

Santa Clara University Women's Basketball Team Scouting Report

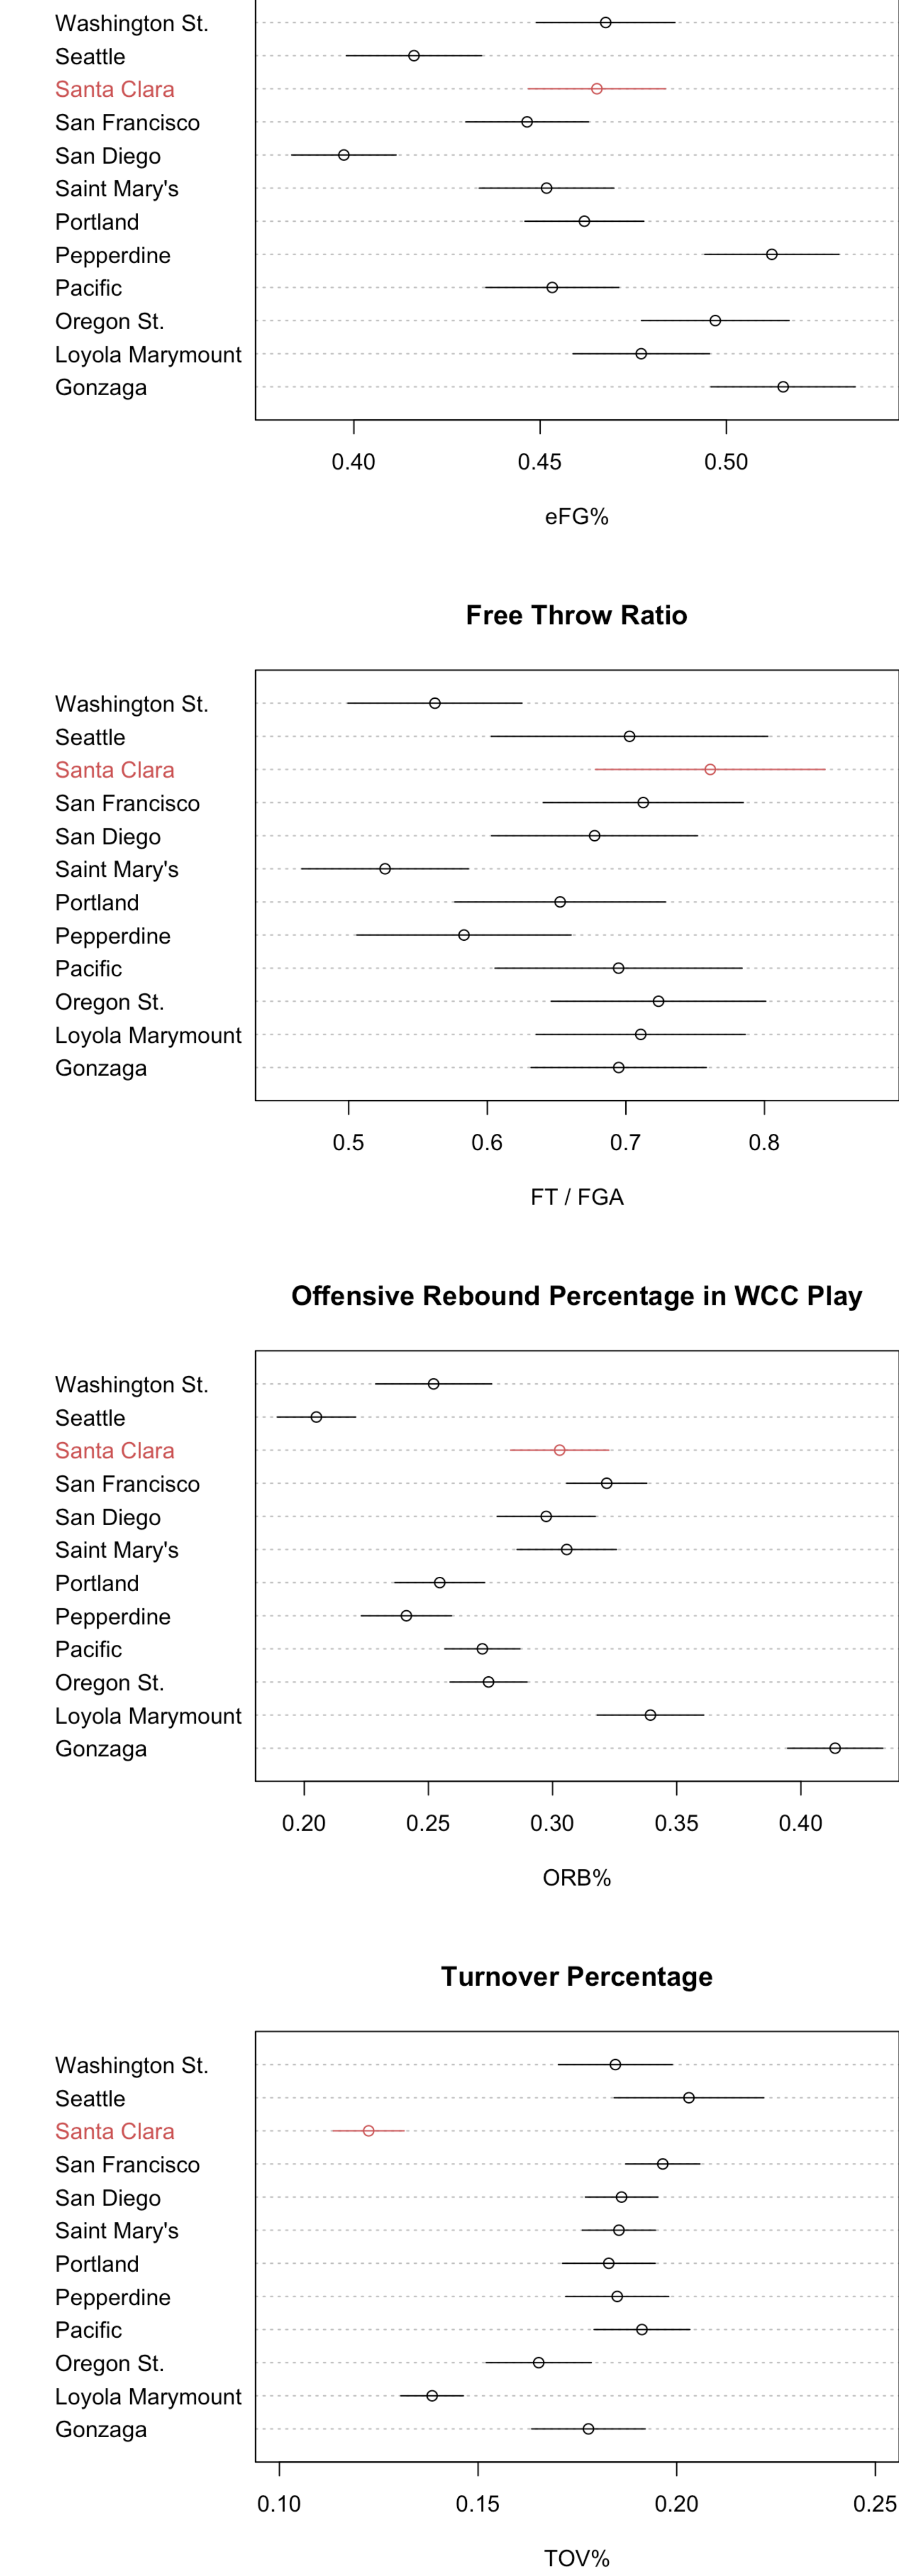

Overall Key Points

- Very disciplined on both ends of the floor
- Midlevel shooting, rebounding, O and D.
- Assisting very concentrated, nearly 40% from Ashley Hawkins

Offense

Strengths: drawing fouls; ball control, avoiding turnovers

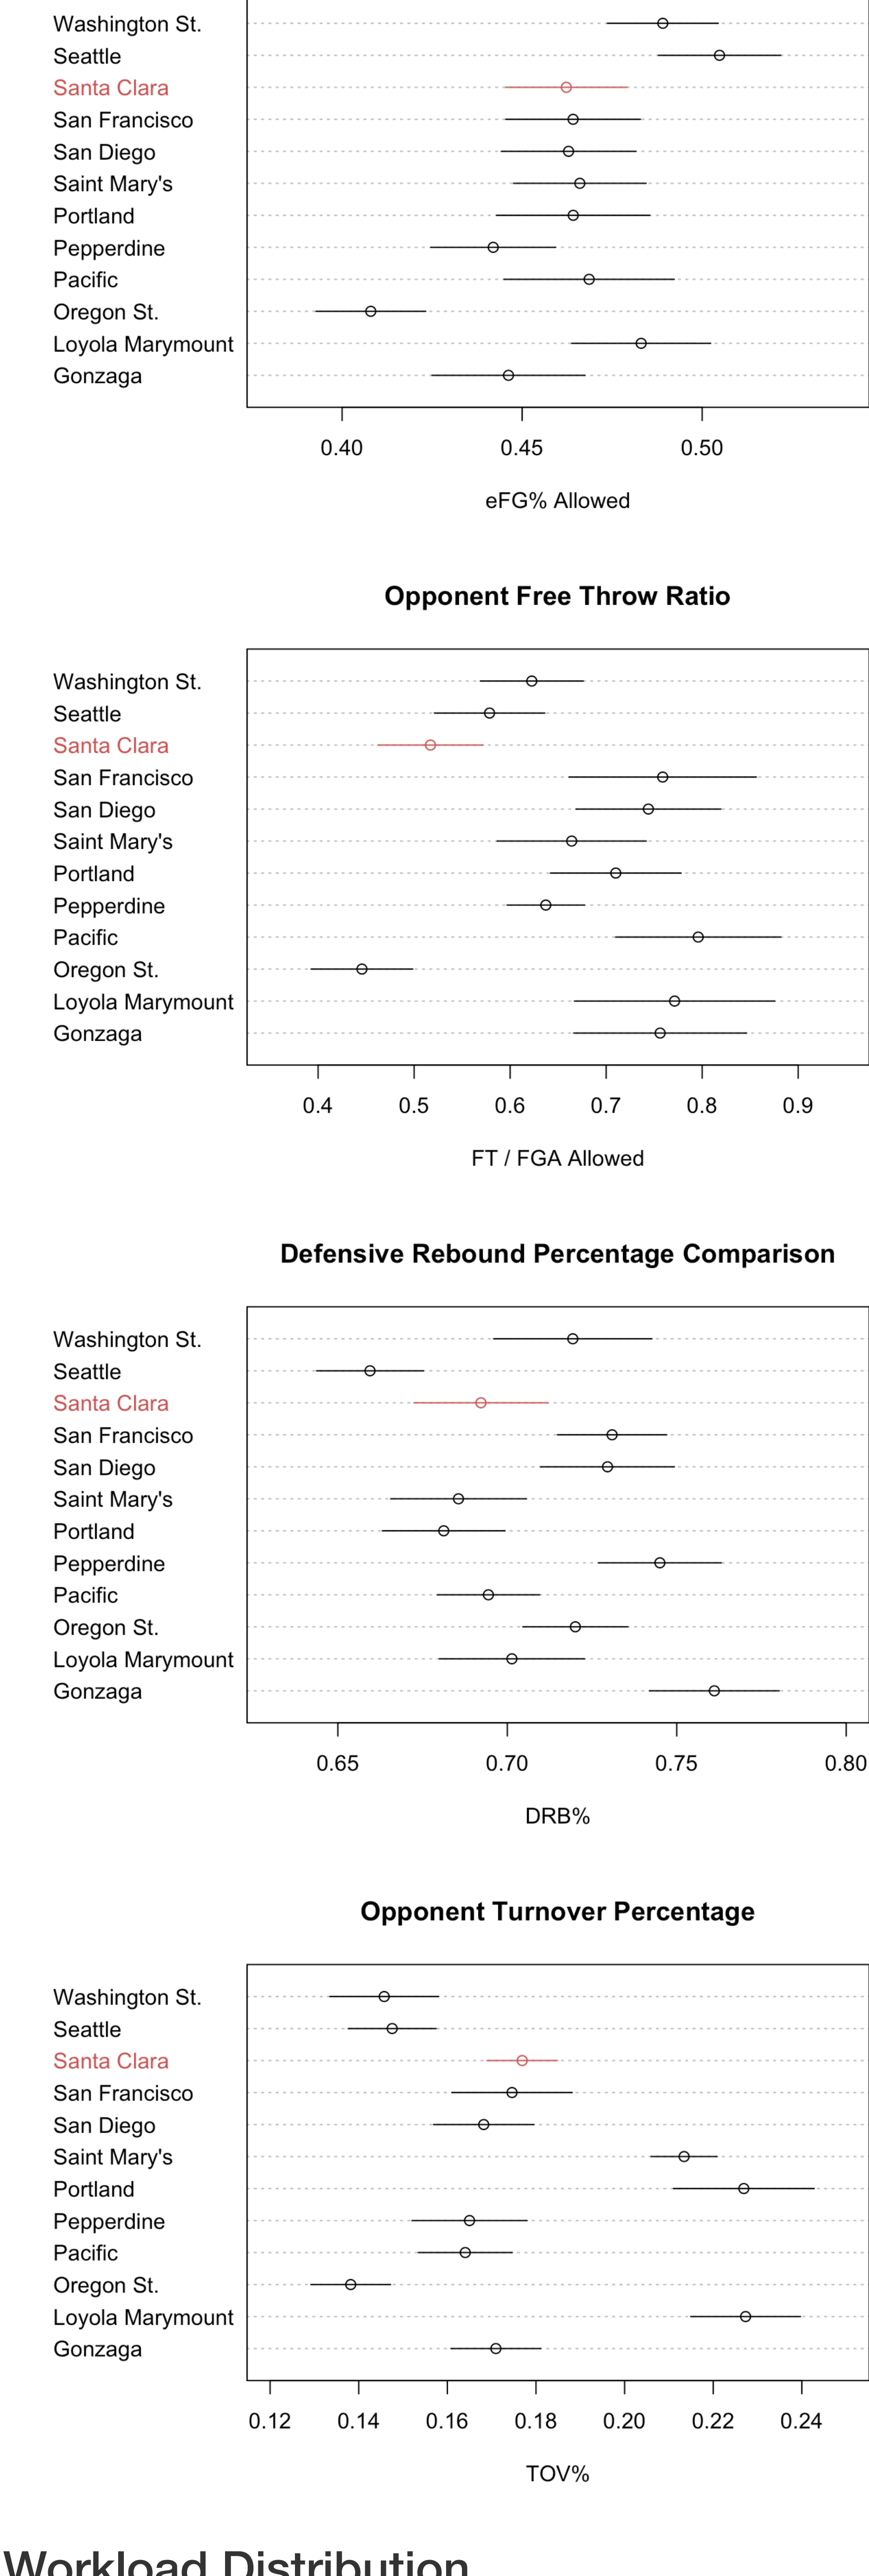

Weaknesses: Shooting, rebounding are not exceptional relative to rest of WCC

Defense

Strengths: disciplined, avoids fouls

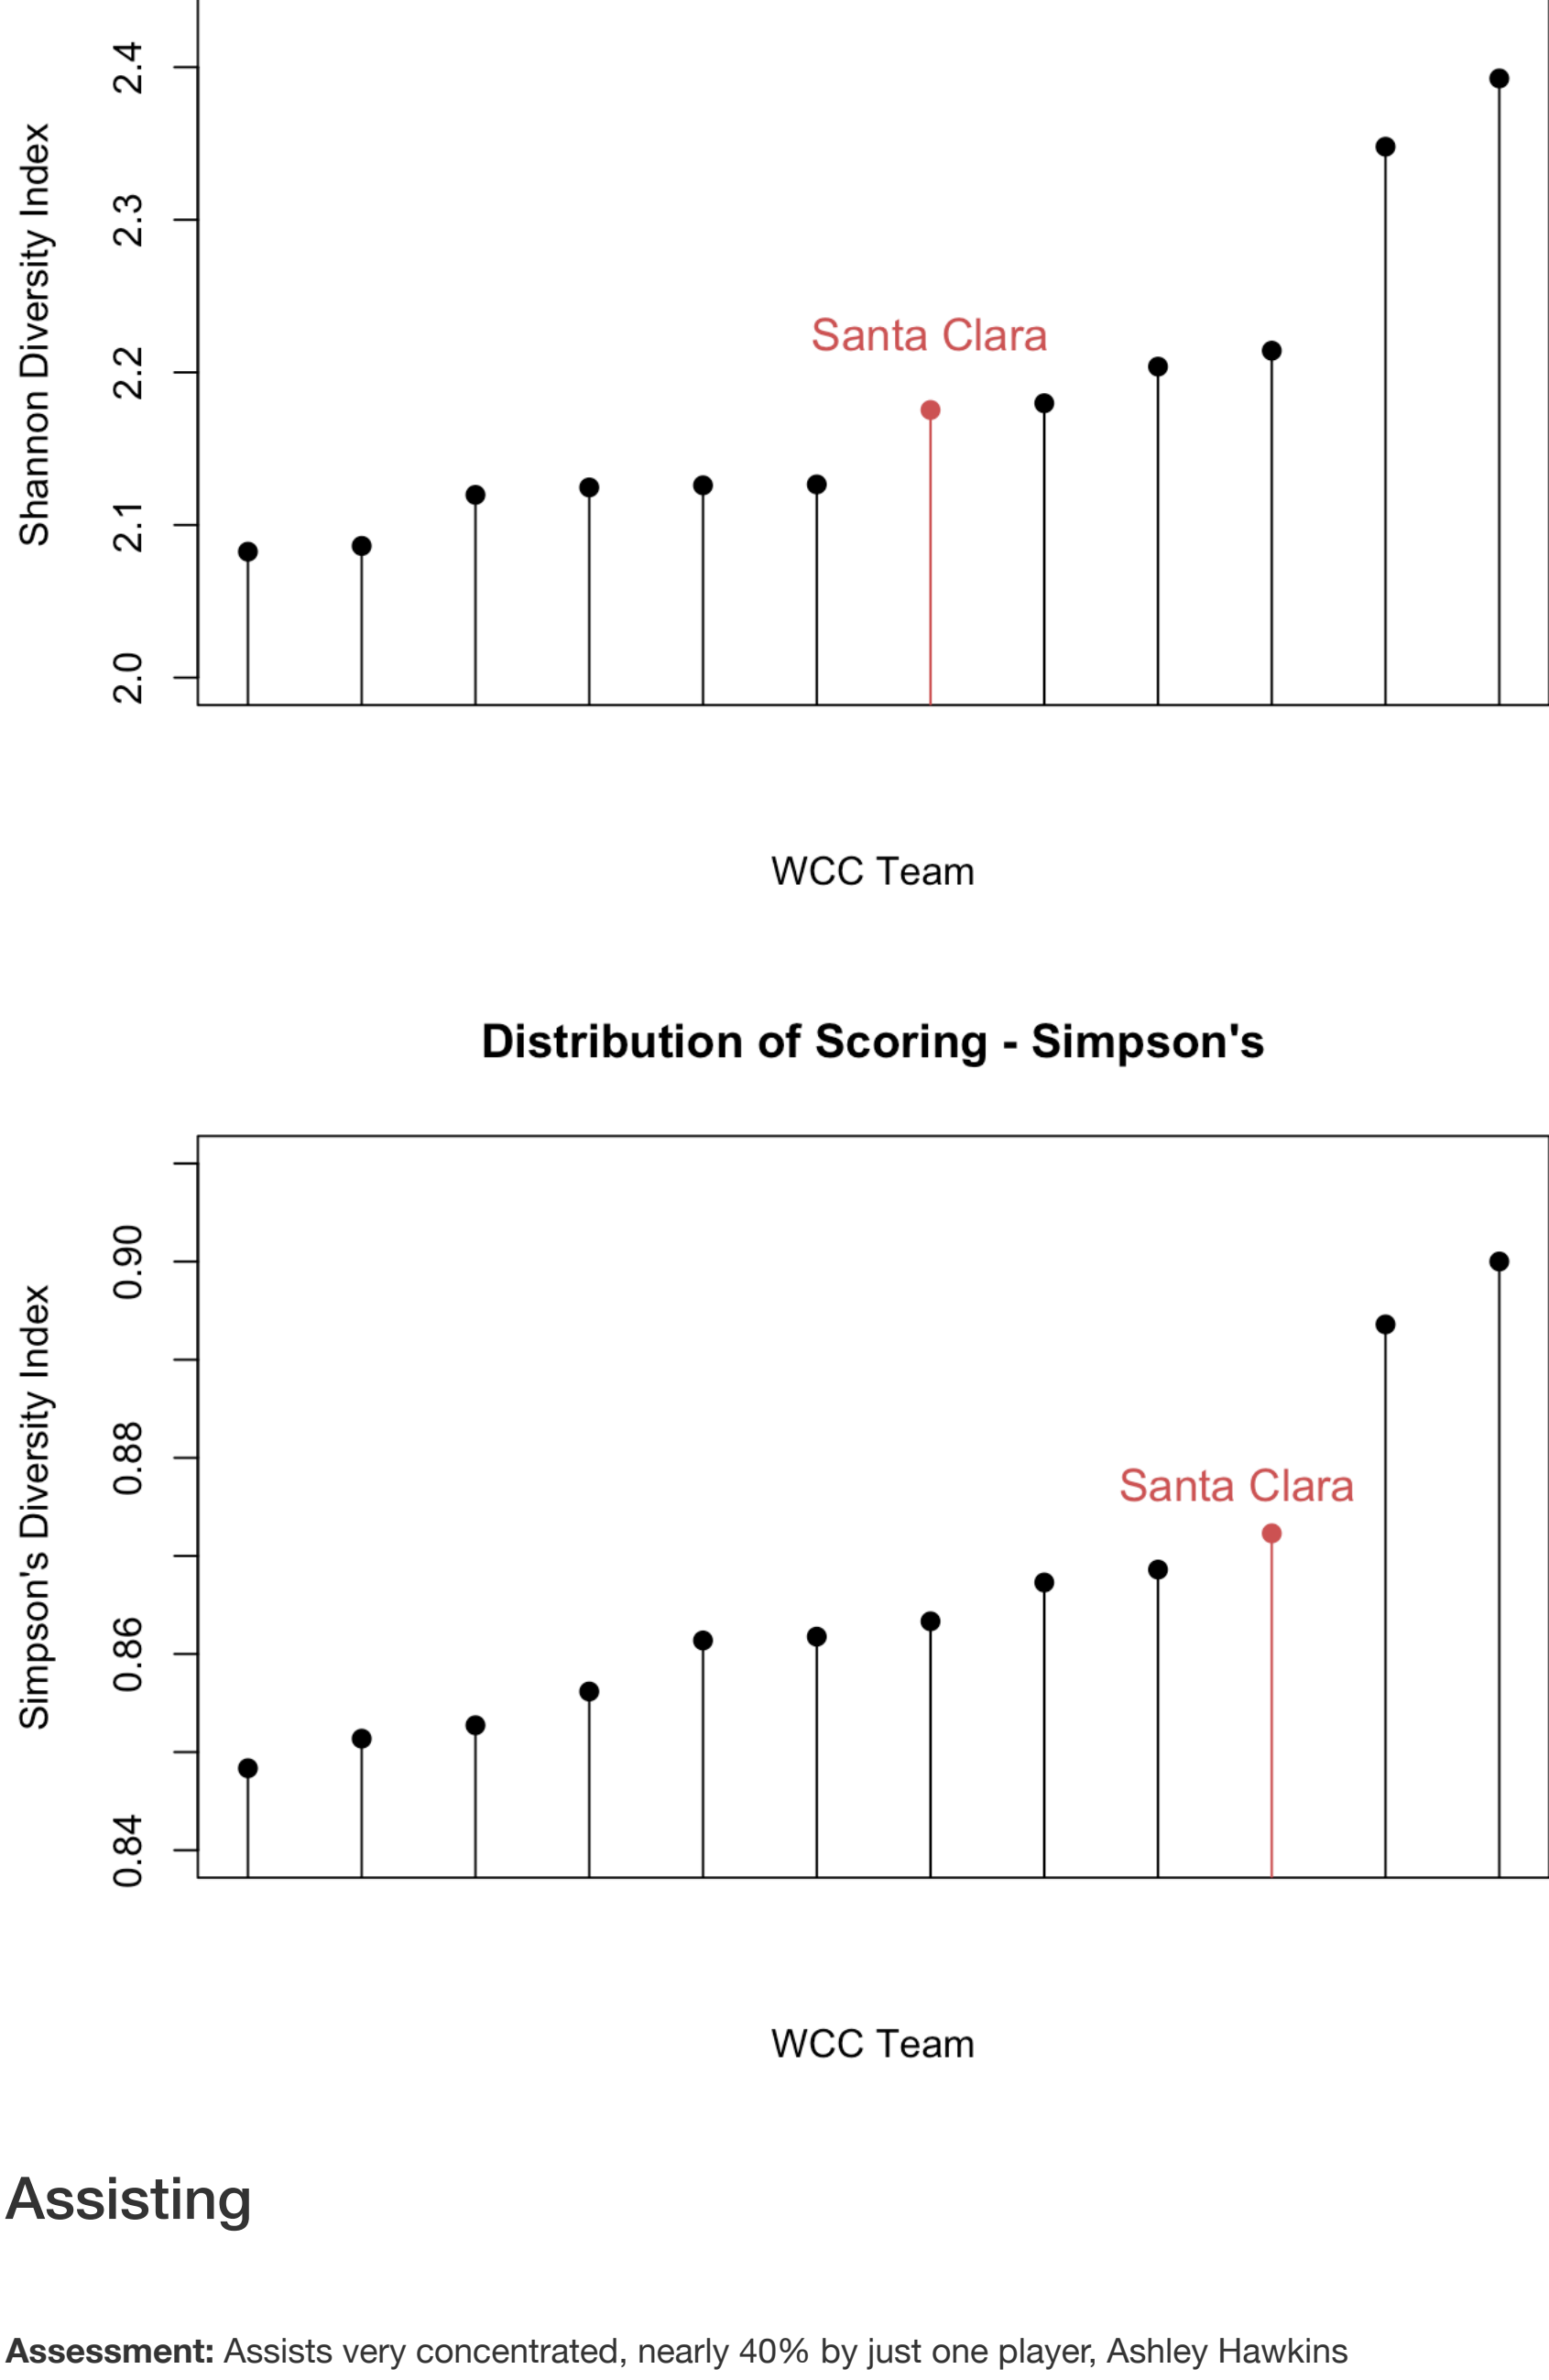

Weaknesses: allowed opponent shooting, rebounding, and turnovers are all at levels slightly below league average

Workload Distribution

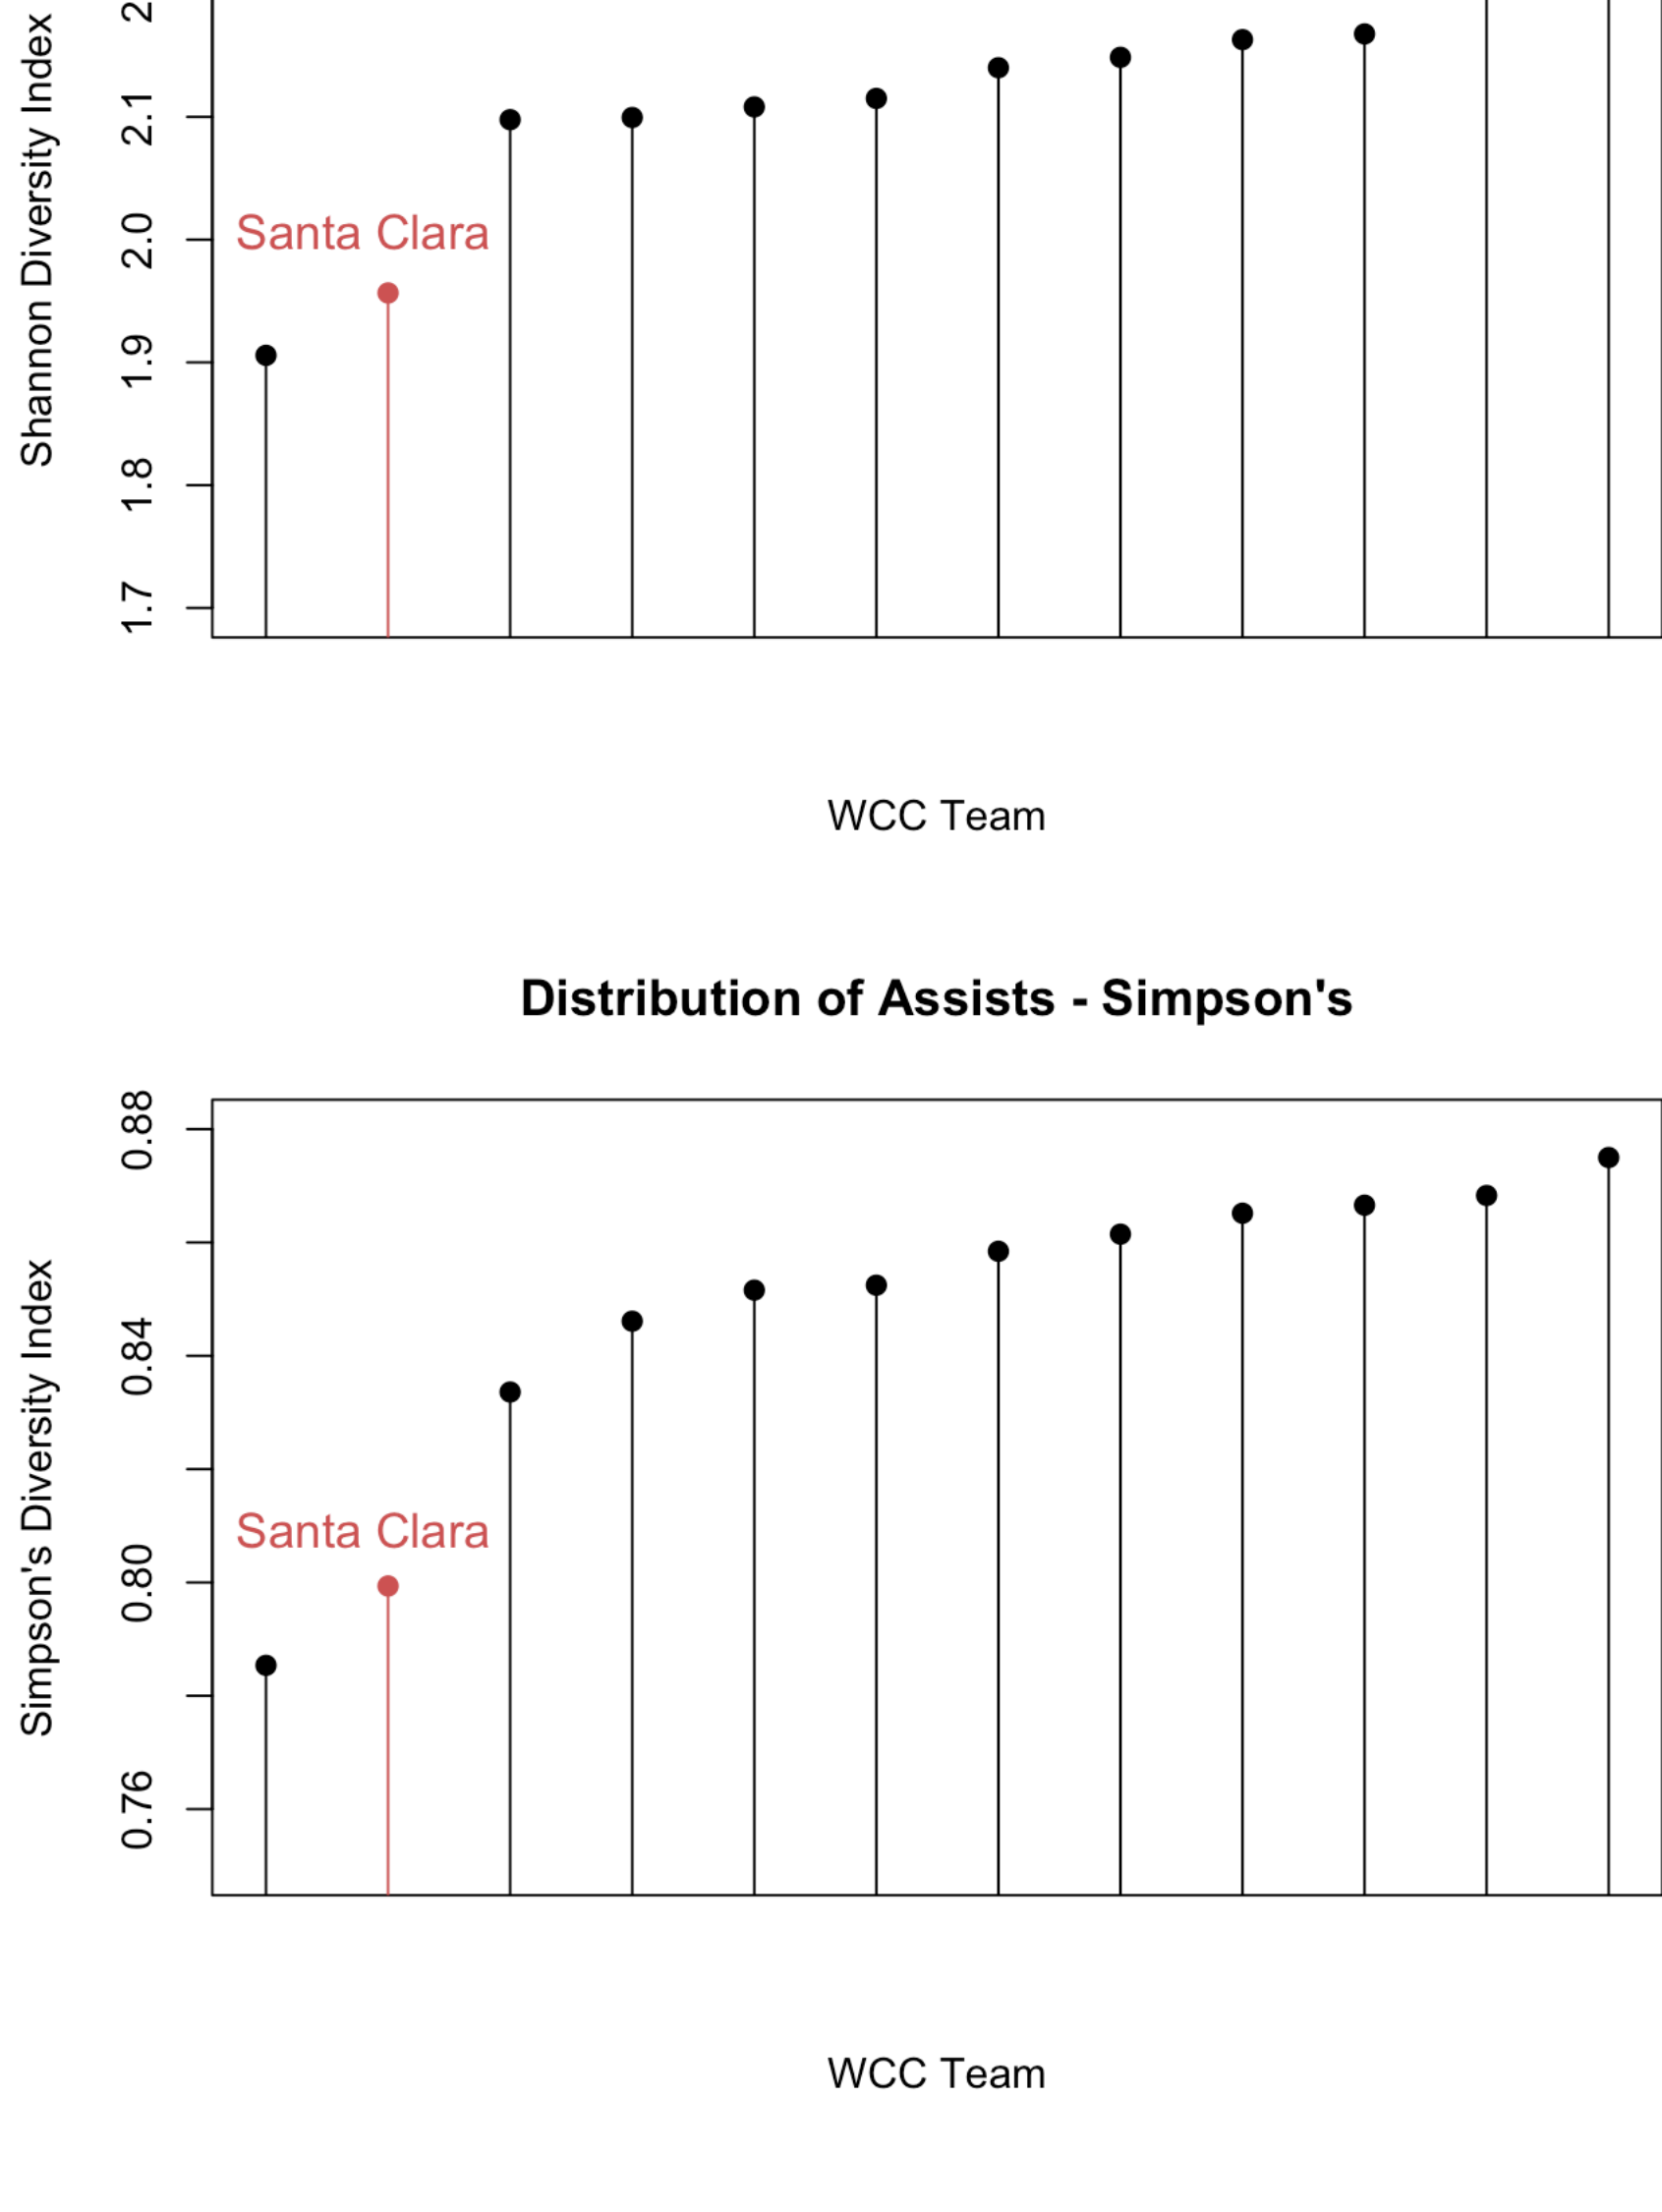

Scoring

Assessment: Inconclusive assessment of scoring diversity.

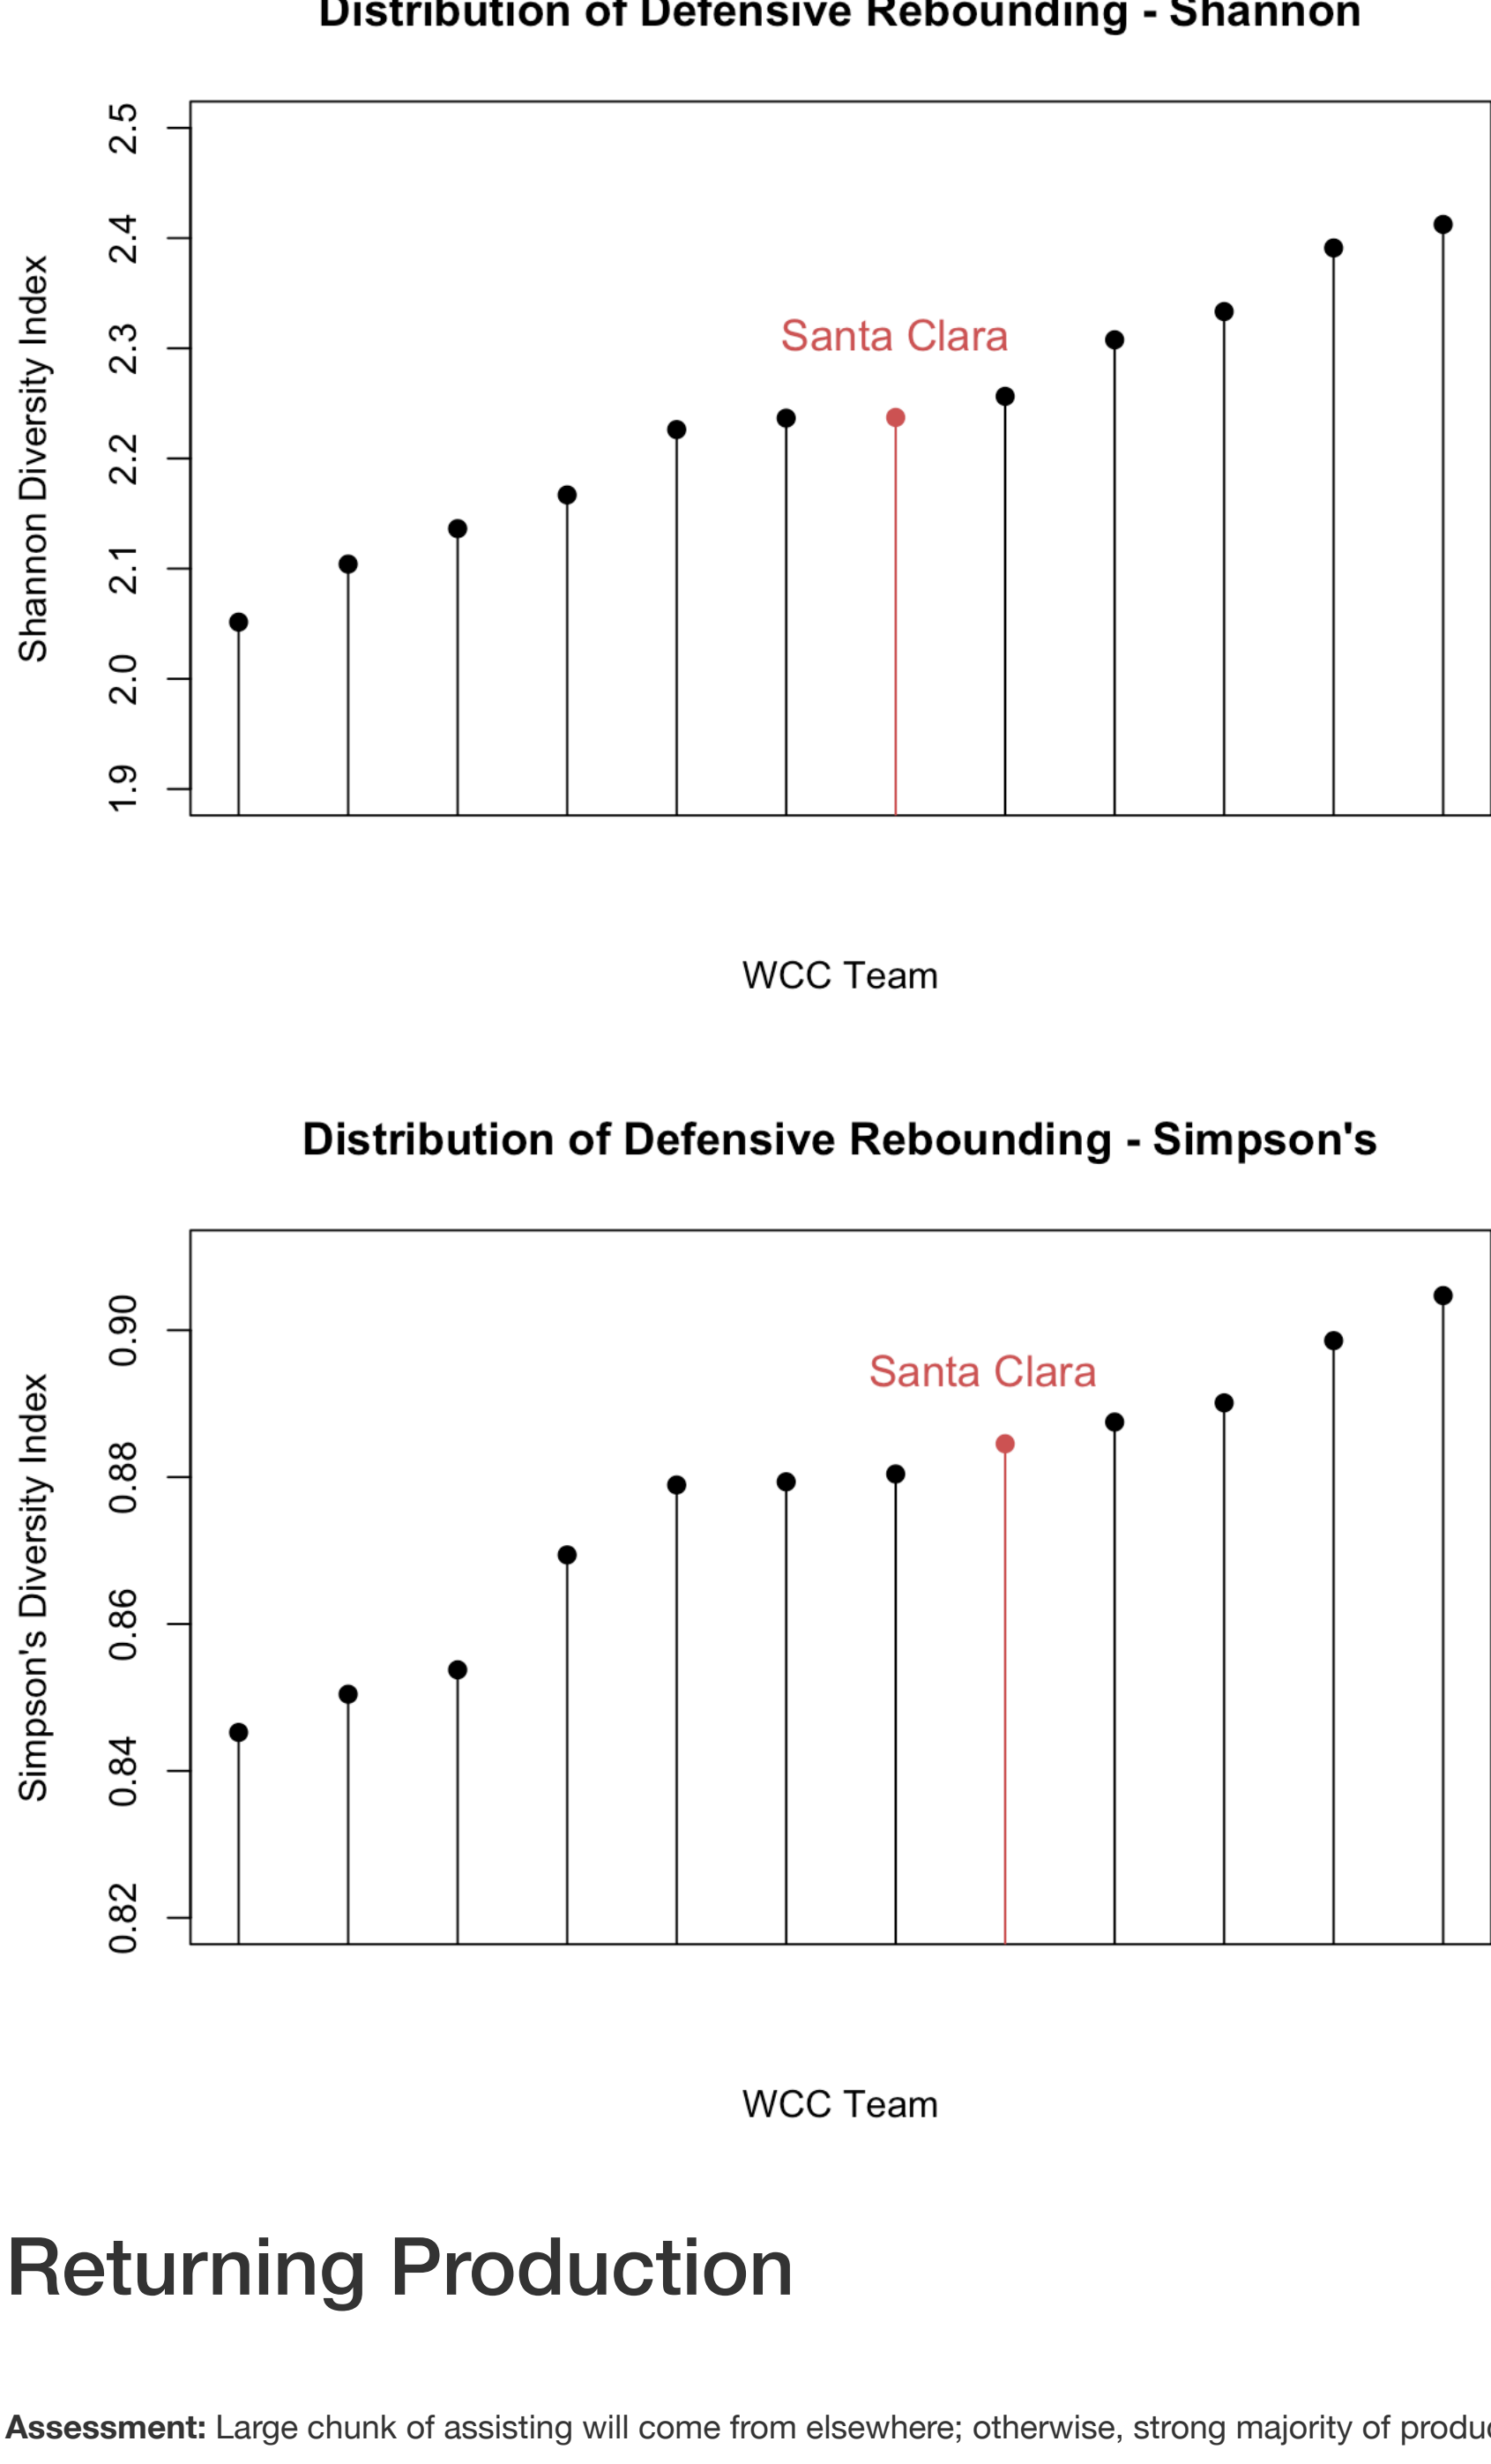

Assisting

Assessment: Assists very concentrated, nearly 40% by just one player, Ashley Hawkins

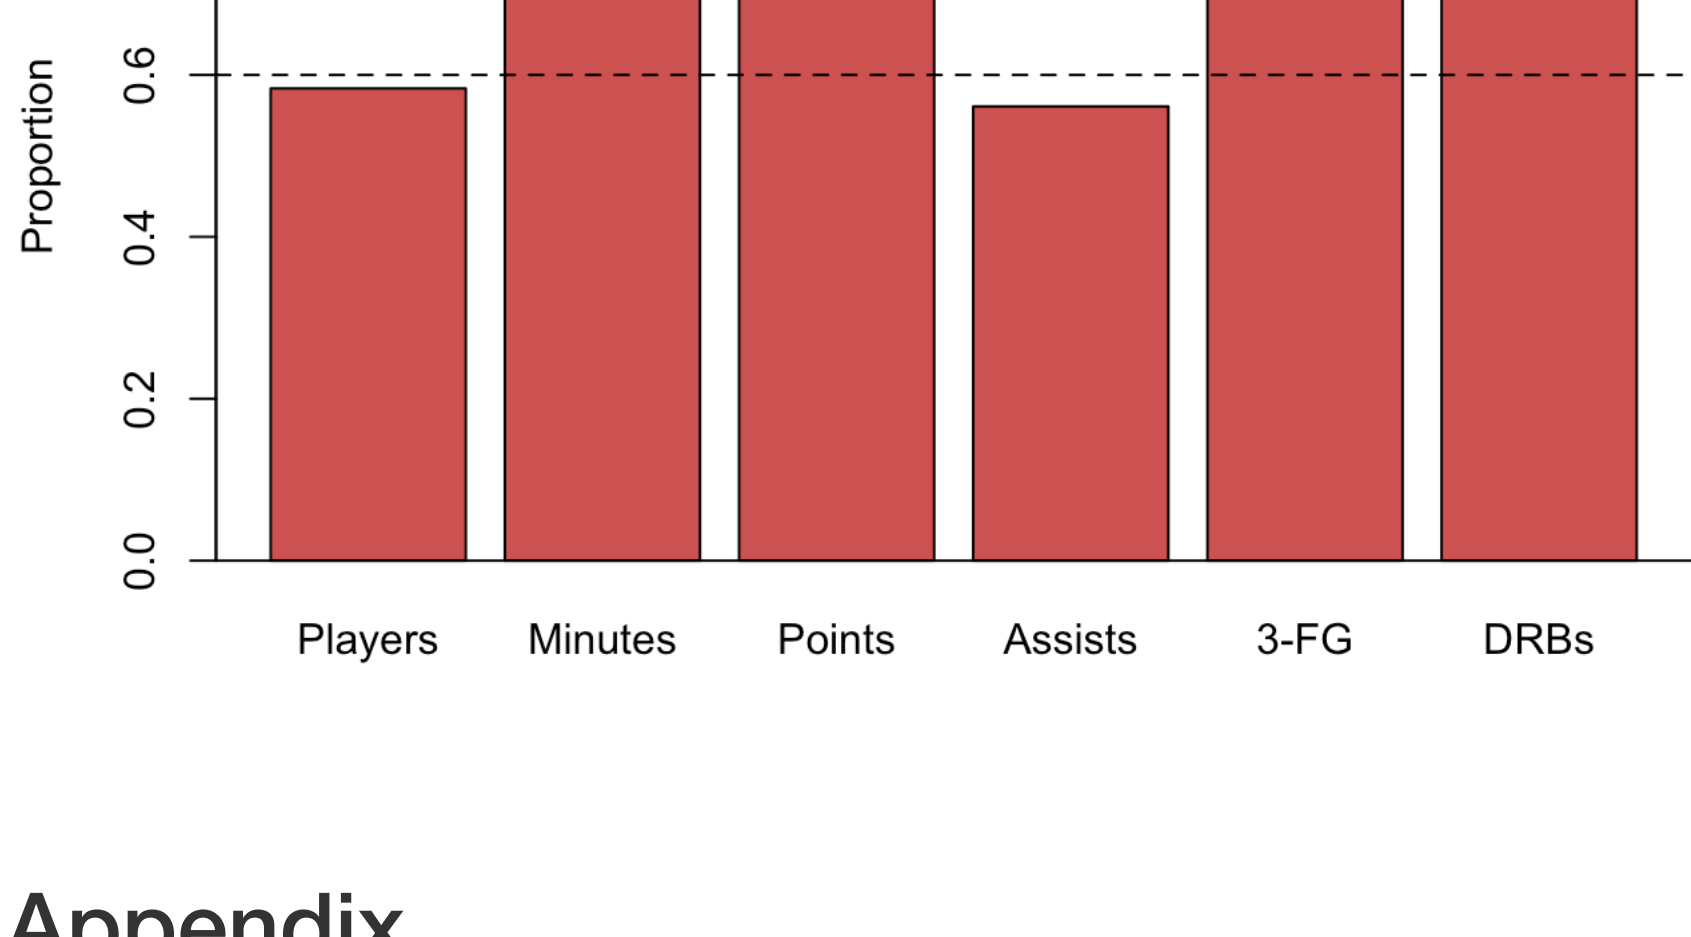

Defensive Rebounding

Assessment: Defensive rebounding distributed at a conference-average level

Returning Production

Assessment: Large chunk of assisting will come from elsewhere; otherwise, strong majority of production returning.

Appendix

Effective Field Goal Percentage:

$$eFG = \frac{FG + \frac{1}{3}P}{FGA}$$

3P: three point shots made

Free Throw Percentage:

$$FTR = \frac{FTA}{FGA}$$

Rebounding Percentage:

$$RB_{pt} = \frac{ORB}{ORB + Opp\ DRB}$$

flip ORB, DRB for defensive rebounding metric

Turnover Percentage:

$$TOV_{pt} = \frac{TOV}{FGA + TOV + \frac{11}{25}FTA}$$

Shannon's Diversity Index:

$$H = - \sum_{i \in C} (p_i \log(p_i)).$$

p_i is proportion of C that belongs to i

Simpson's Diversity Index:

$$D = \frac{1}{\sum_{i \in C} \frac{N_i(N_i-1)}{N(N-1)}}$$

N is the total number of elements in C , N_i is the number of elements in C that belong to group i
