

Seattle University Women's Basketball Team Scouting Report

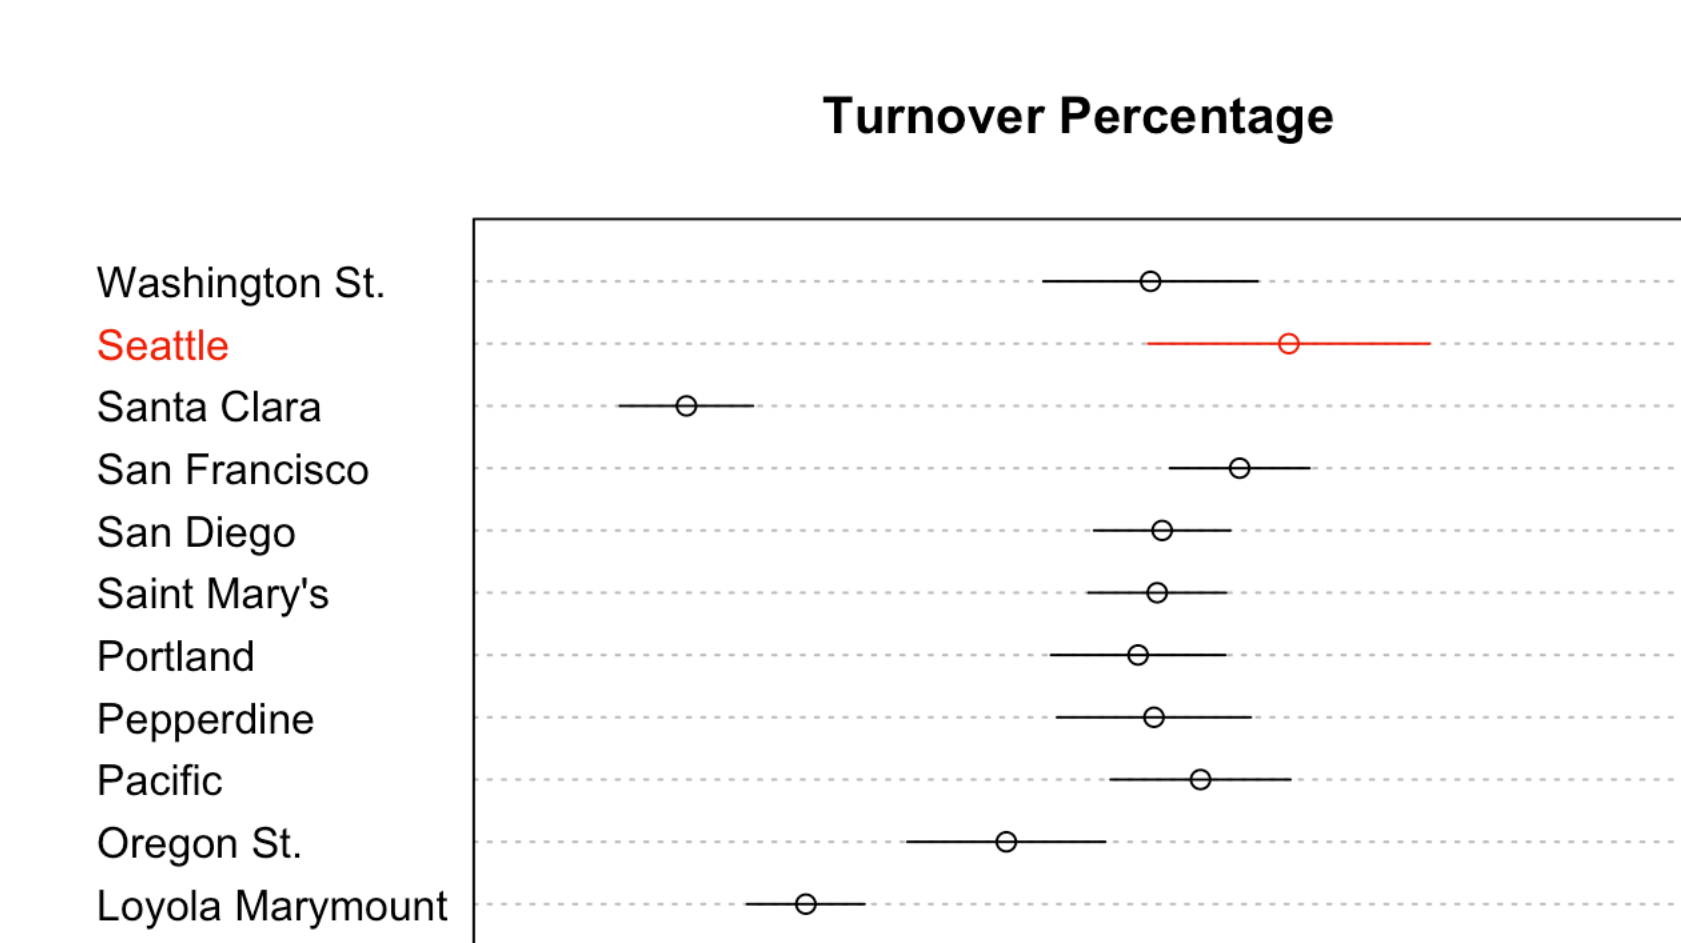

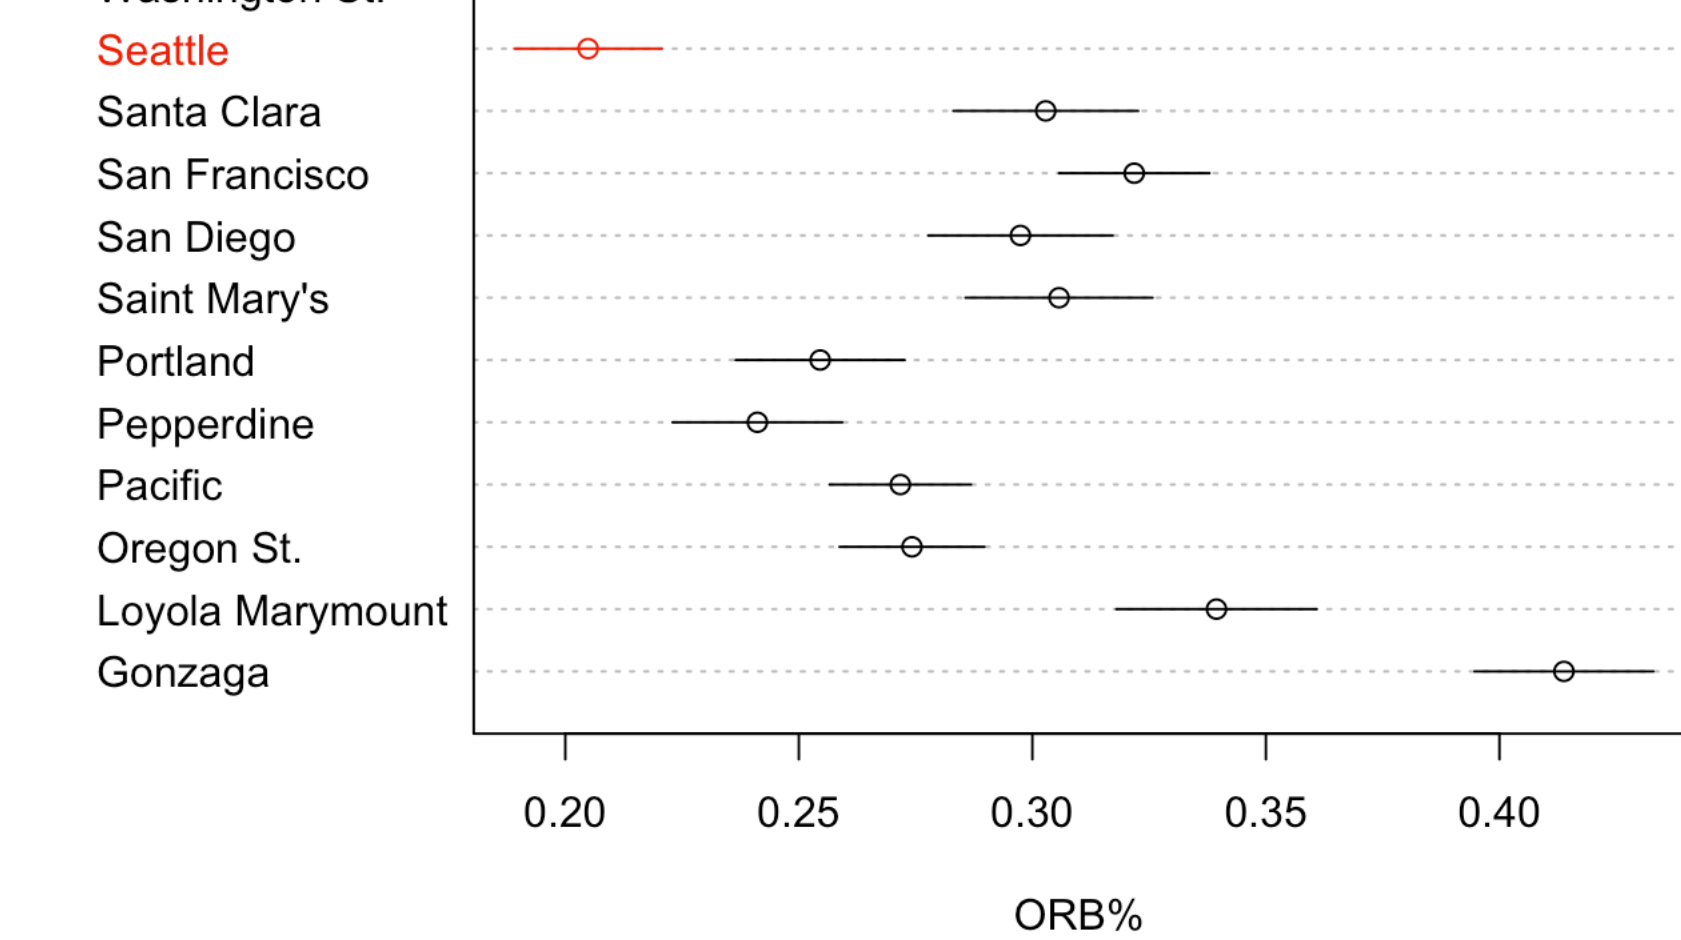

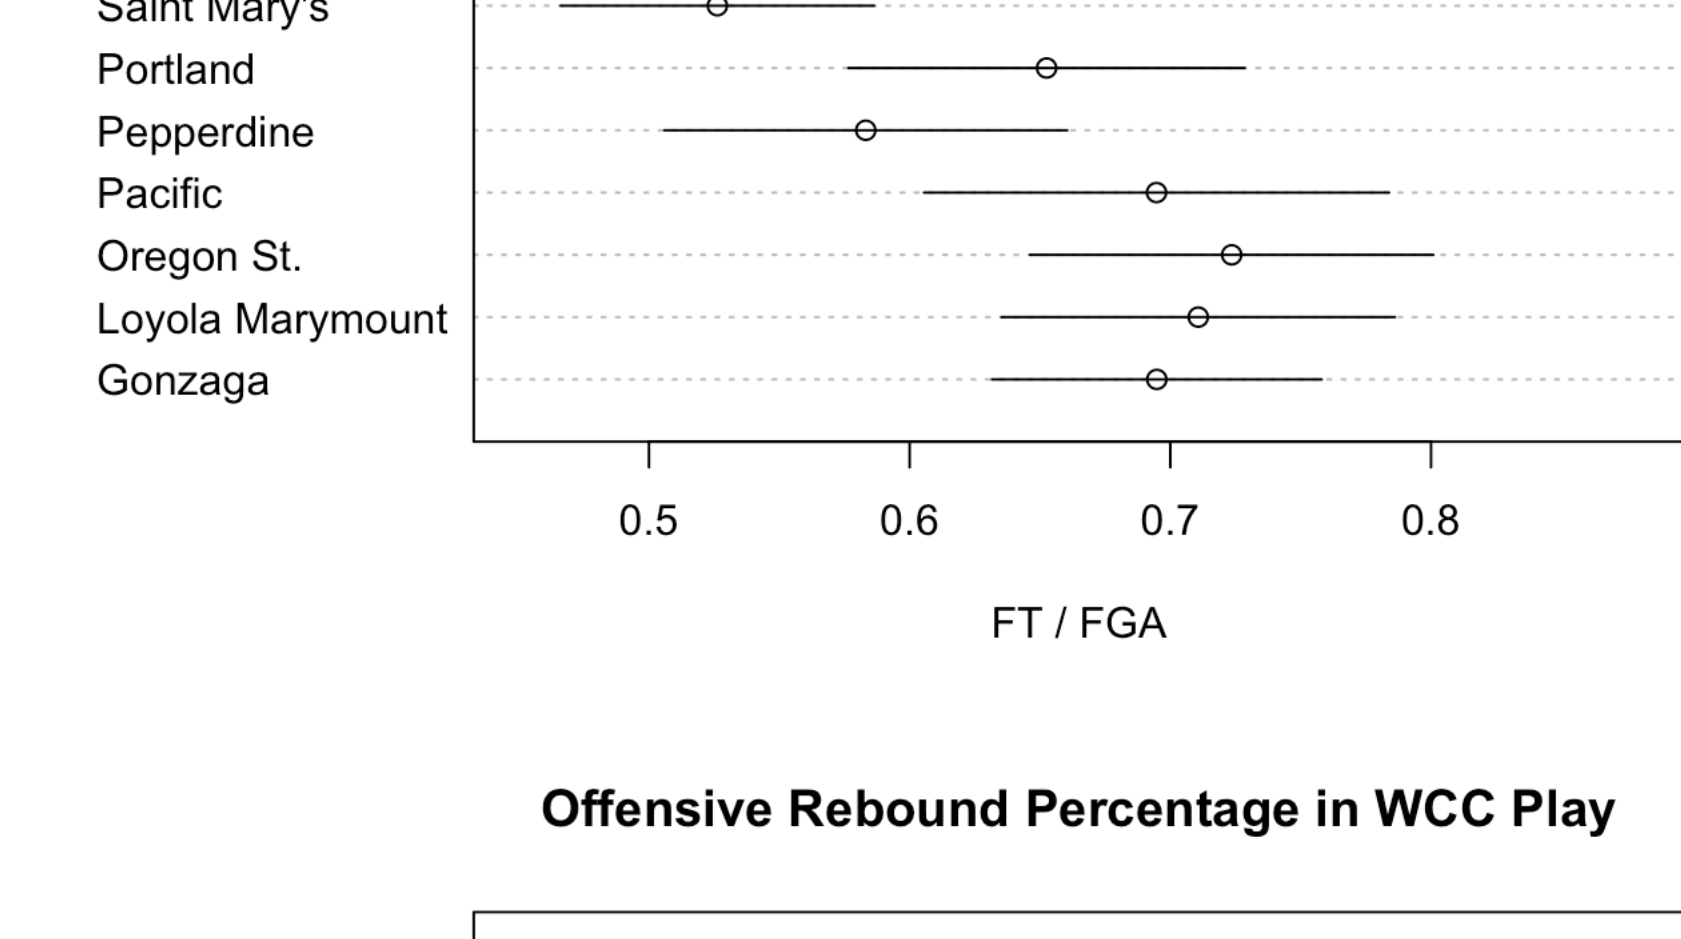

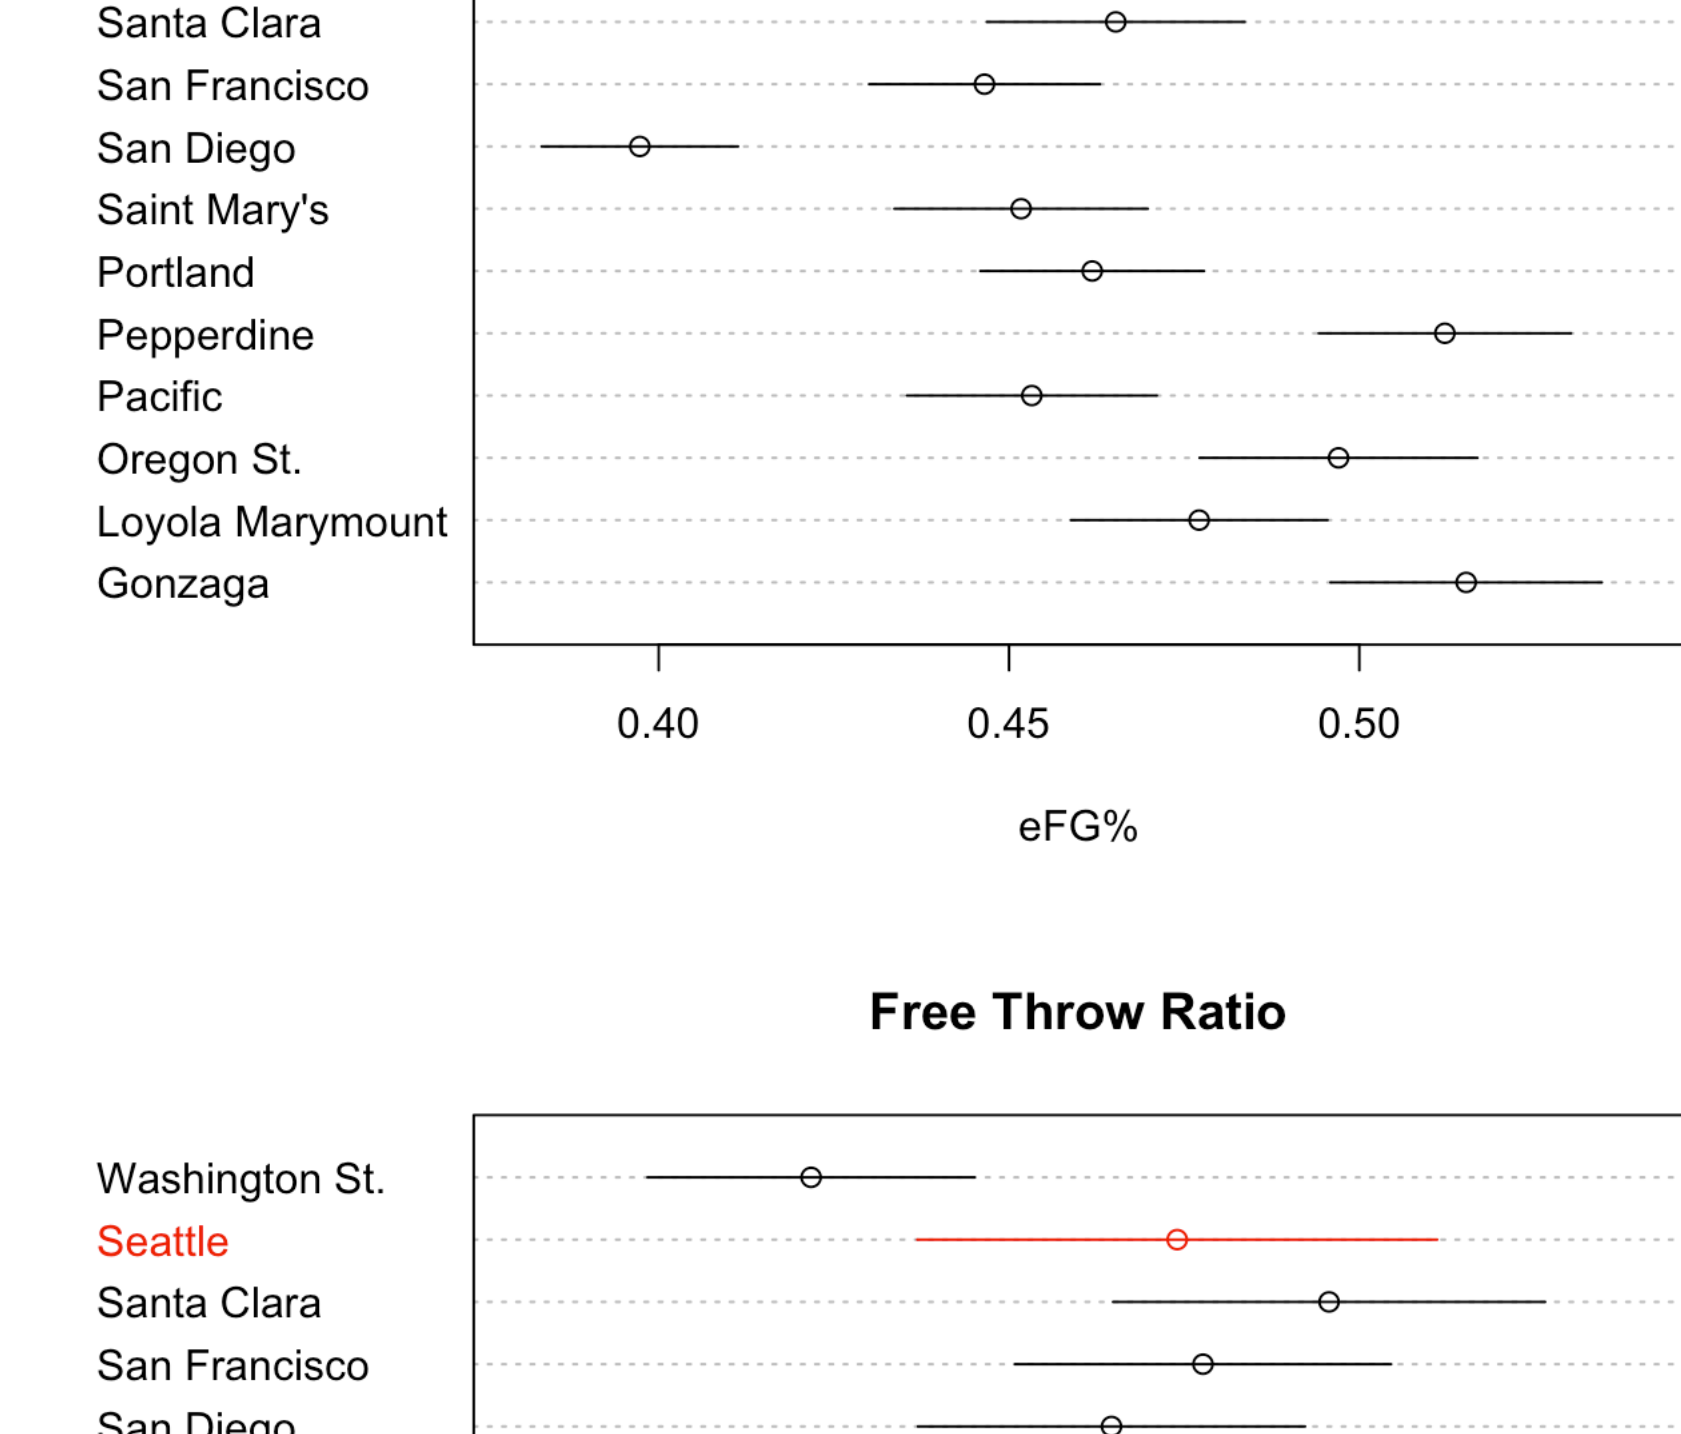

Overall Key Points

- Avoids fouling on defense to a decent degree
- Other than that, metrics poor across the board
- Scoring vacuum:** over 55% of team points scored by just three players, all of whom are gone
- Complete teardown of roster YoY

Offense

Strengths: none

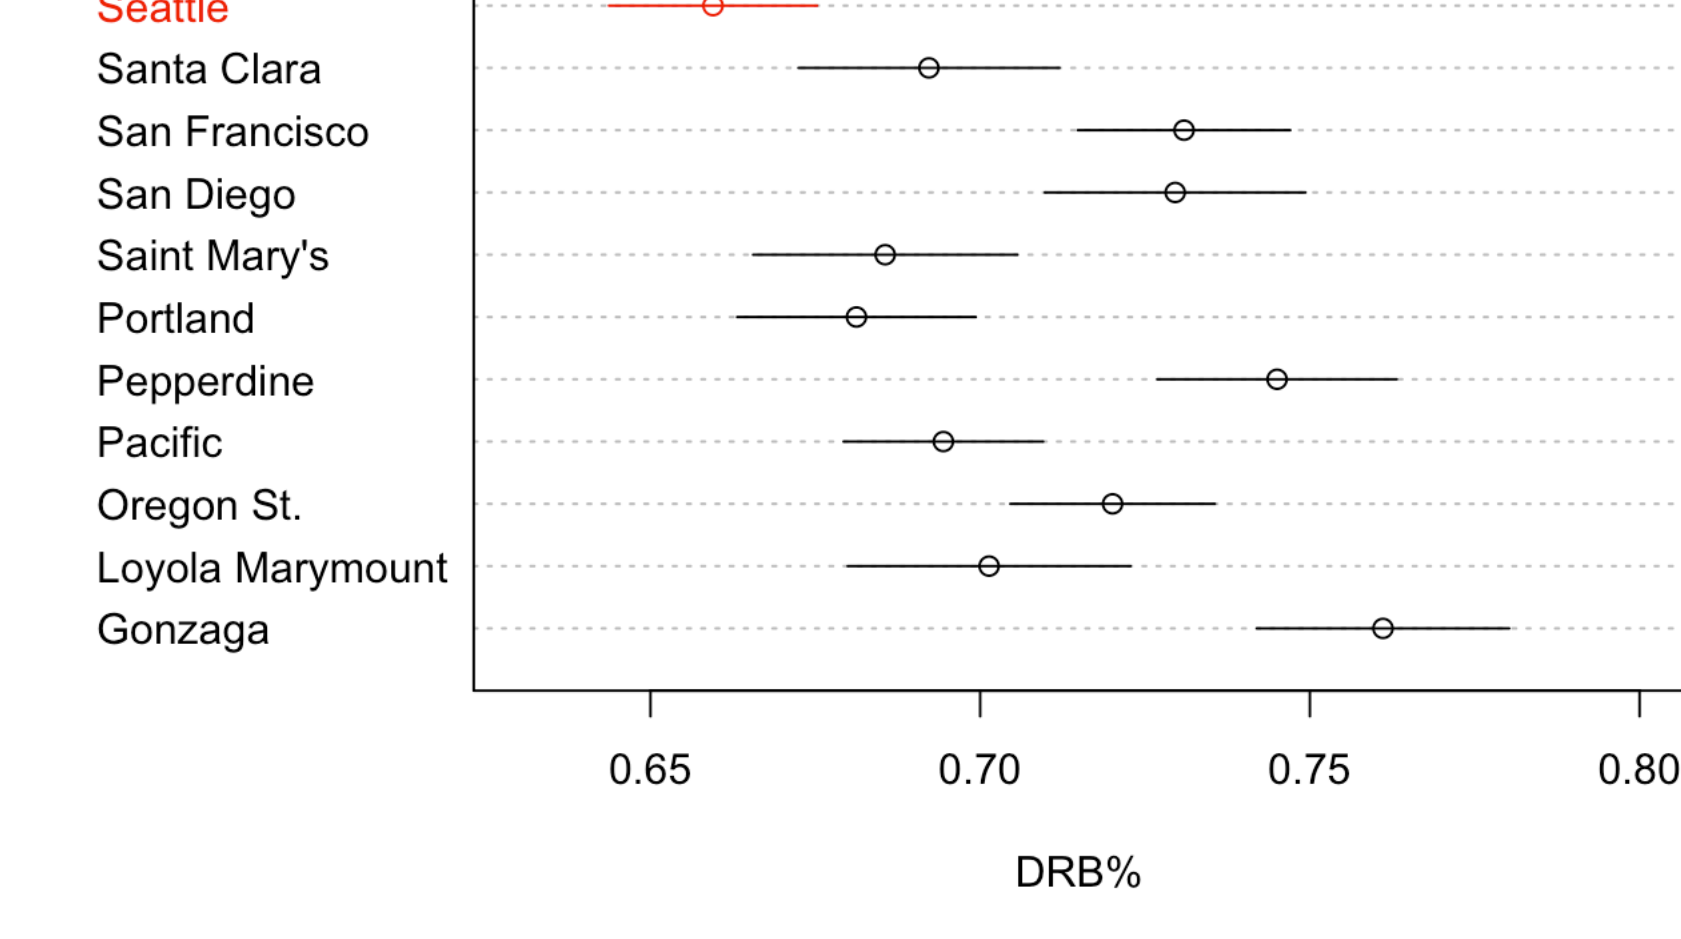

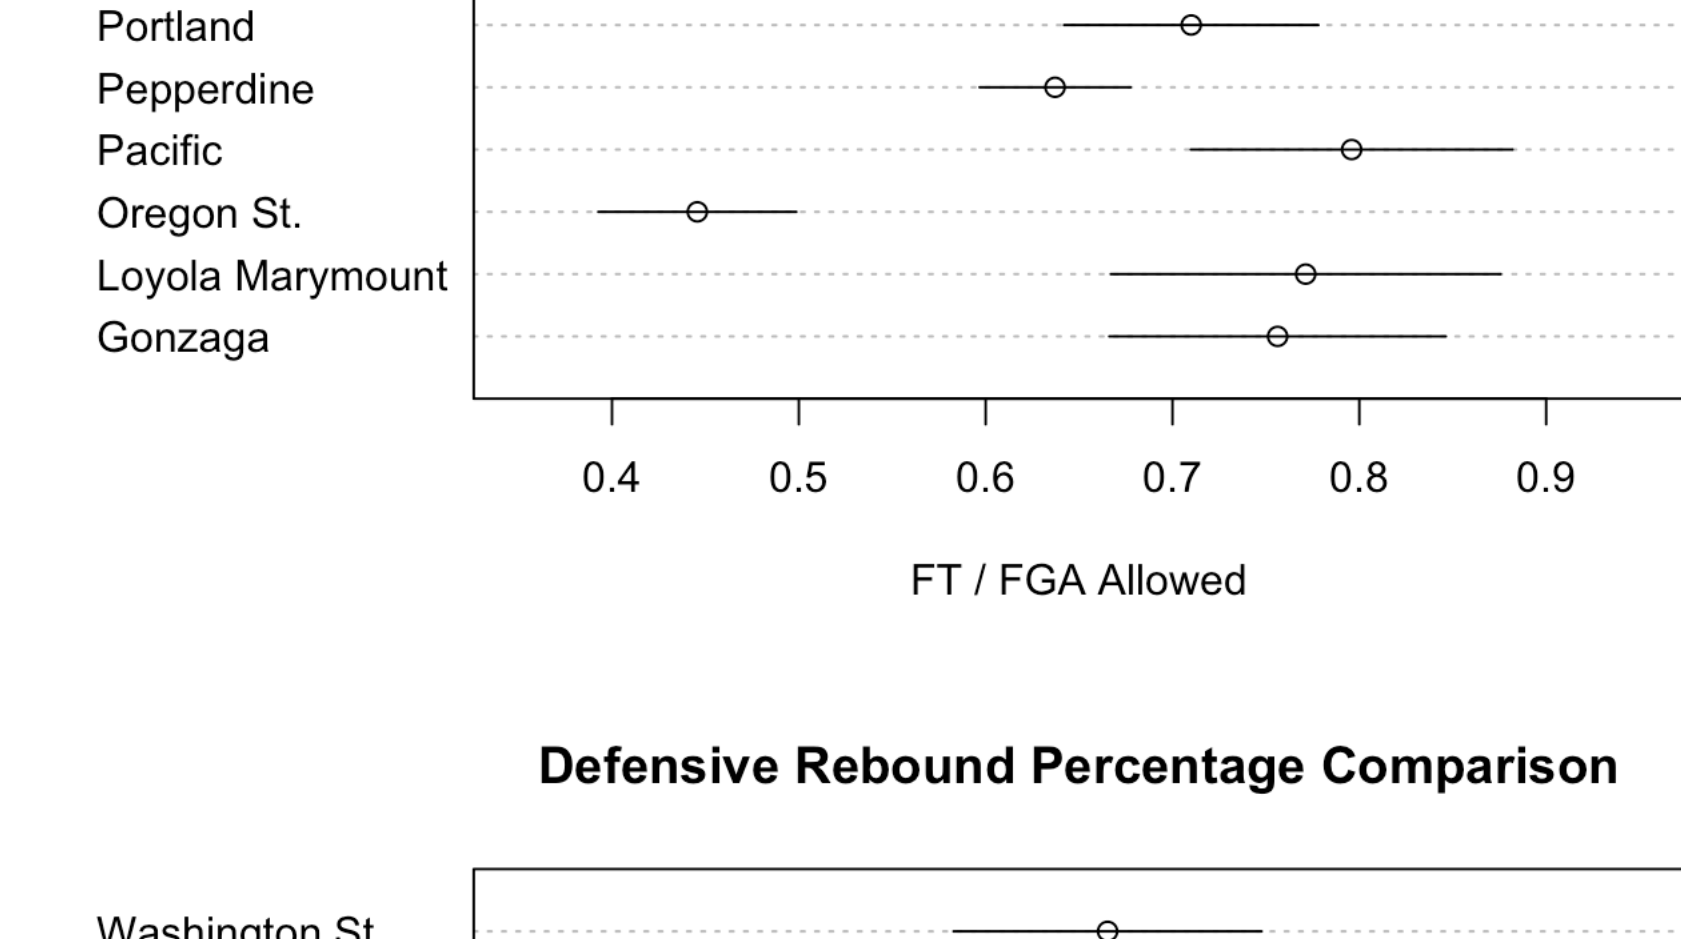

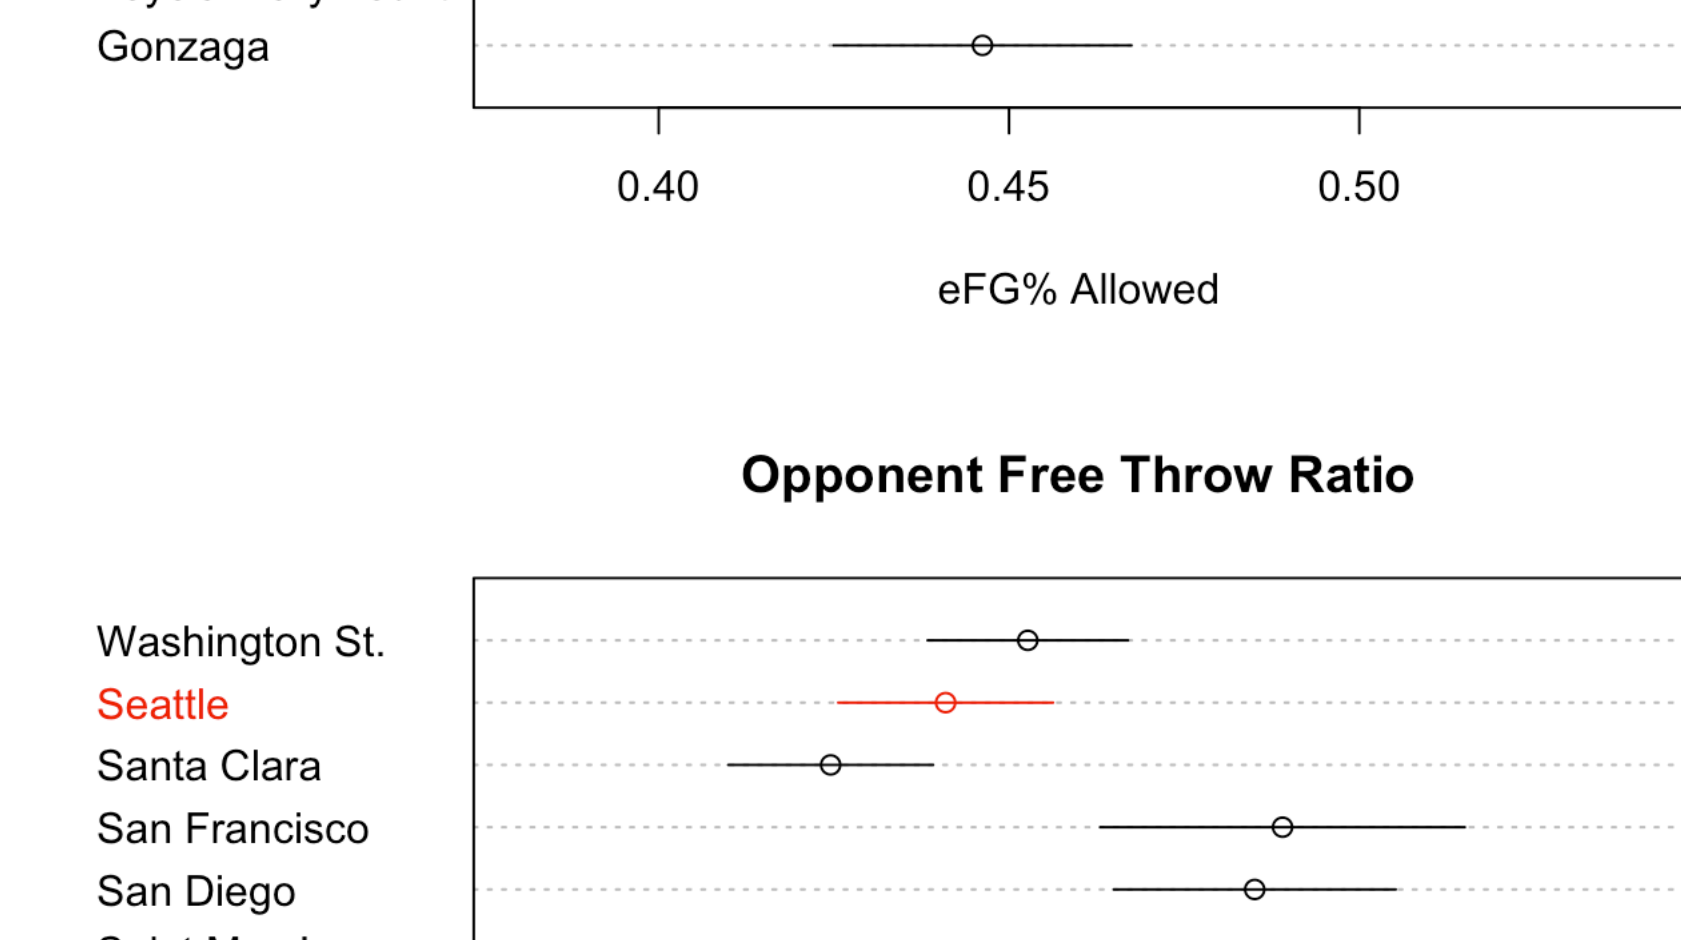

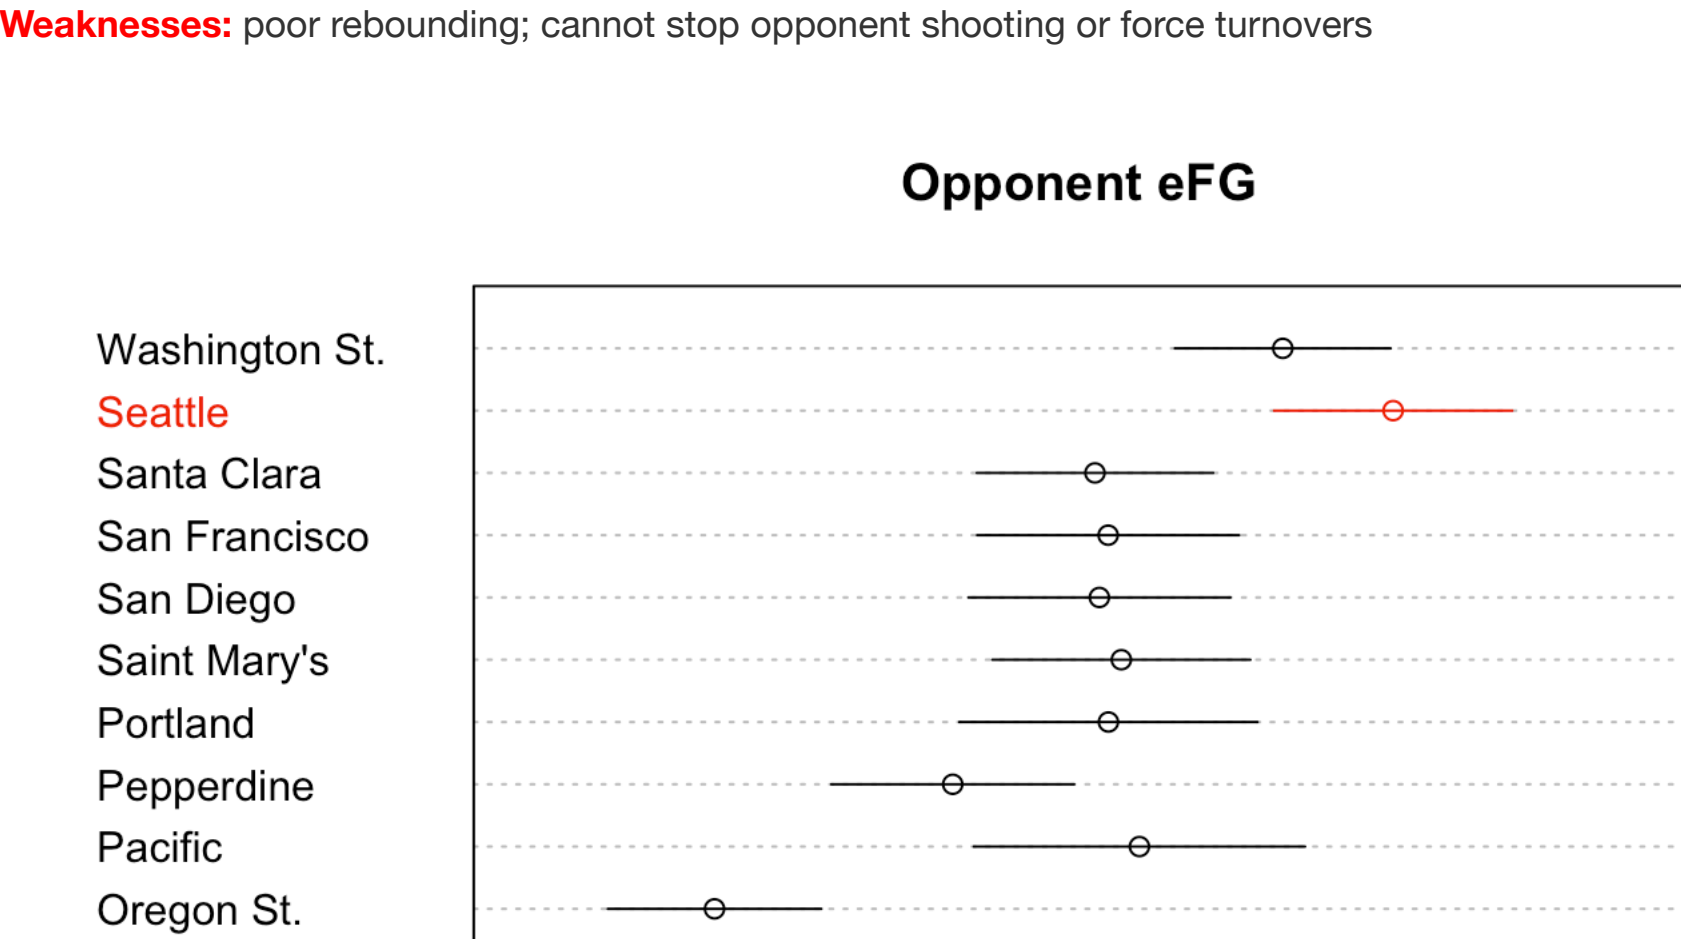

Weaknesses: very poor shooting, rebounding; struggles with turnovers as well

Defense

Strengths: avoids fouling decently well

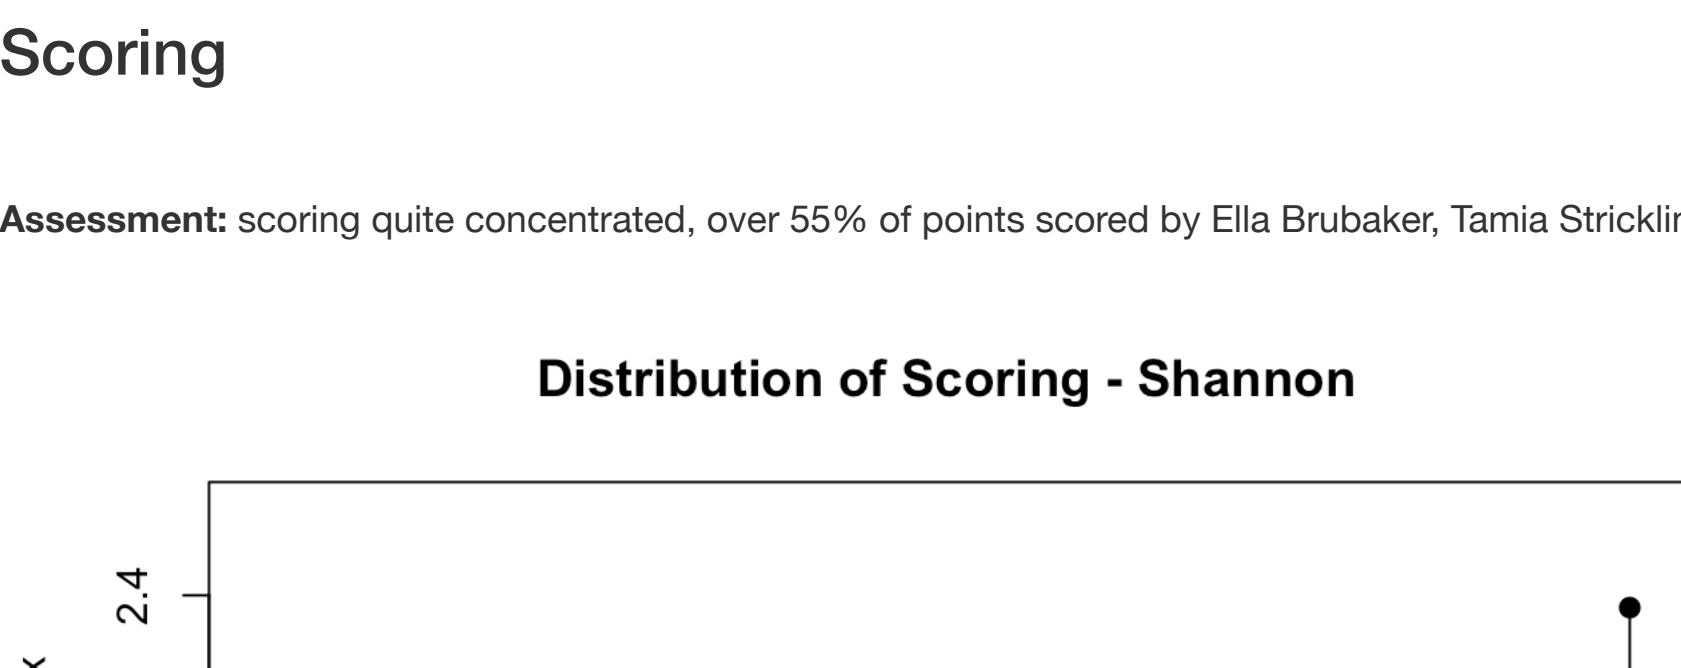

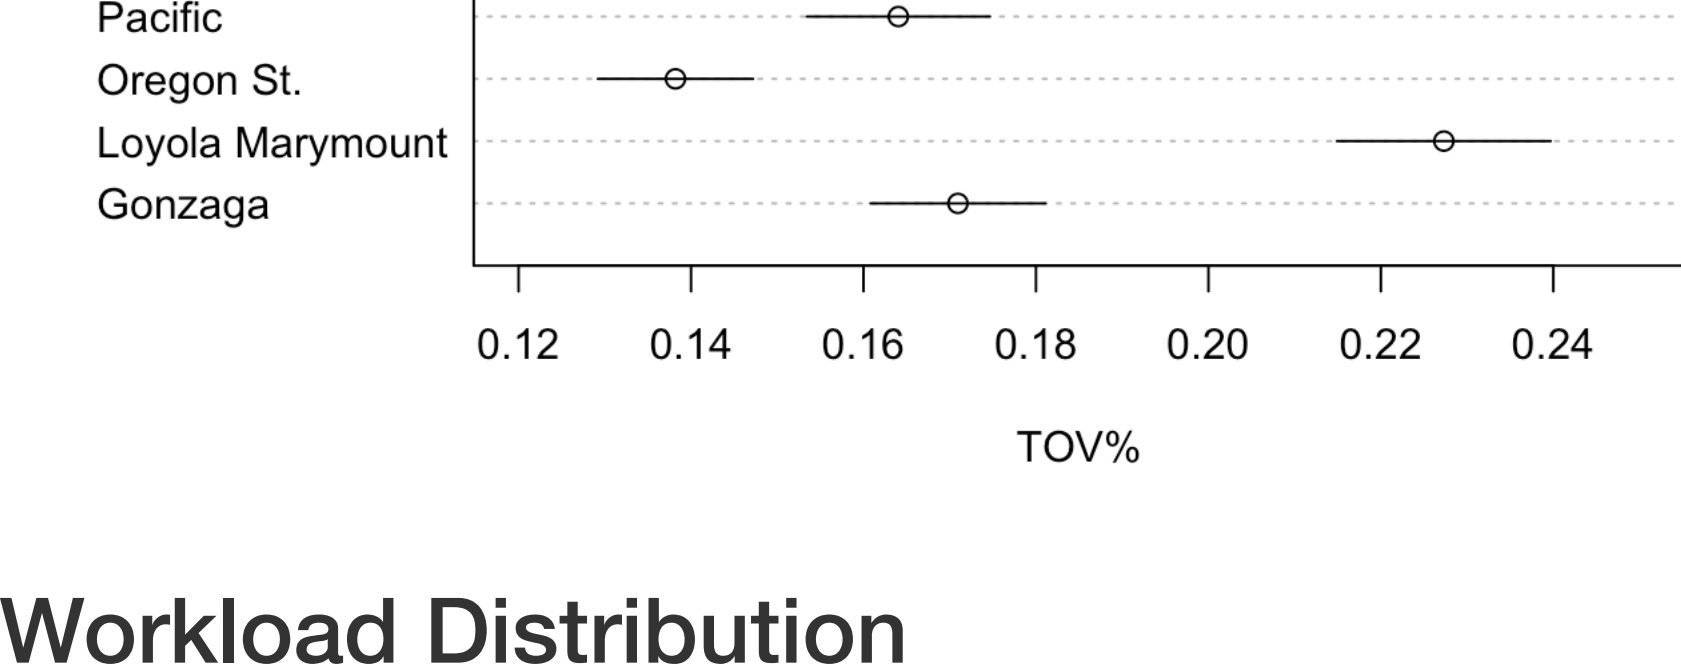

Weaknesses: poor rebounding; cannot stop opponent shooting or force turnovers

Workload Distribution

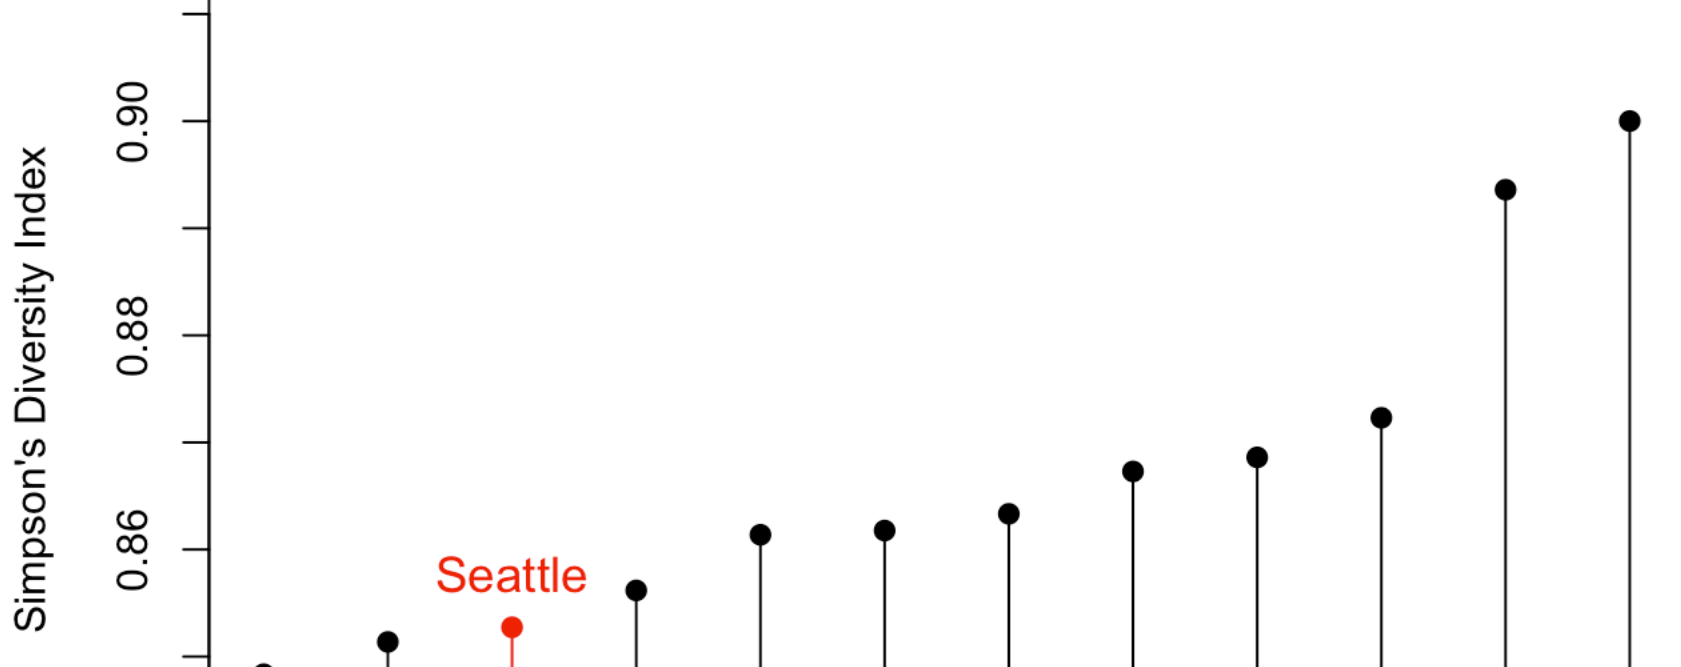

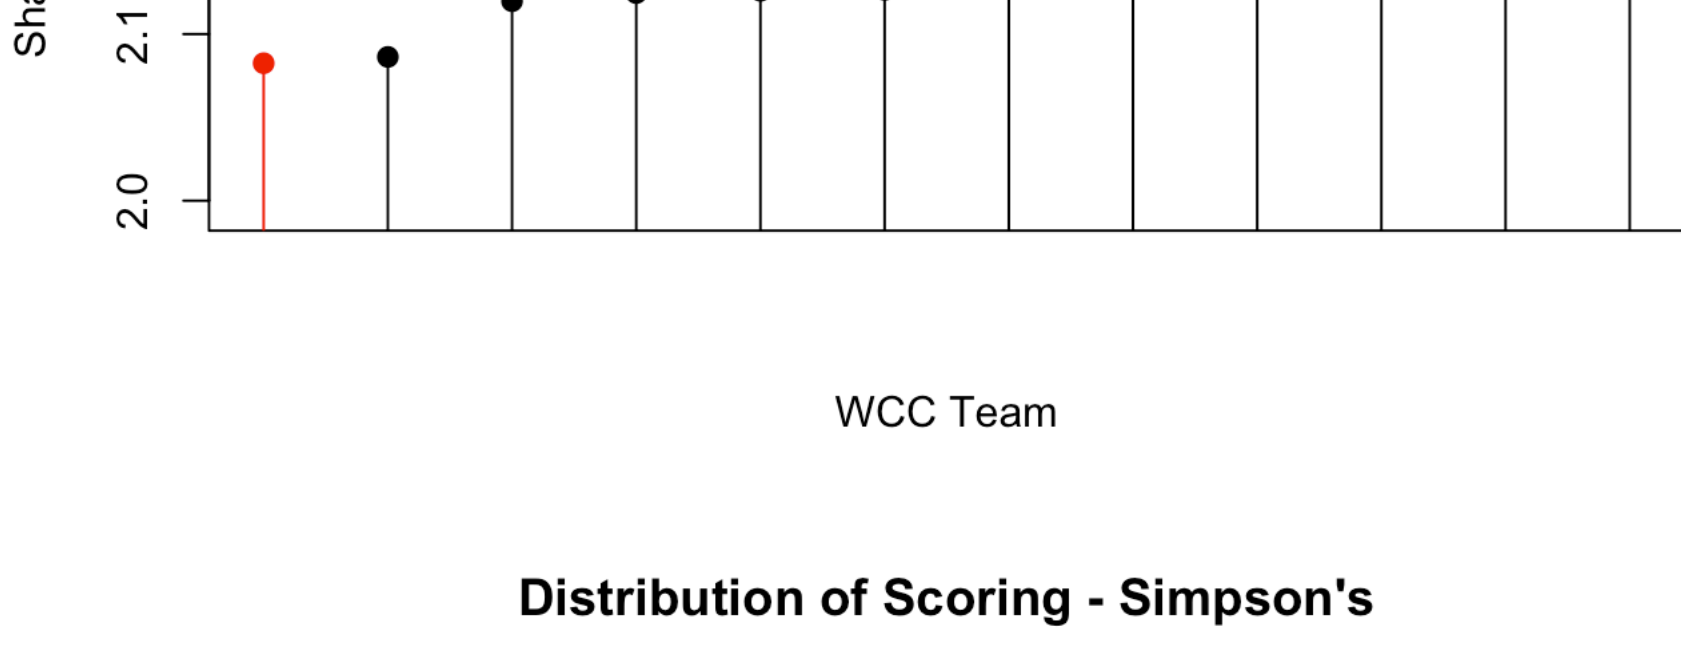

Scoring

Assessment: scoring quite concentrated, over 55% of points scored by Ella Brubaker, Tamia Stricklin, and Jana Vesic (all are gone)

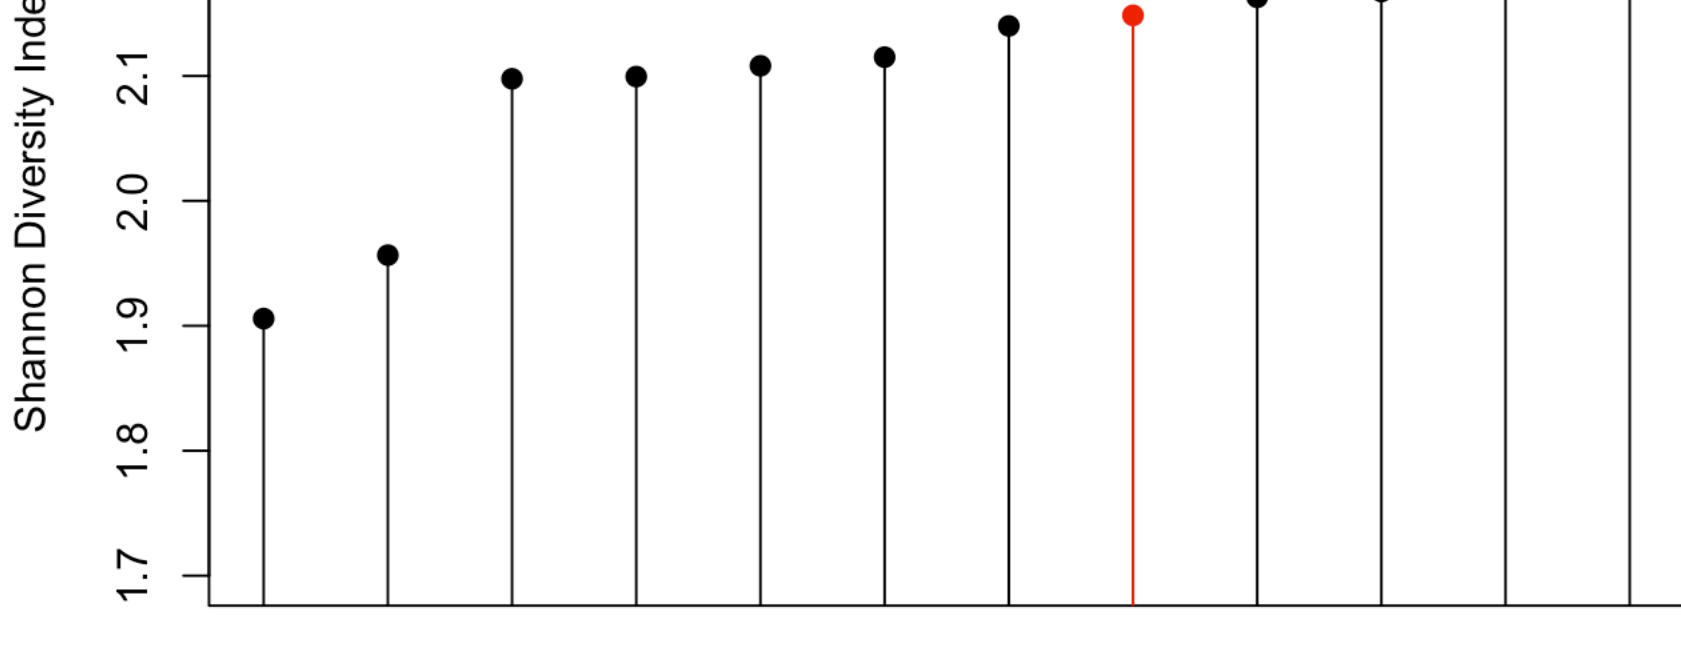

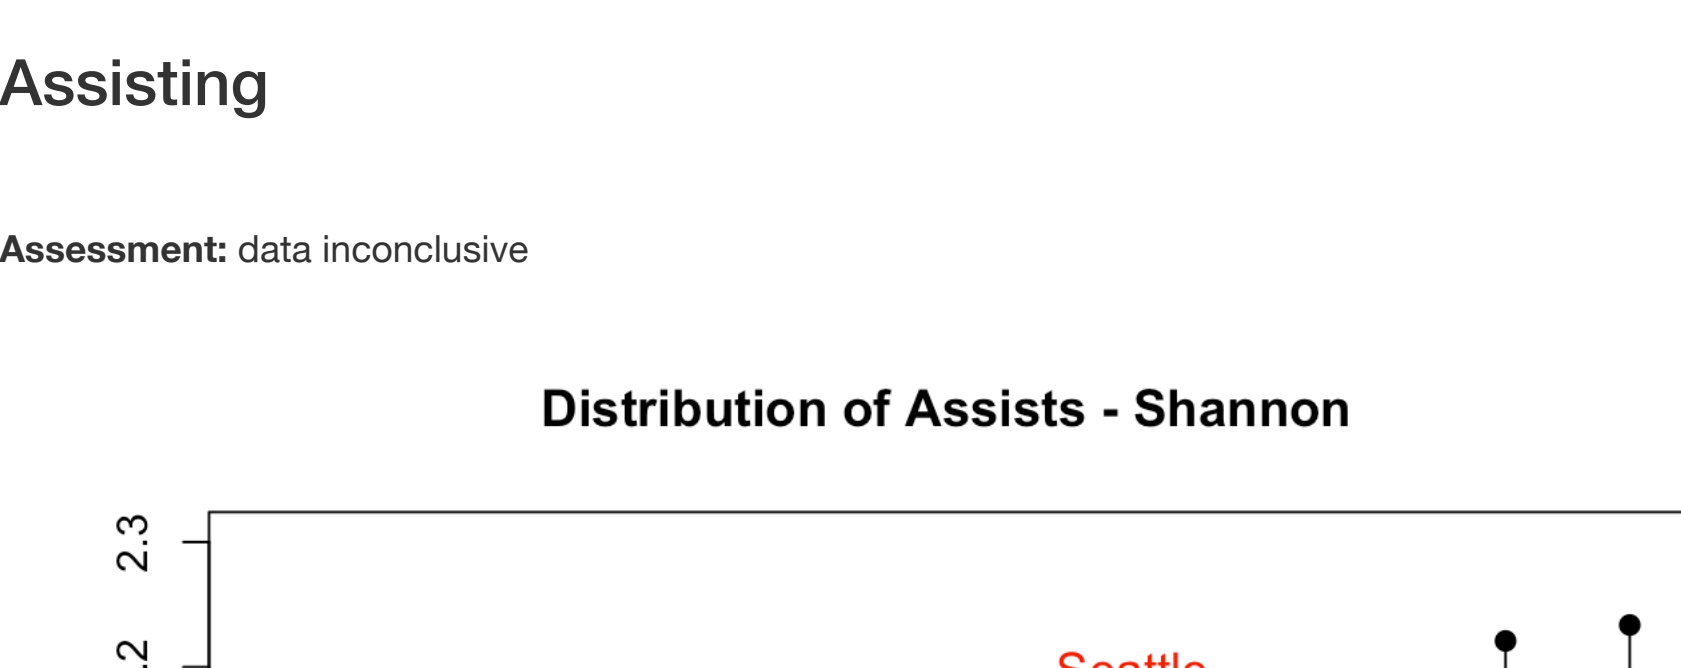

Assisting

Assessment: data inconclusive

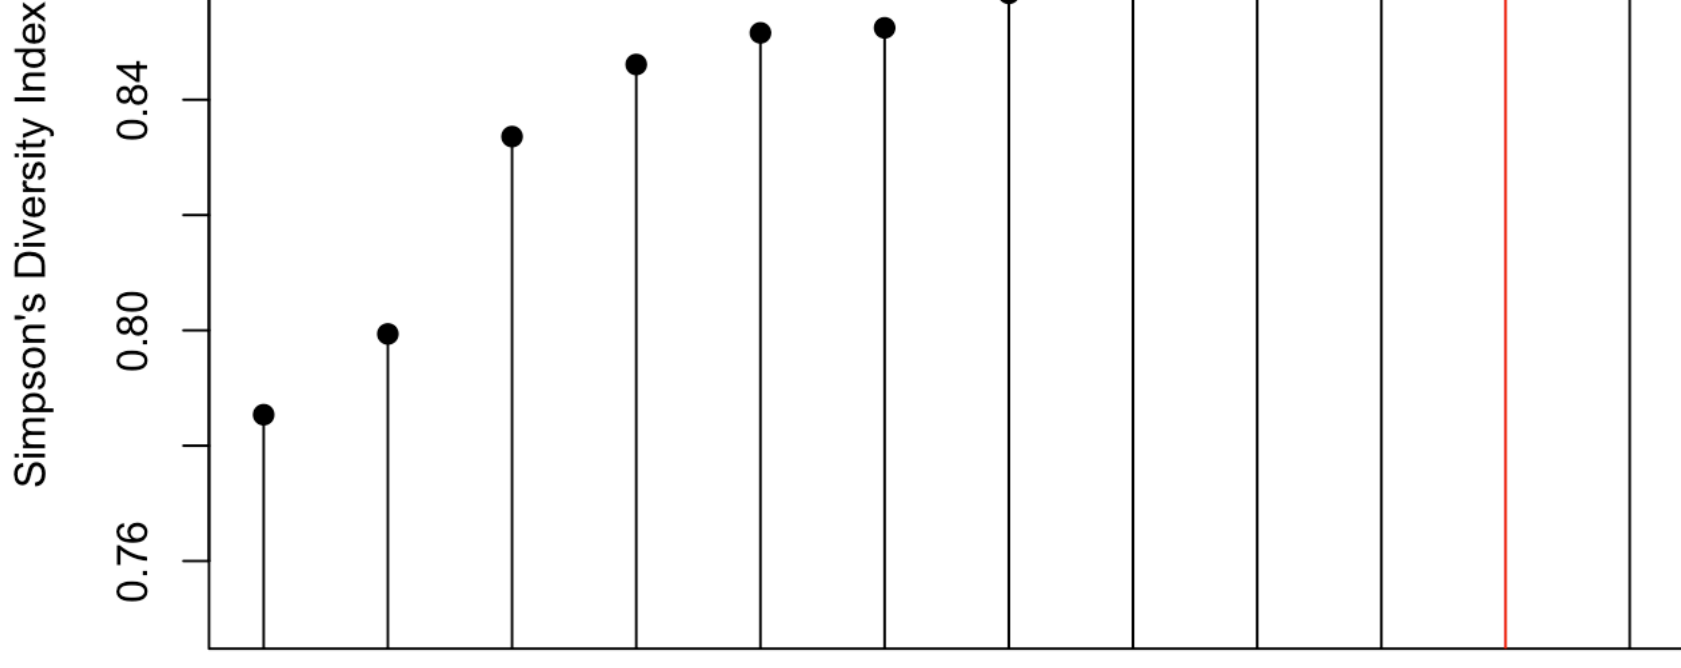

Defensive Rebounding

Assessment: data suggests a fairly concentrated workload

Returning Production

Assessment: Essentially a completely new team on the court in 2026-27.

Appendix

Effective Field Goal Percentage:

$$eFG = \frac{FG + \frac{1}{3}P}{FGA}$$

3P: three point shots made

Free Throw Percentage:

$$FTR = \frac{FTA}{FGA}$$

Rebounding Percentage:

$$RB_{\text{pt}} = \frac{ORB}{ORB + Opp\ DRB}$$

flip ORB, DRB for defensive rebounding metric

Turnover Percentage:

$$TOV_{\text{pt}} = \frac{TOV}{FGA + TOV + \frac{11}{25}FTA}$$

Shannon's Diversity Index:

$$H = - \sum_{i \in C} (p_i \log(p_i)),$$

p_i is proportion of C that belongs to i

Simpson's Diversity Index:

$$D = 1 - \frac{\sum_{i \in C} N_i(N_i - 1)}{N(N - 1)},$$

N is the total number of elements in C , N_i is the number of elements in C that belong to group i
