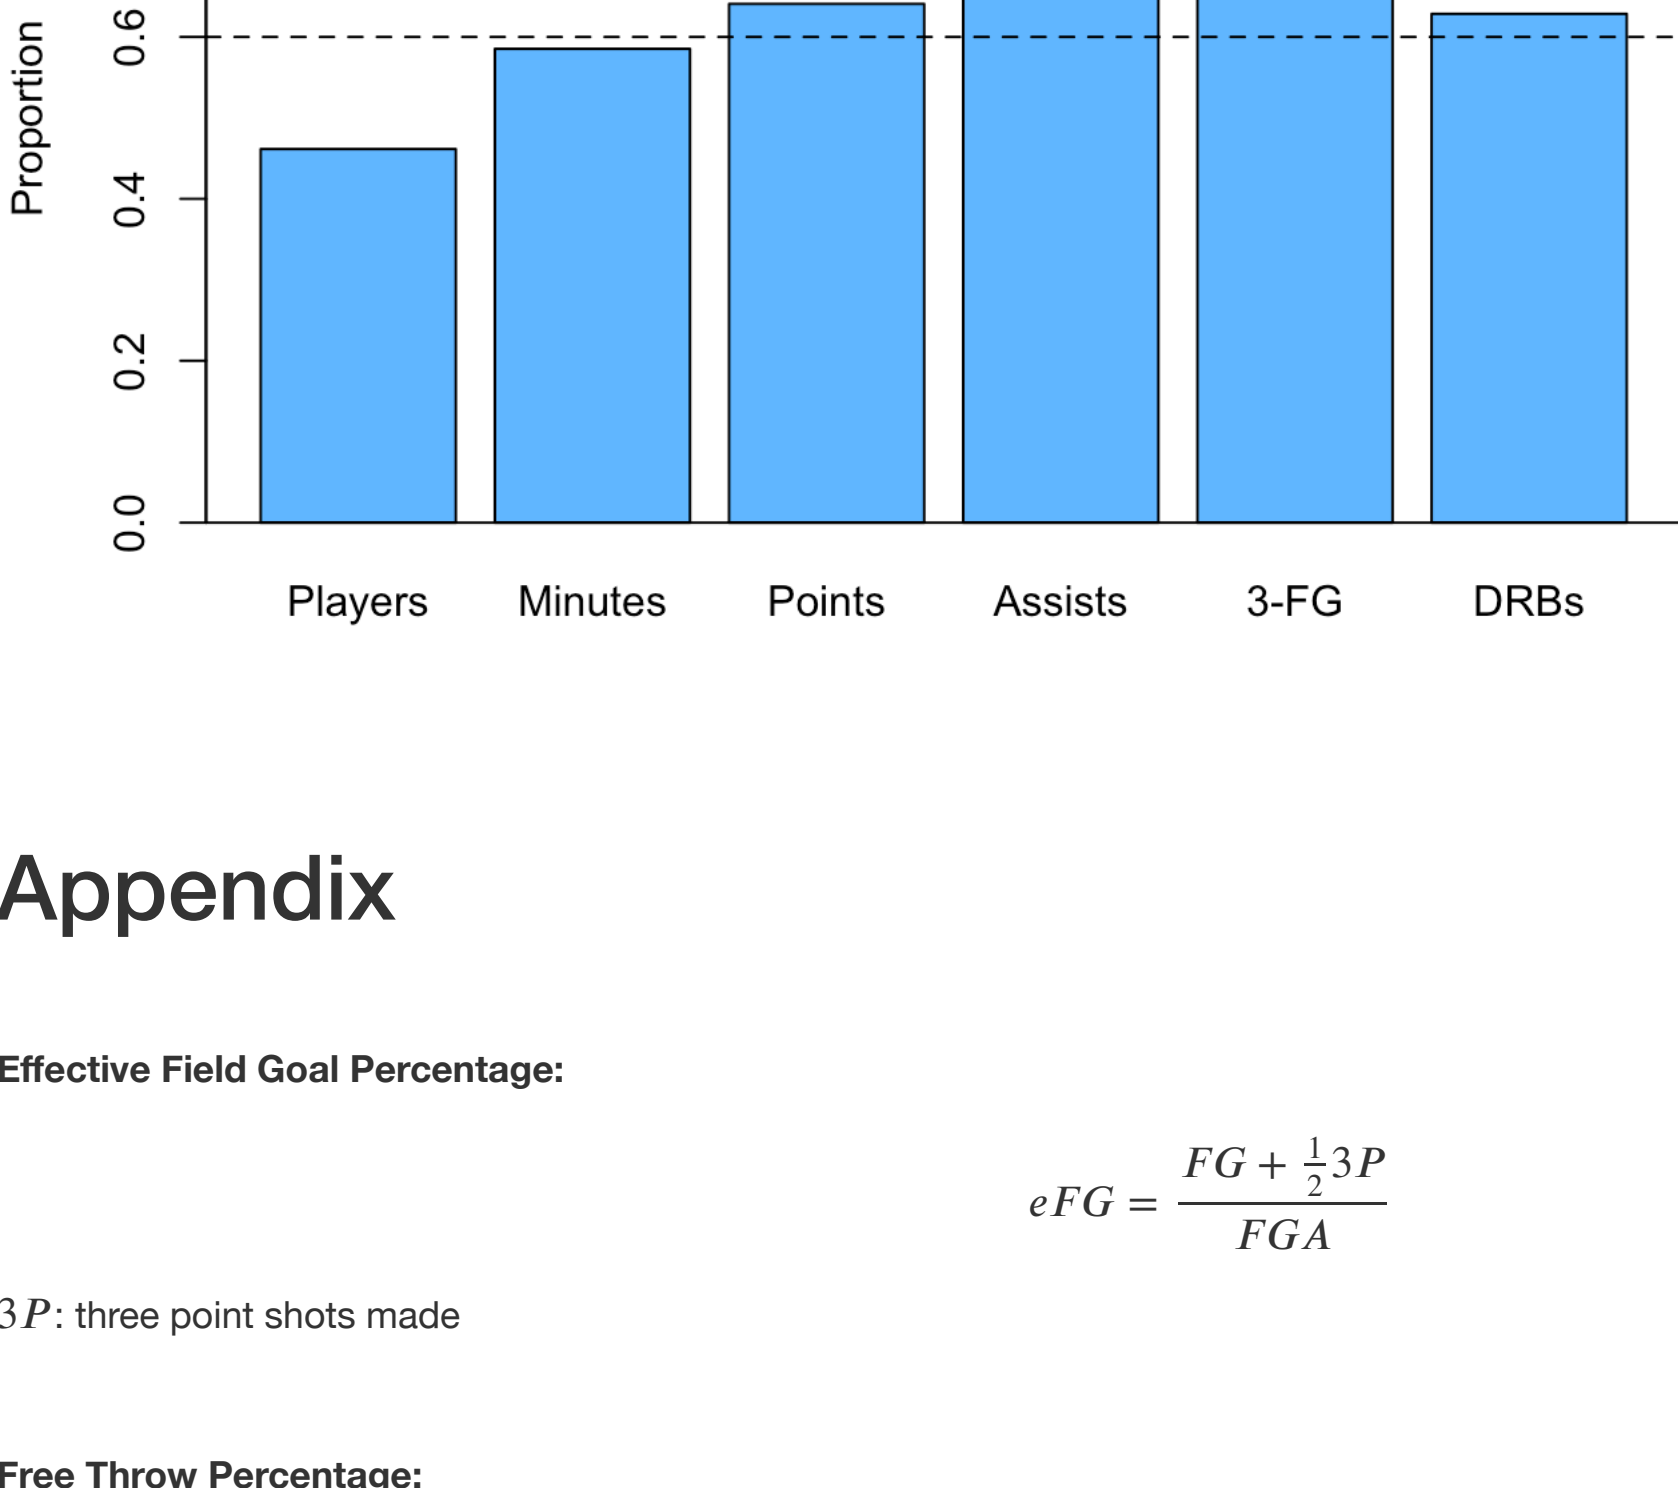

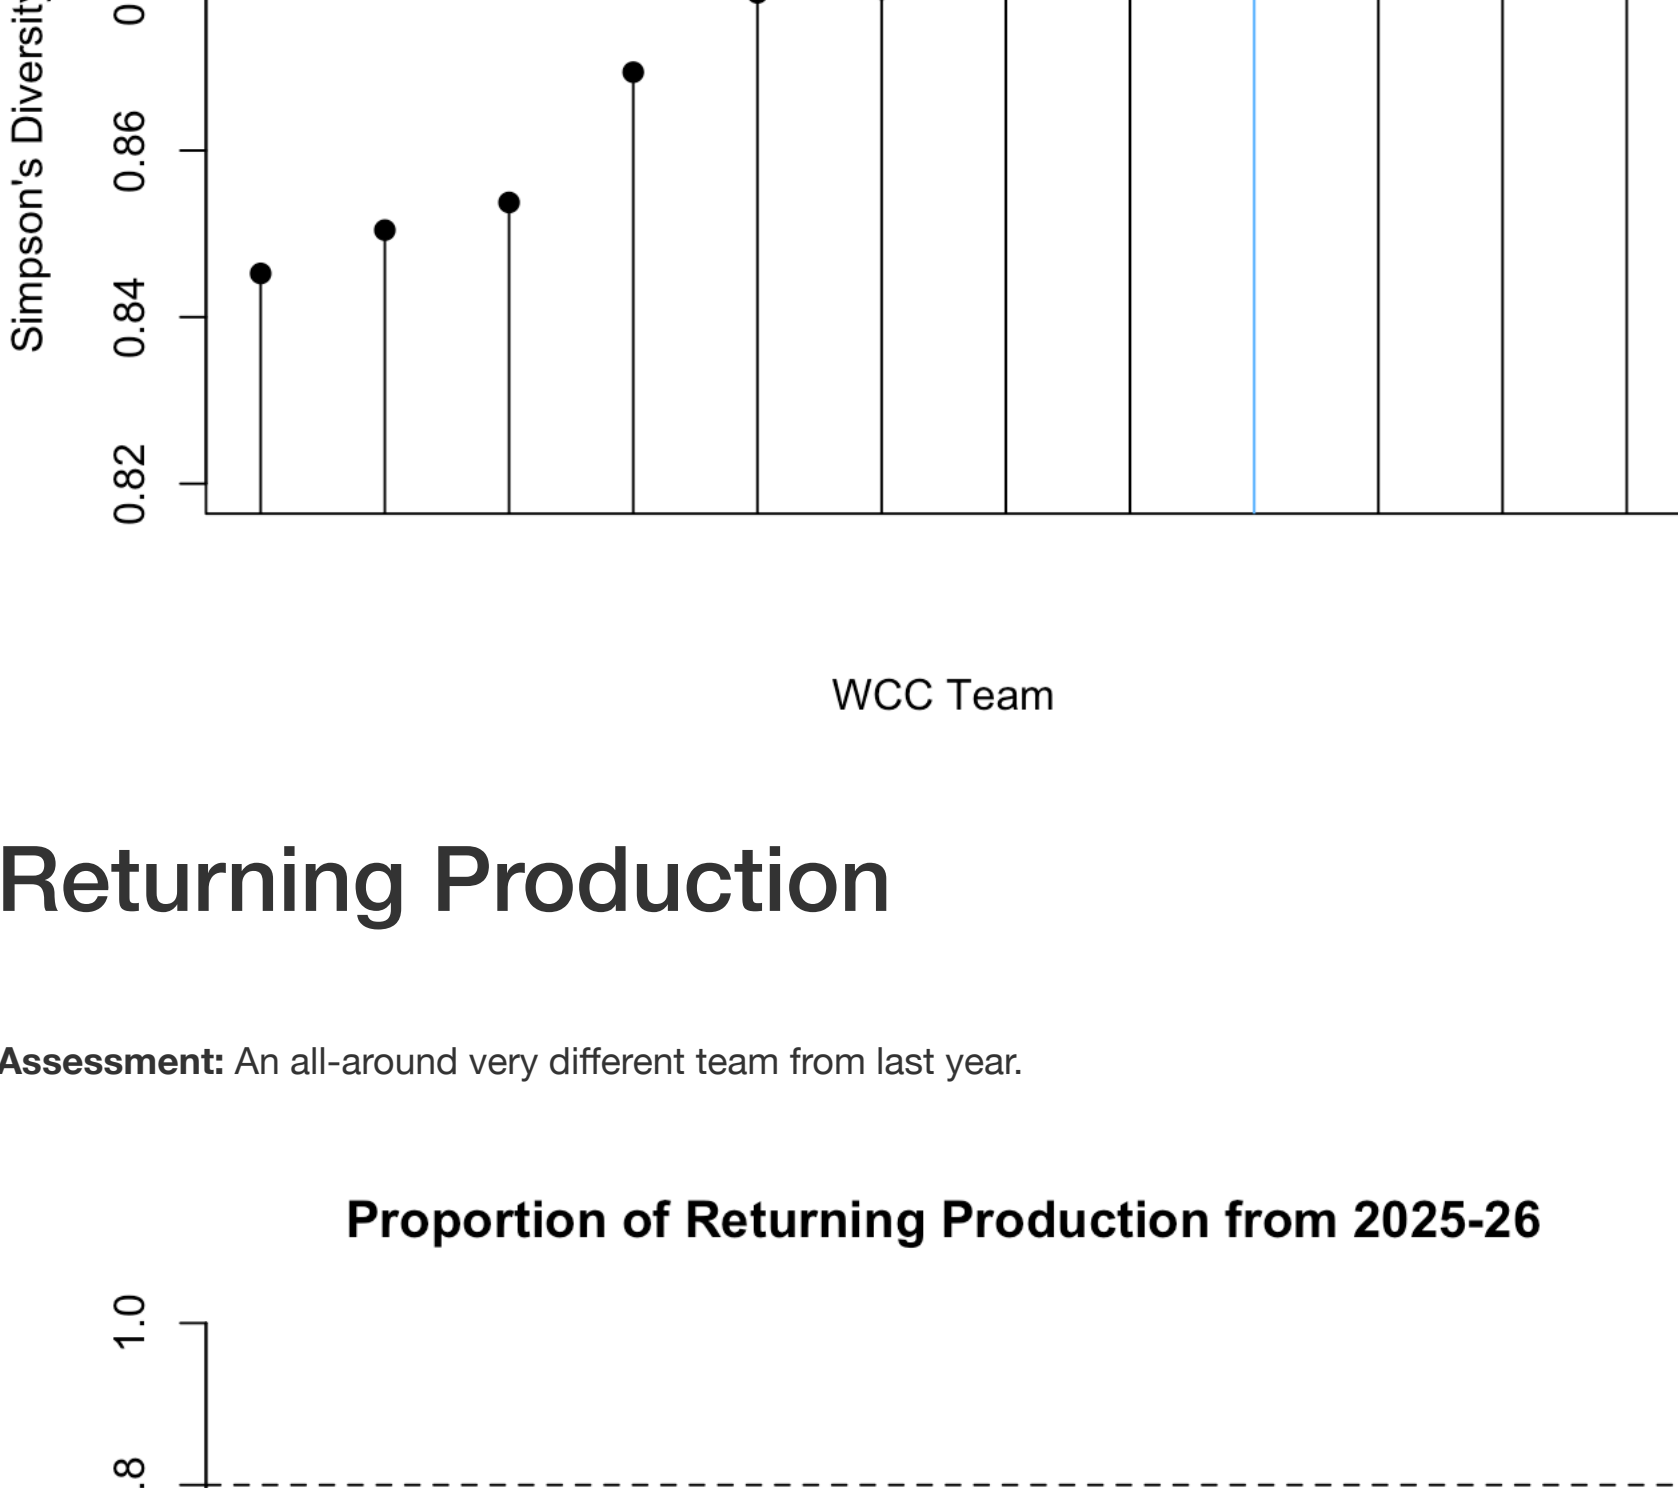

Assisting

Assessment: inconclusive

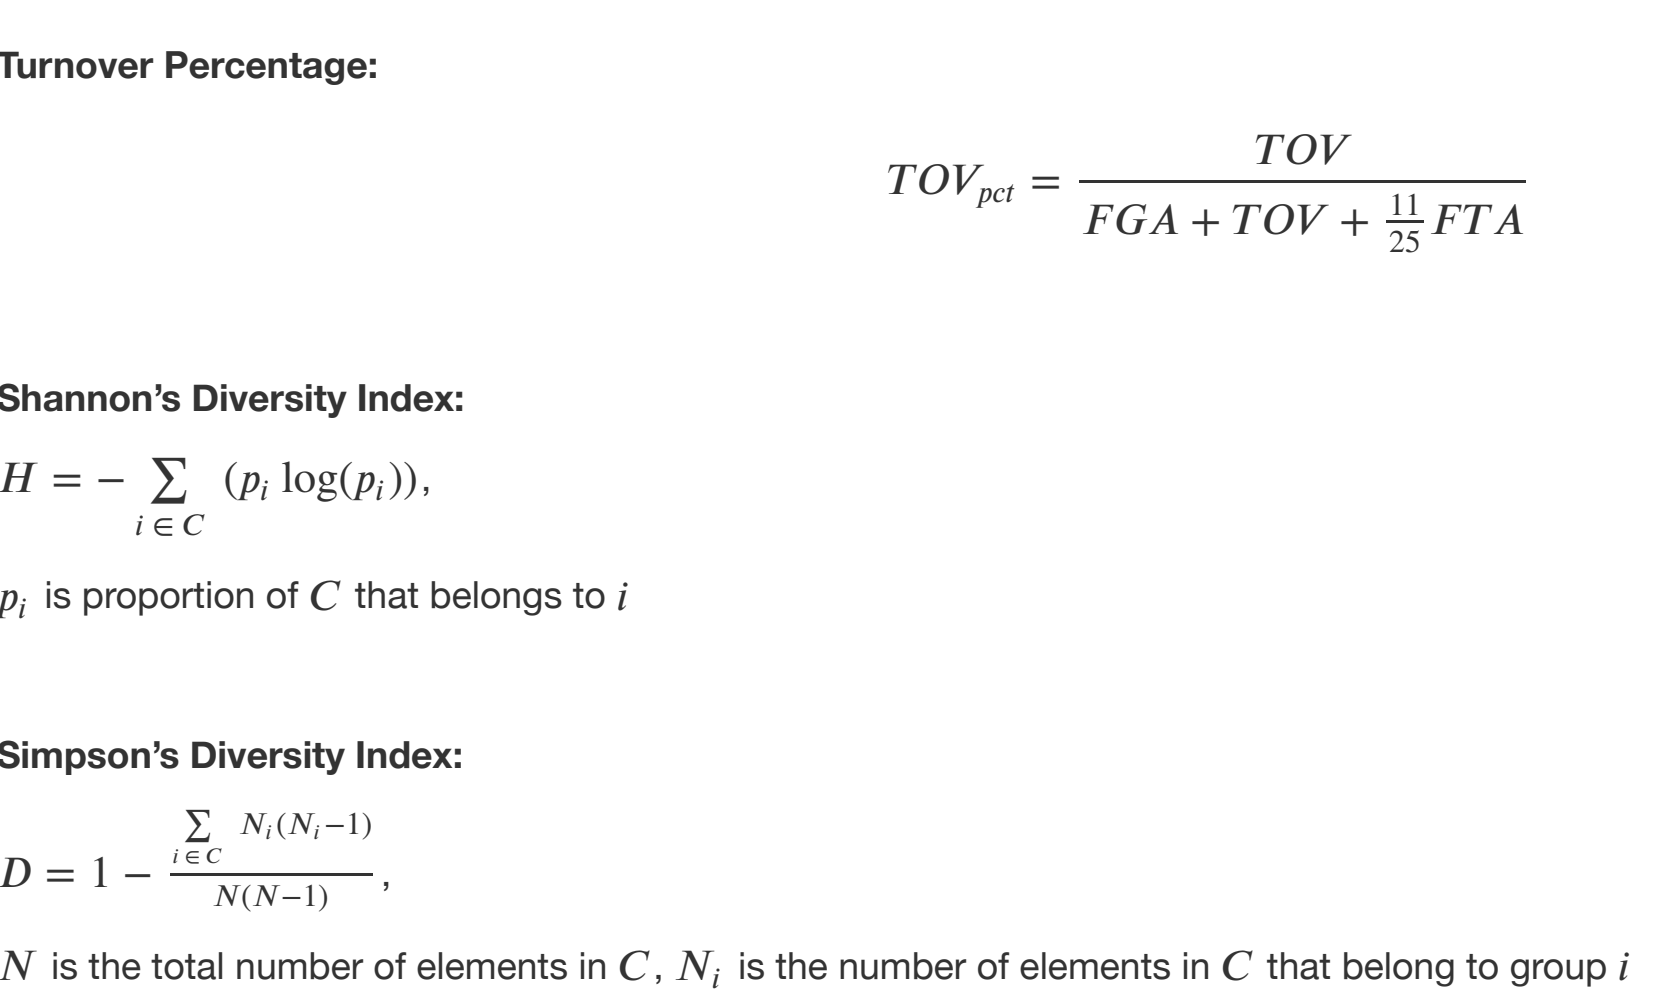

Defensive Rebounding

Assessment: slightly on the upper end of splitting defensive rebounding workload

Returning Production

Assessment: An all-around very different team from last year.

Appendix

Effective Field Goal Percentage:

$$eFG = \frac{FG + \frac{1}{3}P}{FGA}$$

3P: three point shots made

Free Throw Percentage:

$$FTR = \frac{FTA}{FGA}$$

Rebounding Percentage:

$$RB_{pst} = \frac{ORB}{ORB + Opp\ DRB}$$

flip ORB, DRB for defensive rebounding metric

Turnover Percentage:

$$TOV_{pst} = \frac{TOV}{FGA + TOV + \frac{11}{25}FTA}$$

Shannon's Diversity Index:

$$H = - \sum_{i \in C} (p_i \log(p_i)),$$

p_i is proportion of C that belongs to i

Simpson's Diversity Index:

$$D = 1 - \frac{\sum_{i \in C} N_i(N_i - 1)}{N(N - 1)},$$

N is the total number of elements in C , N_i is the number of elements in C that belong to group i
