# Women's Basketball Team Scouting Report

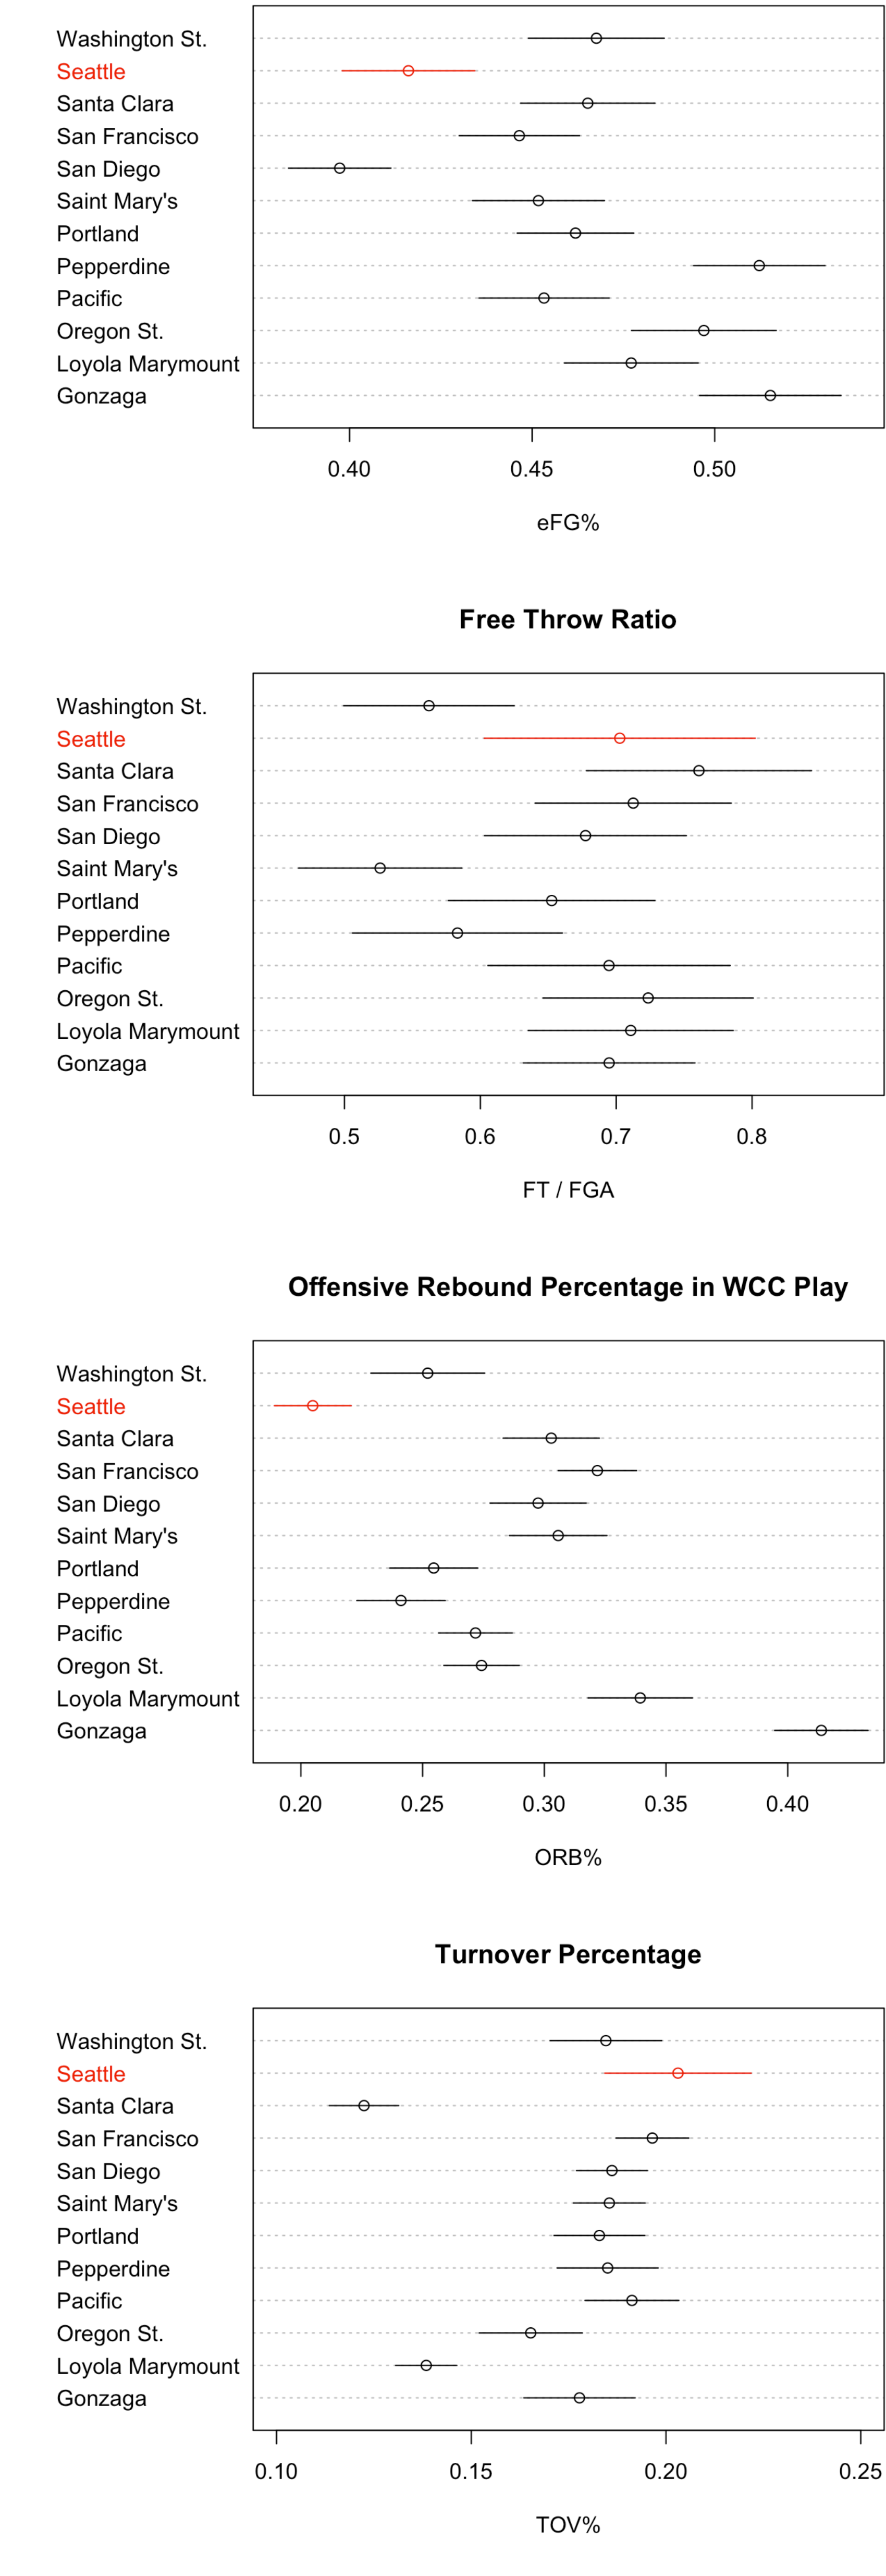

## Overall Key Points

- Avoids fouling on defense to a decent degree
- Other than that, metrics poor across the board
- Scoring vacuum: over 55% of team points scored by just three players, all of whom are gone

## Offense

Strengths: none

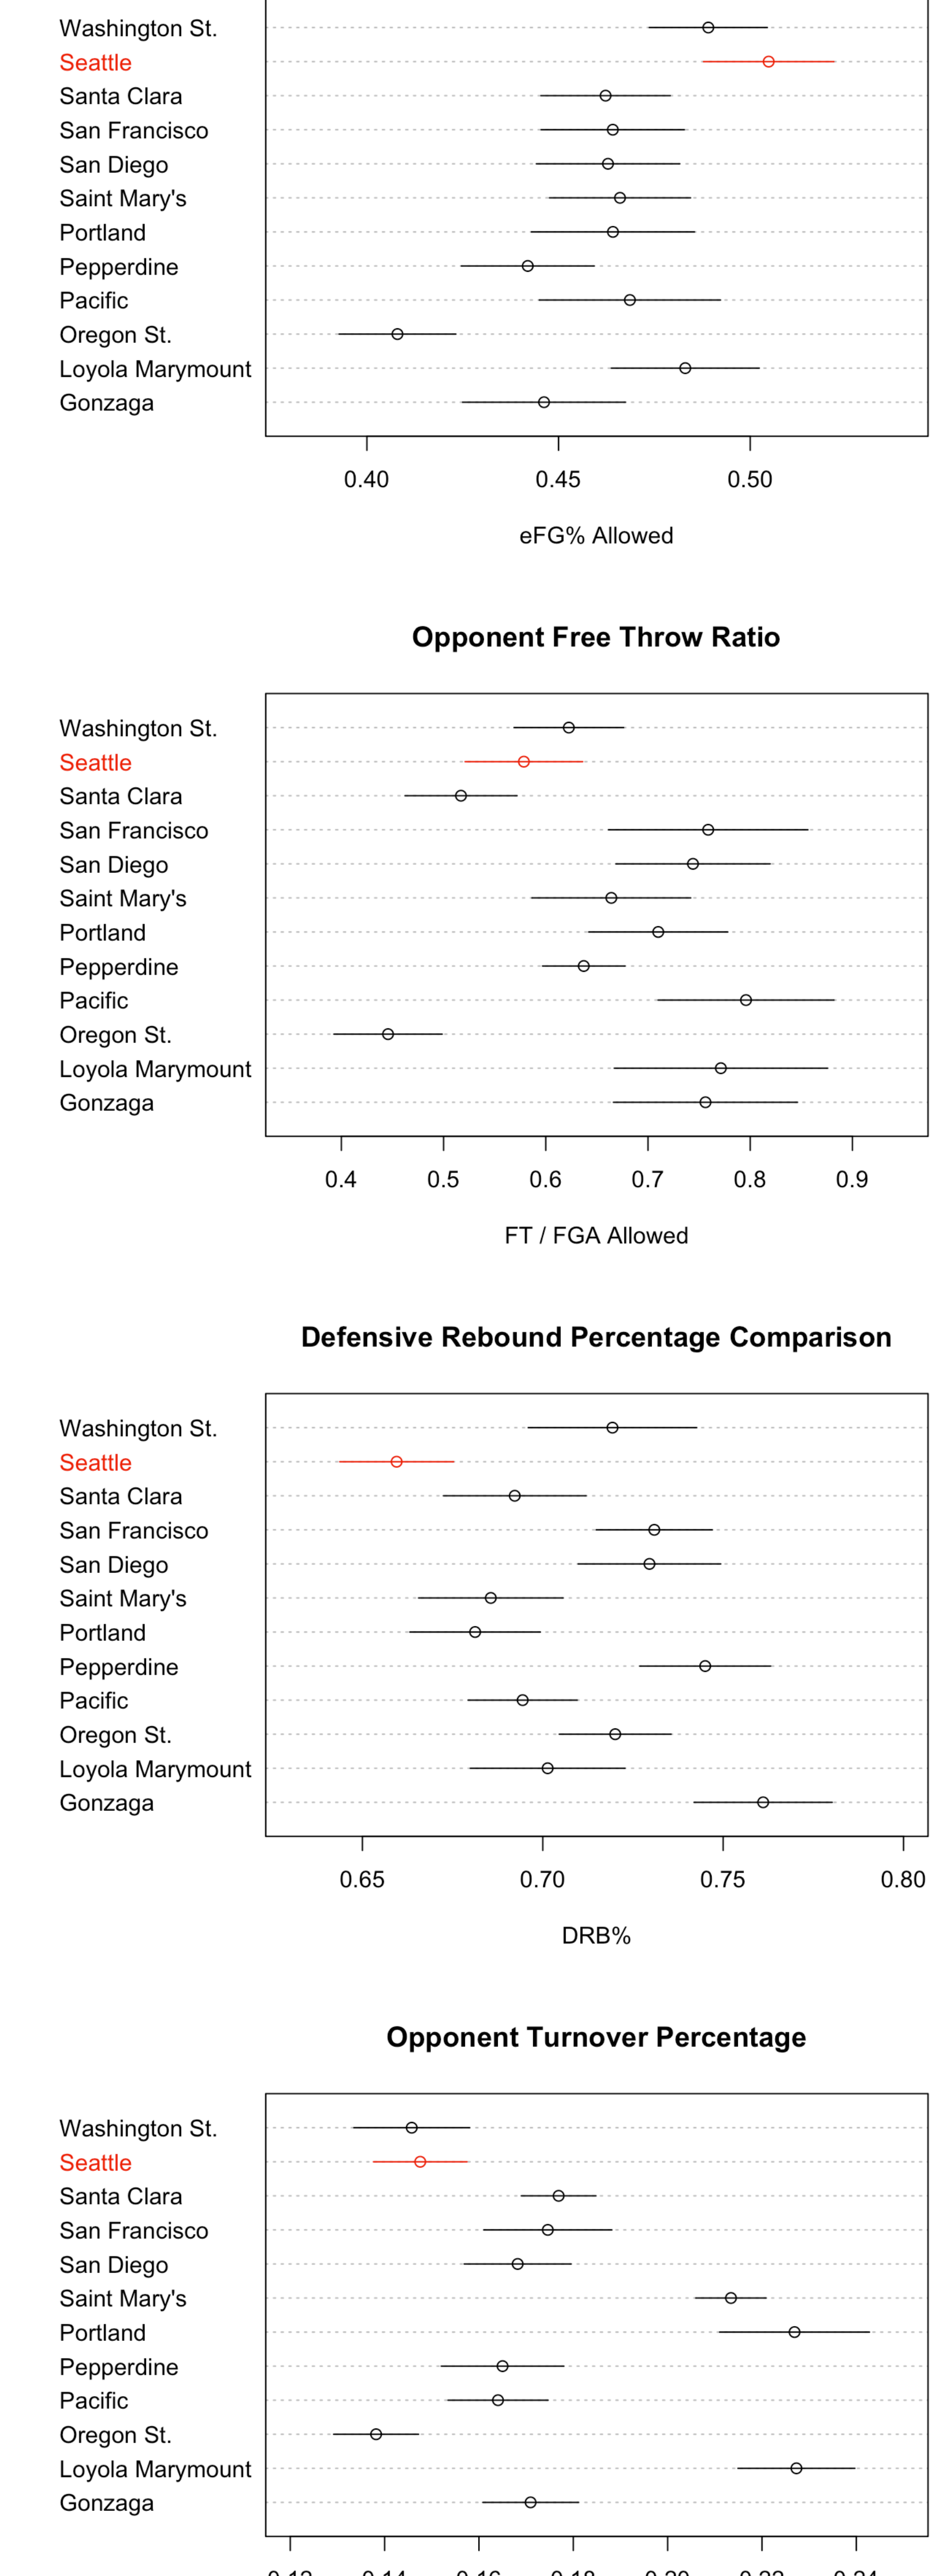

Weaknesses: very poor shooting, rebounding; struggles with turnovers as well

## Defense

Strengths: avoids fouling decently well

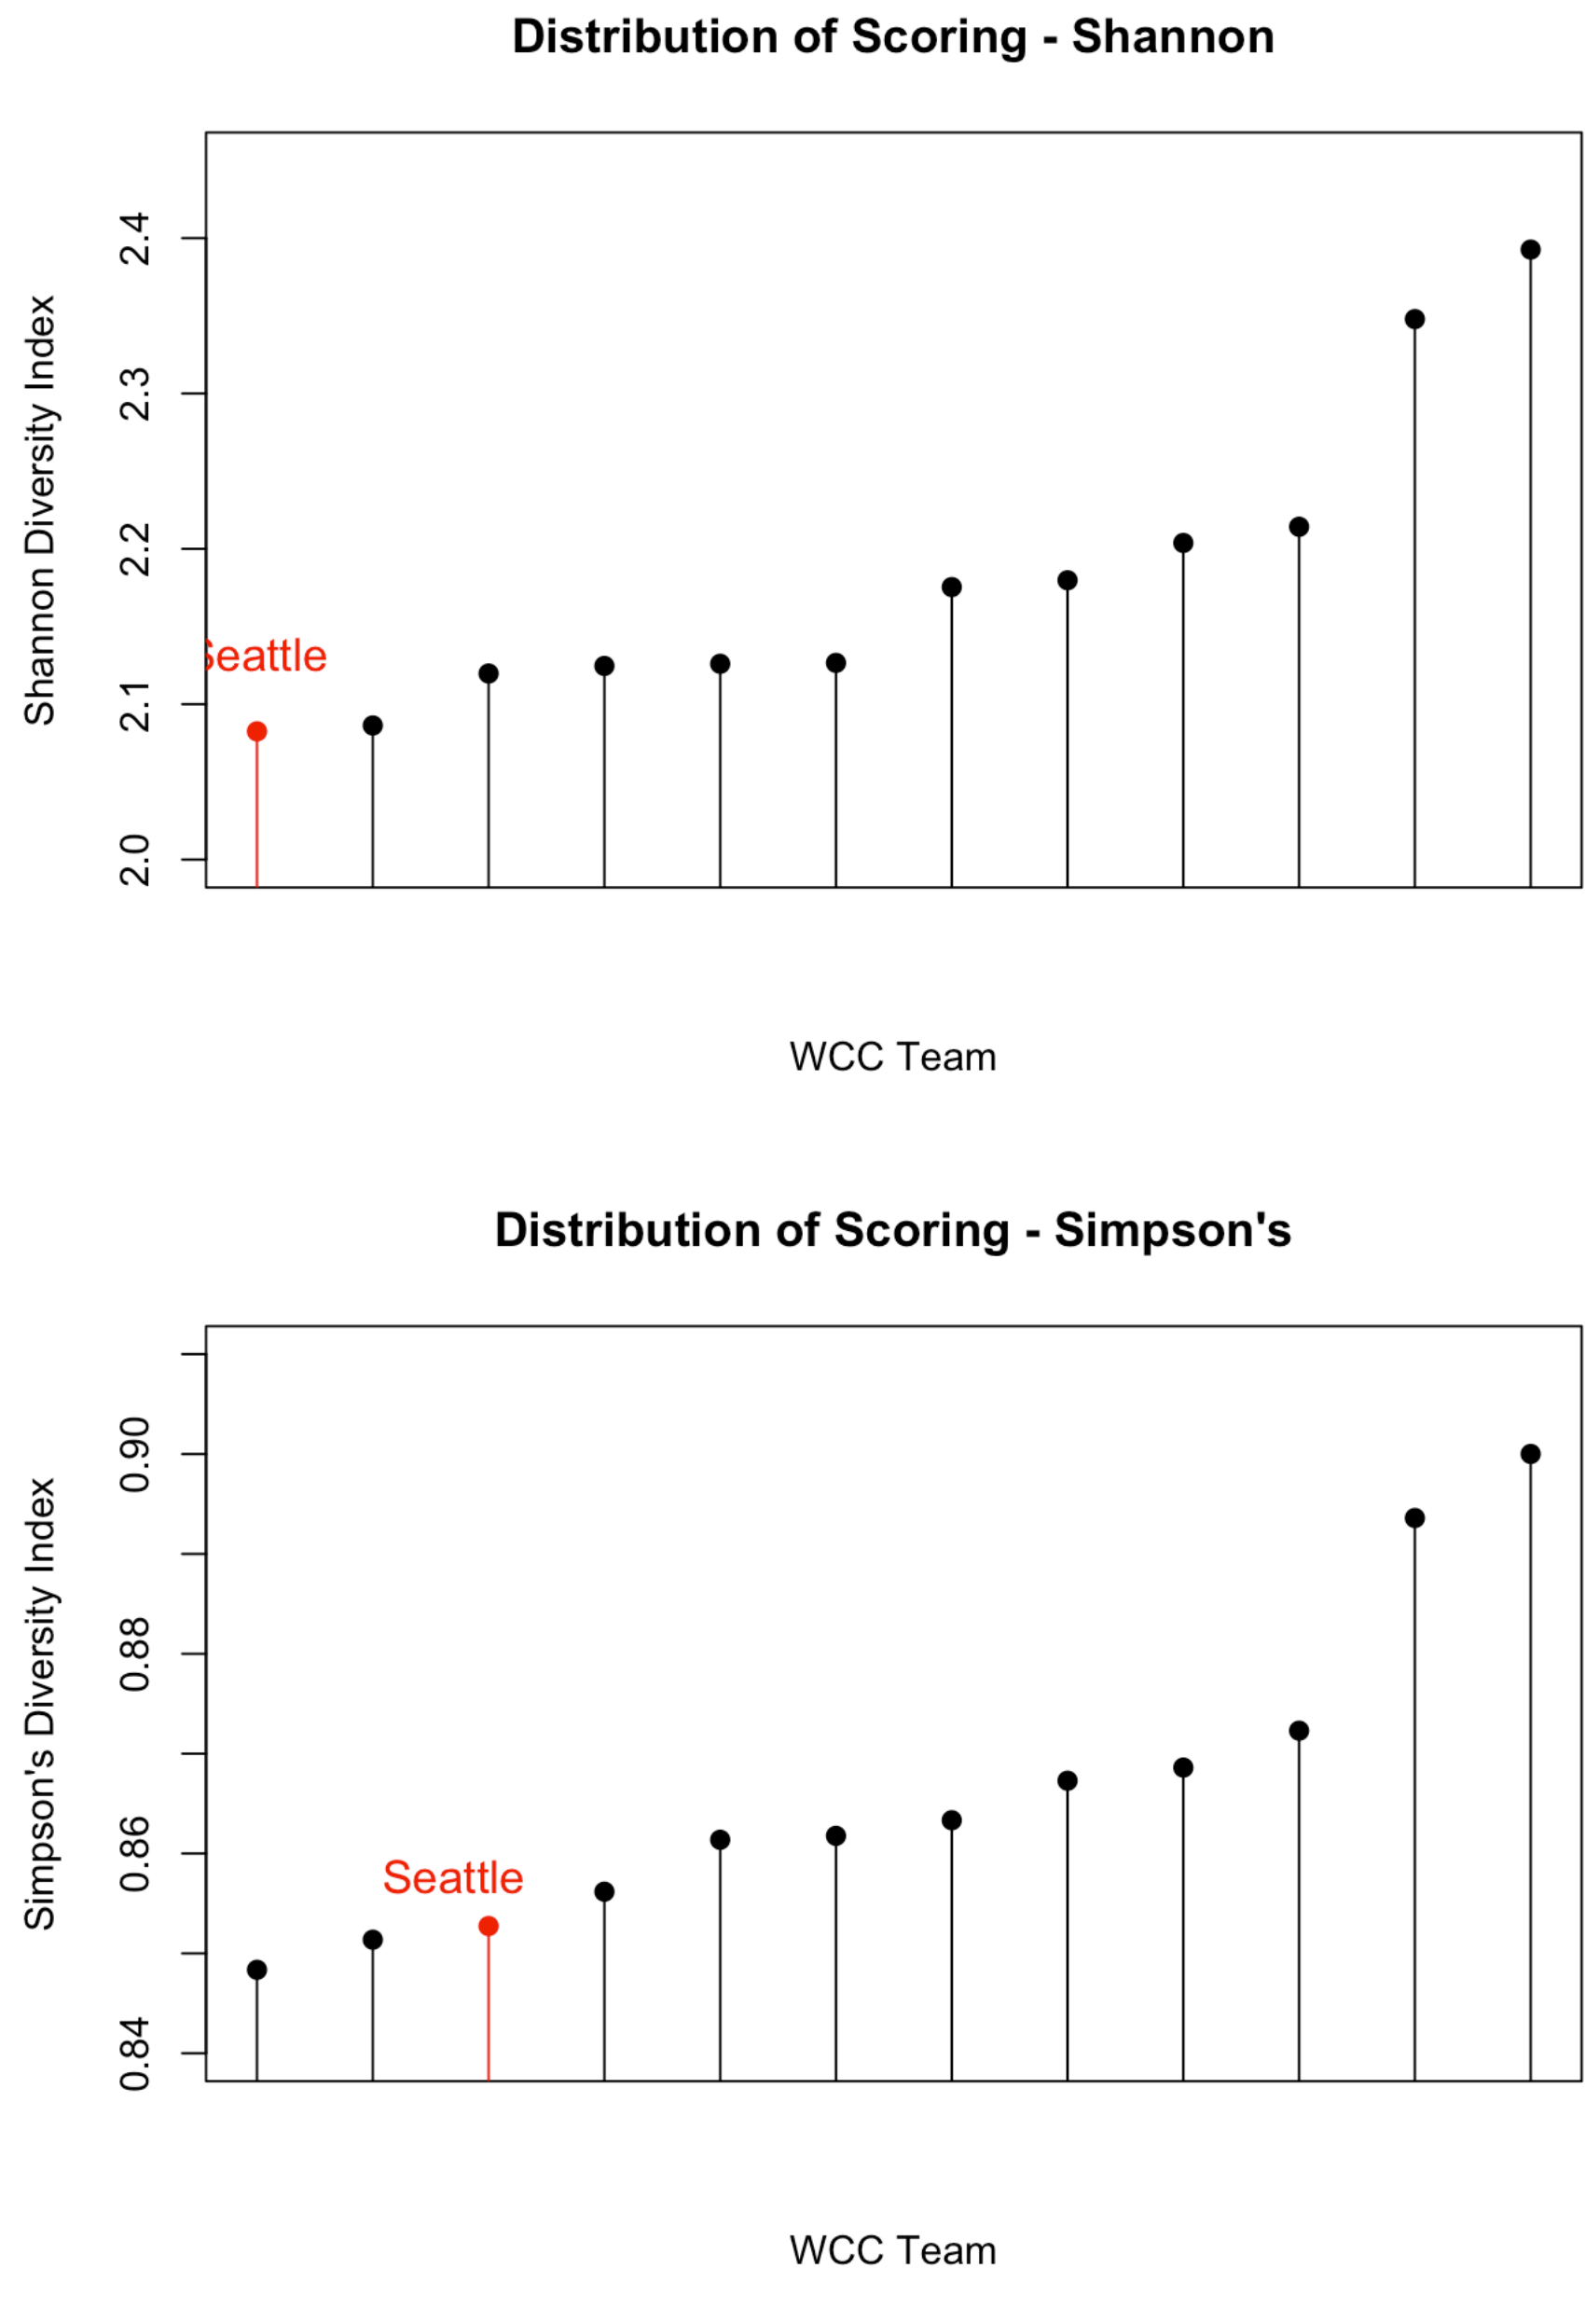

Weaknesses: poor rebounding; cannot stop opponent shooting or force turnovers

## Workload Distribution

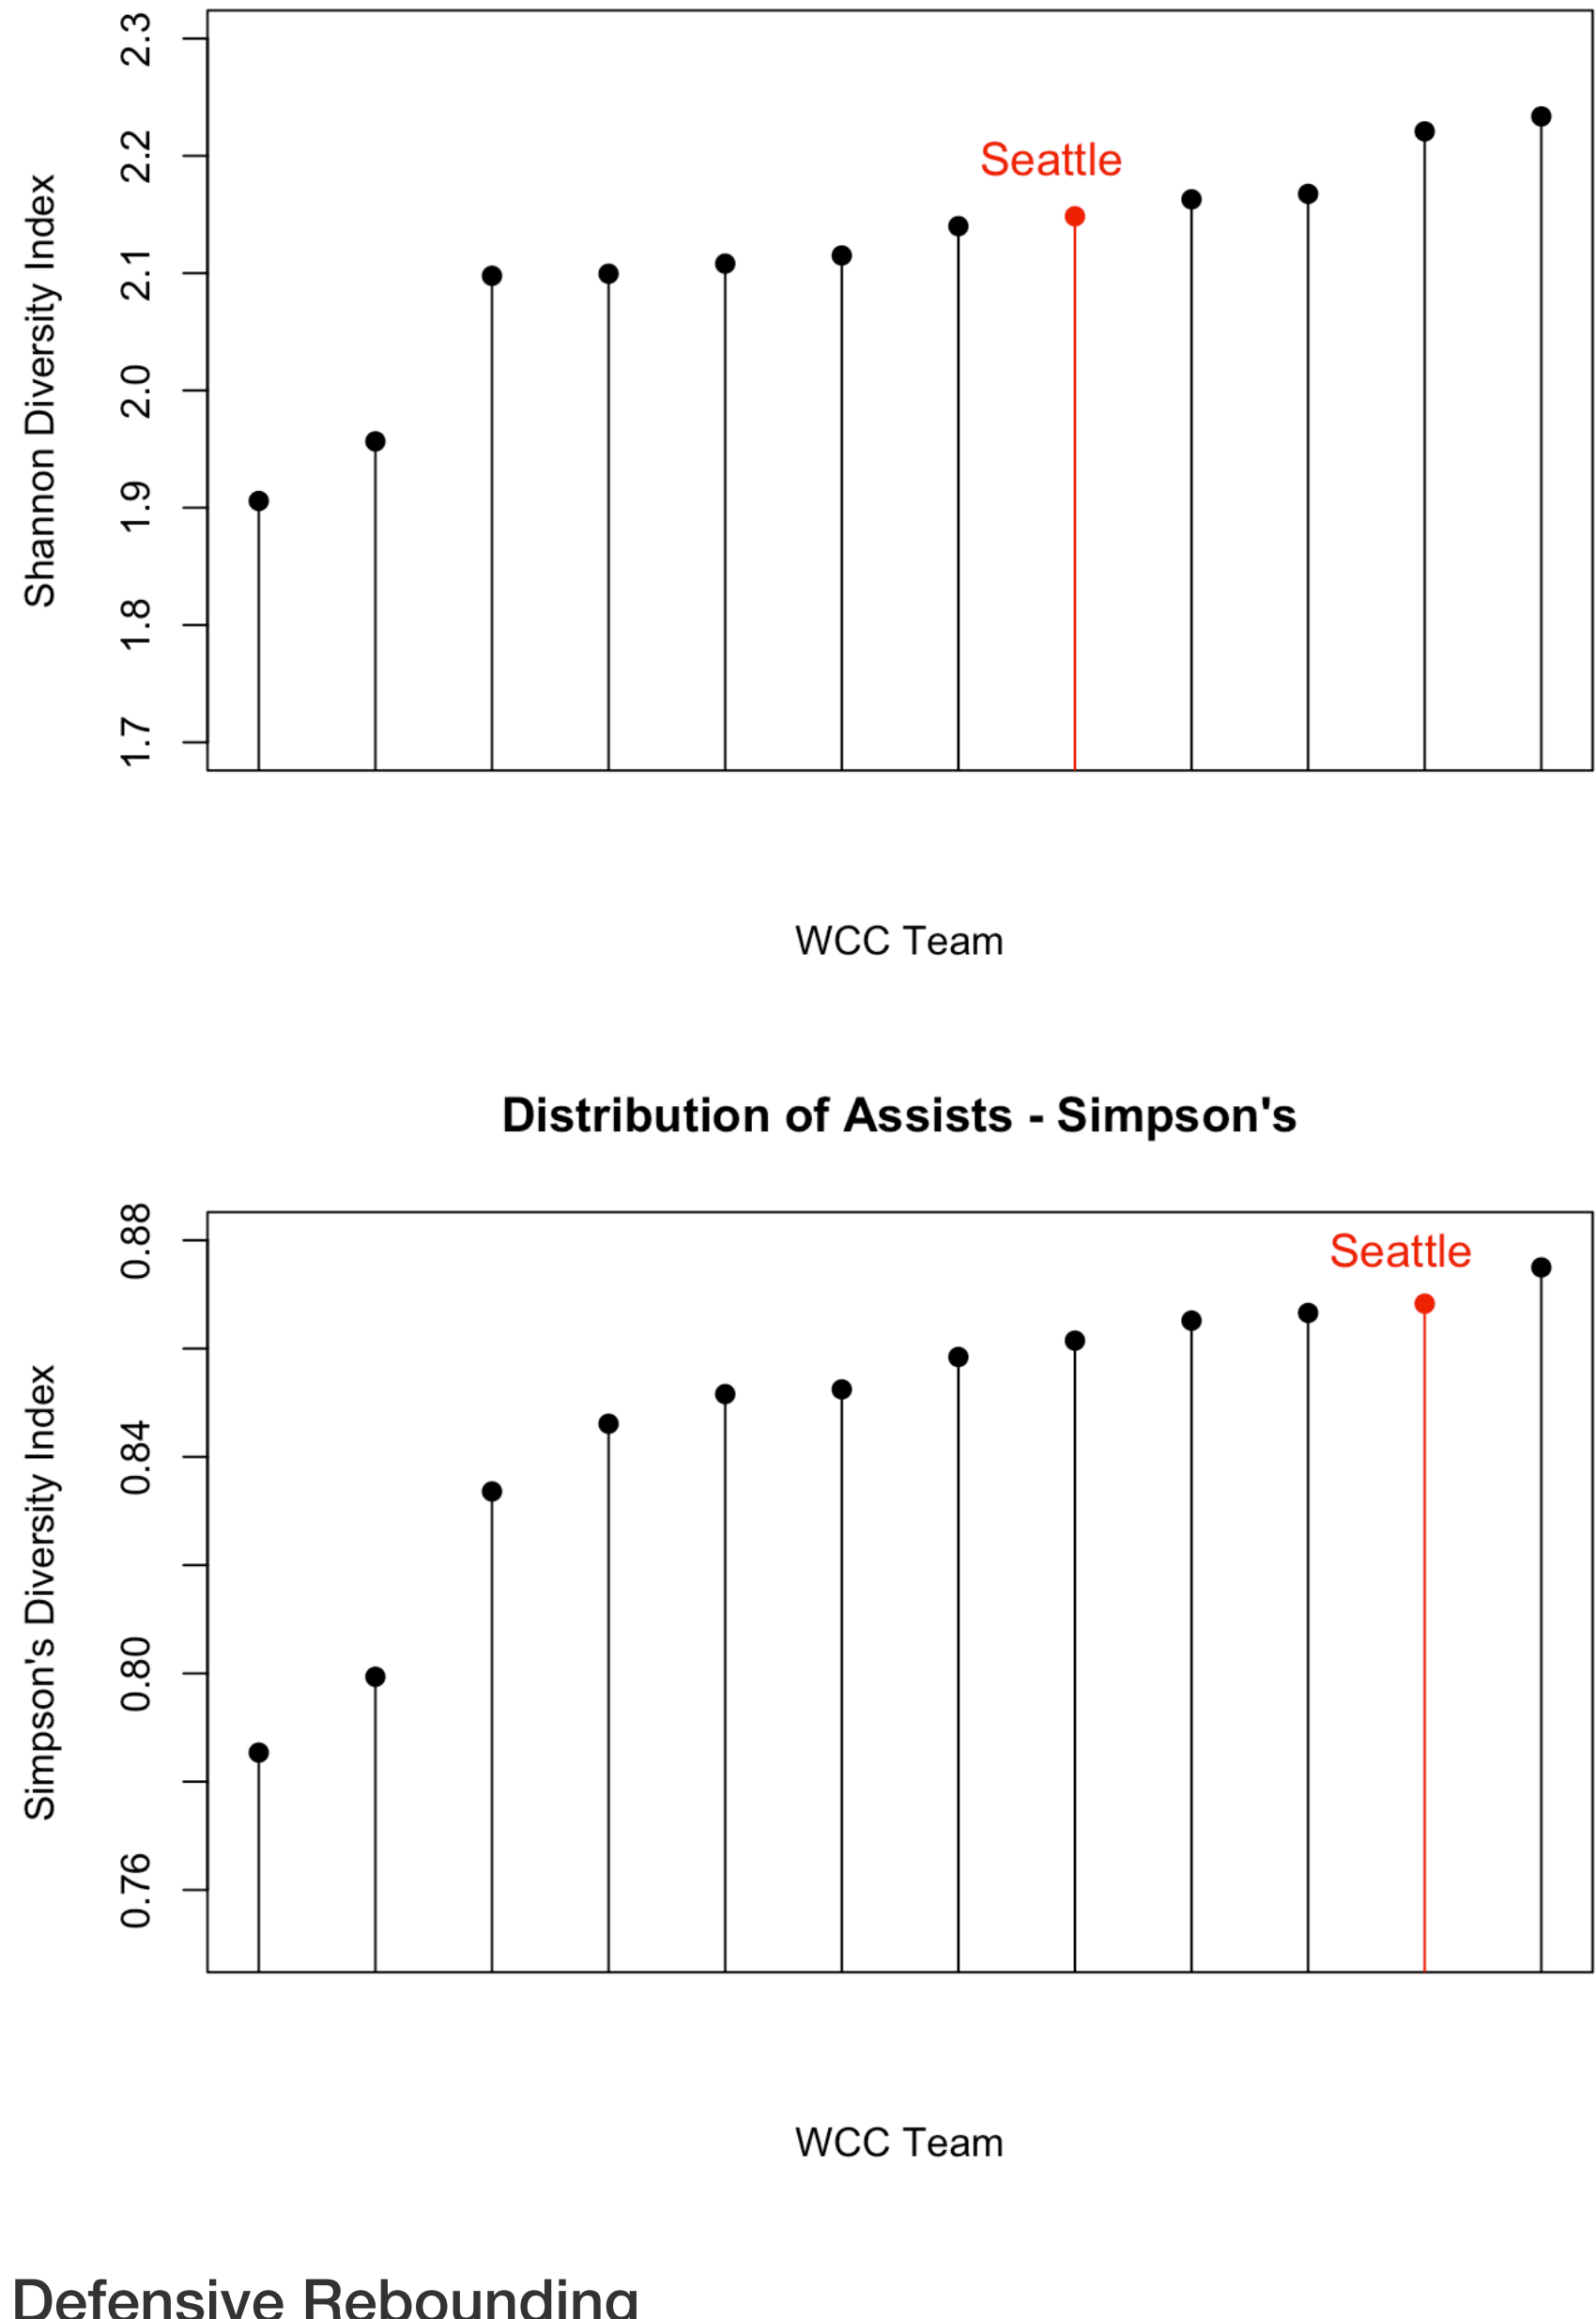

### Scoring

Assessment: scoring quite concentrated, over 55% of points scored by Ella Brubaker, Tamia Stricklin, and Jana Vesic (all are gone)

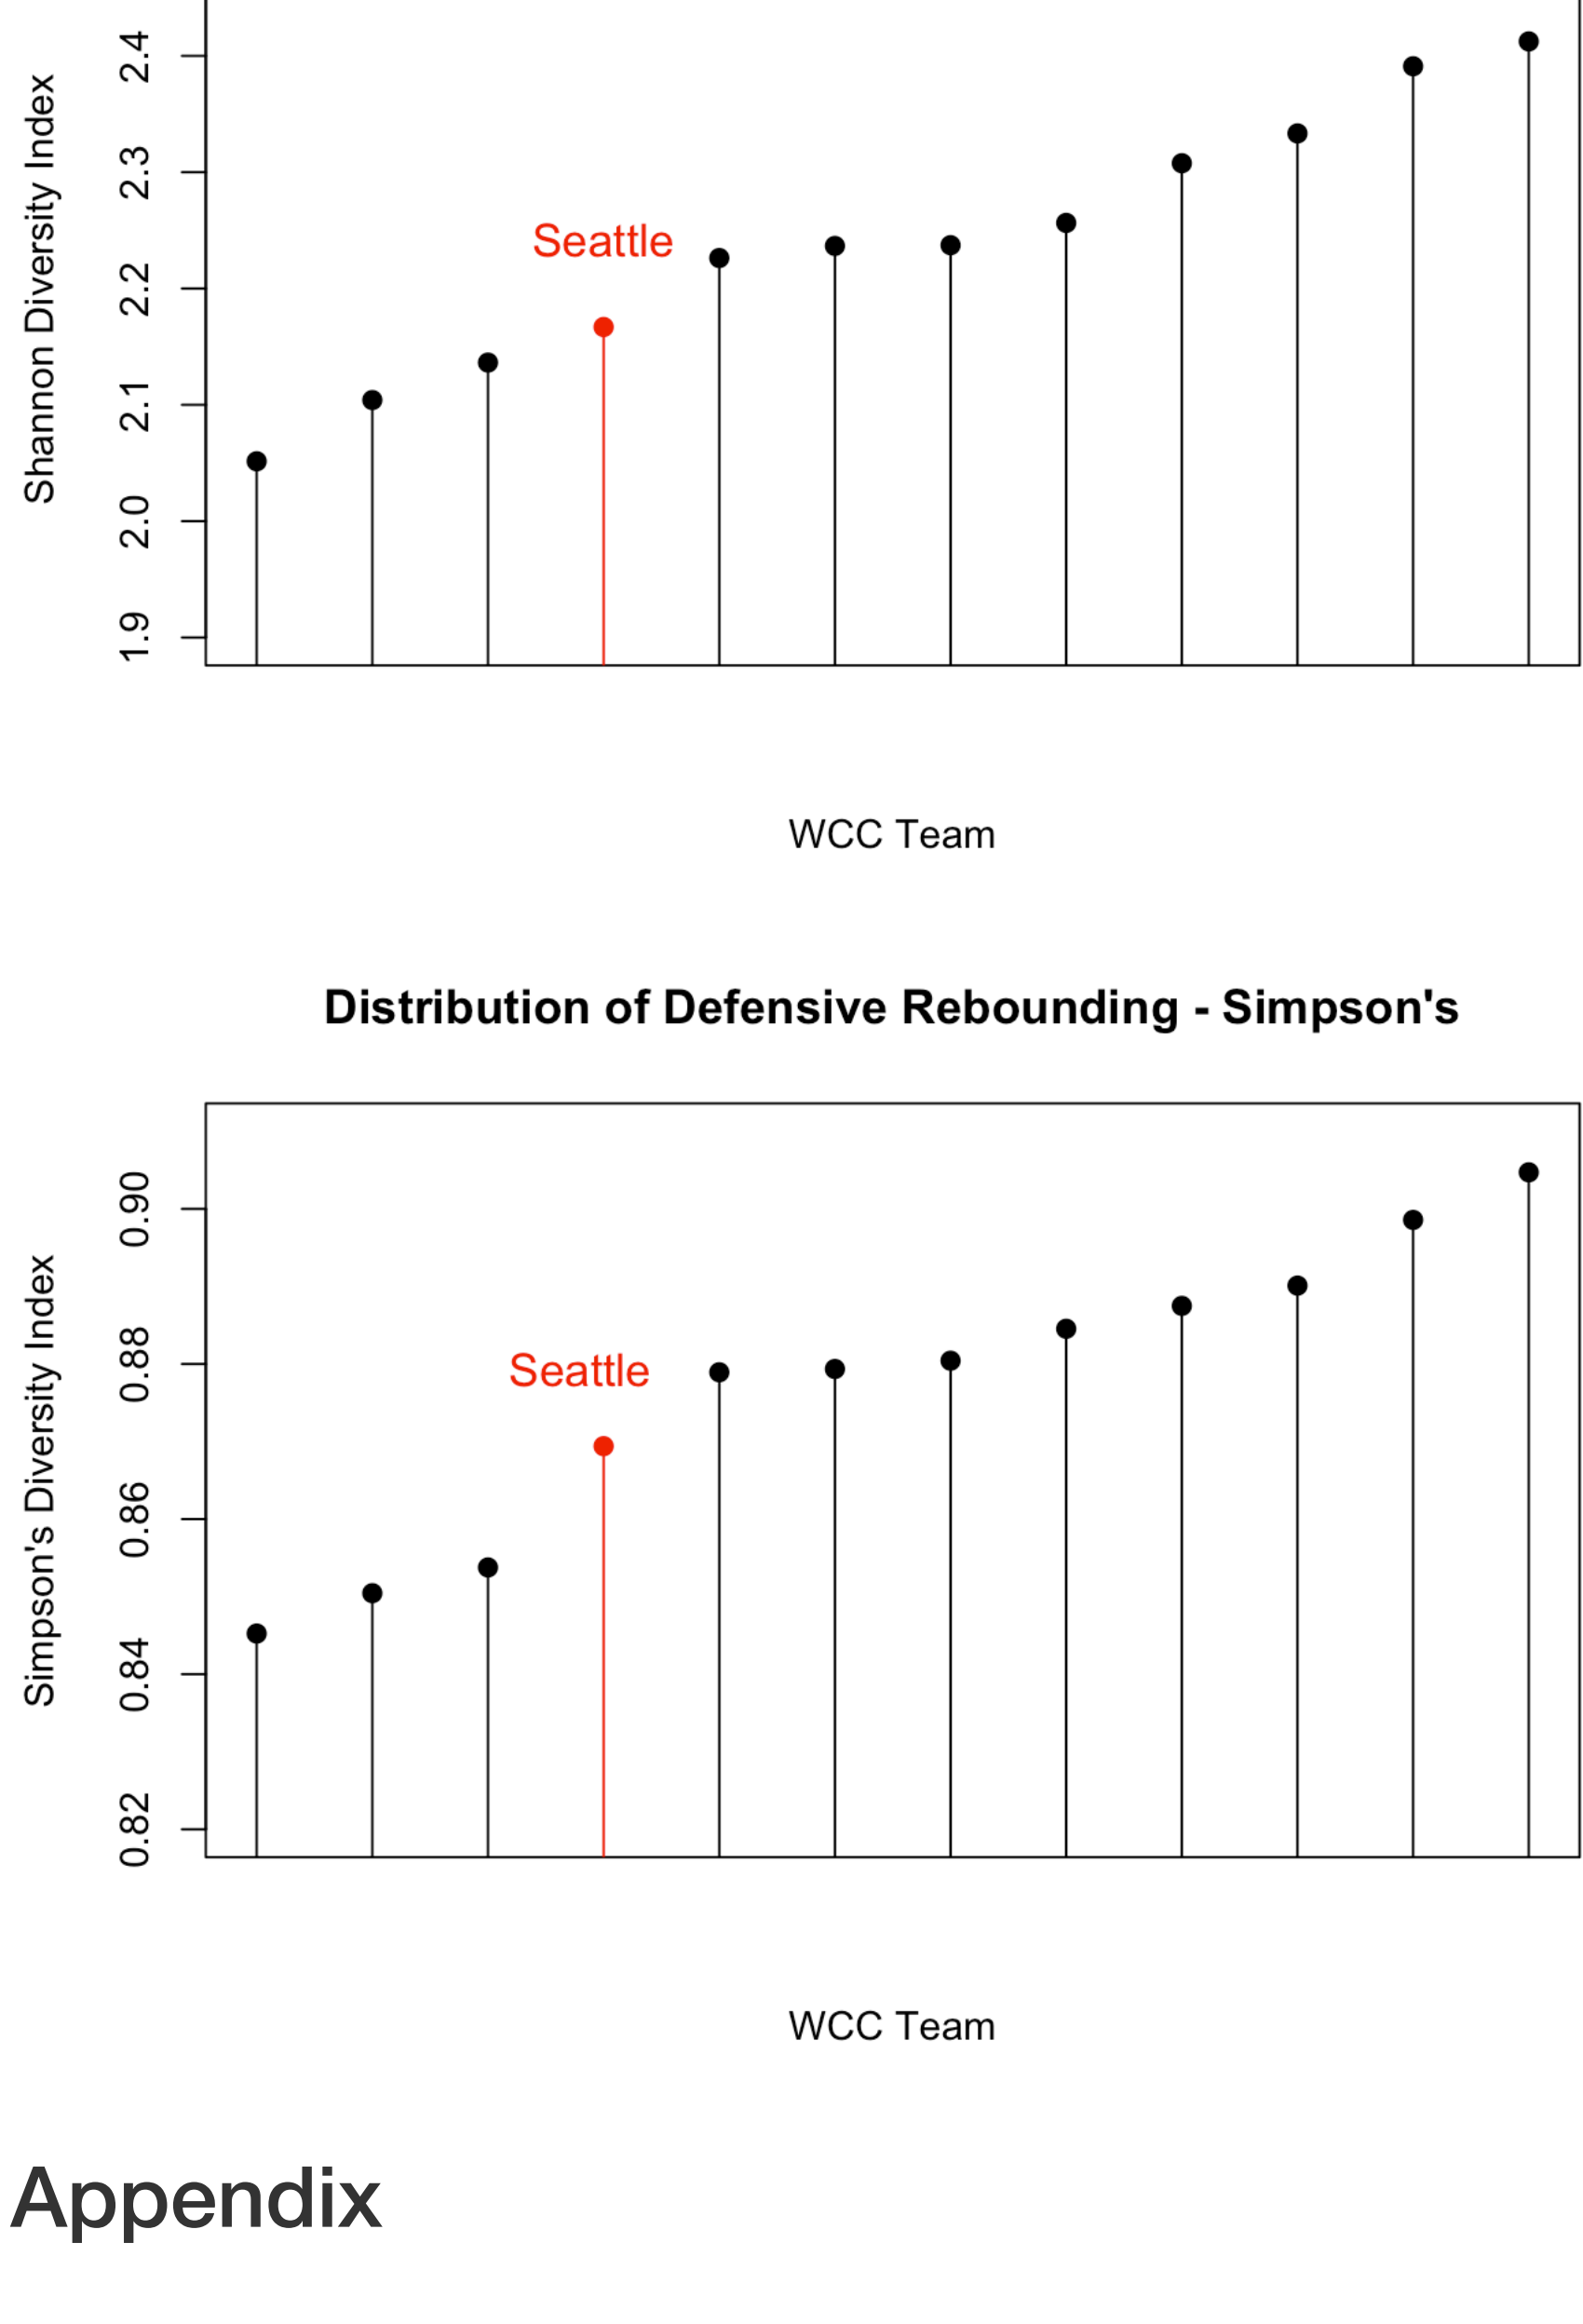

### Assisting

Assessment: data inconclusive

### Defensive Rebounding

Assessment: data suggests a fairly concentrated workload

## Appendix

Effective Field Goal Percentage:

$$eFG = \frac{FG + \frac{1}{3}3P}{FGA}$$

3P: three point shots made

Free Throw Percentage:

$$FTR = \frac{FTA}{FGA}$$

Rebounding Percentage:

$$RB_{\text{net}} = \frac{ORB}{ORB + Opp\ DRB}$$

flip ORB, DRB for defensive rebounding metric

Turnover Percentage:

$$TOV_{\text{net}} = \frac{TOV}{FGA + TOV + \frac{11}{25}FTA}$$

Shannon's Diversity Index:

$$H = - \sum_{i \in C} (p_i \log(p_i)),$$

$p_i$  is proportion of  $C$  that belongs to  $i$

Simpson's Diversity Index:

$$D = 1 - \frac{\sum_i N_i(N_i-1)}{N(N-1)},$$

$N$  is the total number of elements in  $C$ ,  $N_i$  is the number of elements in  $C$  that belong to group  $i$
